

Literary Miscellany.

Our Story, "Mirk Abbey" will be continued next week; we had not received the remainder of it at this office in time for this issue.

'EARLY TO BED AND 'EARLY TO RISE.'

'Early to bed and early to rise,' 'tis not in vain that the English wise, And upholds the words of pain.

Ye who are walking on thorns of care Who sigh for a softer labor, Try what can be done in the morning sun, And unke use of the early hour.

Full many a day forever is lost By delaying its work till to-morrow, The minutes of sloth have often cost Long years of needless sorrow.

And yet who would win the lasting wealth Of content and peaceful power, Ye who would couple Labor and Health, Must begin at the early hour.

We make bold promises to Time, Yet alas! too often break them, We mock at the wings of the king of kings, And think we can overtake them.

But why forego the prime of the day, Knowing that clouds may lower, Is it not safer to make life a lay In the beam of the early hour!

Nature herself e'er shows her best, Best of gems to the gaze of the ear, When the spangles of light on earth's green Put out the stars of the dark.

If we love the purest pearls of dew, And the richest breath of the flower, If our spirits would greet the fresh and the sweet, Go forth in the early hour.

Oh! pleasure and rest are more easily found When we start through Morning's gate, To sum up our figures or plough up our ground.

And wear out the threads of Fate, The eye looketh bright and the heart keepeth light, And man holdeth the conqueror's power, When ready and leave he chains Time as his slave, By the help of the early hour.

A Backwoods Editor. [For the benefit of those who have not heard it, or forgotten it, we will give the story of a backwoods editor:]

Years ago, when a certain Western State, (which we shall not name) a territory, and with a few inhabitants, a young lawyer from one of the old States emigrated thither, and settled in the town of K—.

He succeeded admirably in his profession, and rose rapidly in popularity. He had been there nearly two years, when he induced a printer to print a weekly paper, of which he was editor. Squire S. was much pleased for a while with editing a paper. He was a man of very low stature, but he used the editorial "we" as frequently as if there were a dozen him, and each of them as big as Daniel Lambert.

Strange to say, there were at that time men in office who were not a particle more honest than they should be; a thing which never happened before and probably never will again. Squire S. felt all the patriotism of a son of '76, and poured out grape and canister against public abuses. This soon stirred a hornet's nest about his ears; but as there was no other paper in territory there was no reply, and he enjoyed his warlike propensities in security.

At length he published an article more severe and cutting against meanness in office than any that had preceded it. In fact, though pointed at no one individual in particular, it was a "scoreboard." Some three or four days afterwards he was sitting in his editorial office, which was about a quarter of a mile from the printing establishment; his pen was busy with a paragraph, when the door opened without much ceremony, and in stalked a man about six feet in his it-cloakings. He asked, "Are you S., the proprietor of this paper?" Thinking he had found a new patron, the little man, with one of his blandest smiles, answered in the affirmative. The stranger deliberately drew the last number of the paper from his pocket, and pointing to the article against rogues in office, told the frightened editor that it was intended for "him." It was in vain that S. protested he never heard of him before. The wrath of the visitor rose to fever heat, and from being so long restrained, boiled over with double fury. He gave the editor his choice, either to publish an humble, very laudable recantation, or take a flogging on the spot. Either alternative was worn down; but what could he do! The enraged office-holder was twice his size, and at one blow would qualify him for an obituary notice. He agreed to retract, and as the visitor insisted on writing the retraction himself, he sat down to his task. Squire S. made an excuse to walk to the printing office, with a promise that he would be back in season to sign it as soon as it was finished.

S. had hardly gone fifty rods when he encountered a man who inquired where Squire S.'s office was, and he was at home. Suspecting that he too, was on the same errand as the other visitor, he pointed to the office, and told him he would find the editor within, writing a most abusive article against office holders. This was enough. The eyes of the new comer flashing fire he rushed into the office and assailed the stranger with the epithets, "thief, scoundrel, coward!" and told him he would teach him how to write. The gentleman supposing it was some bully sent there by the editor, sprang to his feet and a fight ensued. The table was upset and smashed into firewood, the contents of a large jug of ink stood in puddles on the floor, the chairs had their legs and backs broken beyond the skill of surgery to cure them. This seemed only to inspire the combatants with still greater fury. Blow followed blow with the rapidity of lightning. First one was kicking on the floor and then the other, each taking it in turn pretty equally. The ink on the floor found its way to their faces, till both of them out the most ludicrous figure imaginable. The noise and uproar was tremendous. The neighbors ran to the door and exclaimed with astonishment that two negroes were fighting in Squire S.'s office. None dared separate them. At length, completely exhausted, they ceased fighting. The circumstances of the case became known, and the next day, hardly able to sit on horseback, their heads bound up, they started homeward, convinced that they had attained very little satisfaction from the attempt.

A Mean Device.

There were a score or more of women gathered together at Mr. Johnson's house. Mr. Johnson is a good hearted man and a good citizen, though he is rather skeptical about some things. The women had just organized "The Foreign Benevolent Society," when Mr. Johnson entered the room. He was at once appealed to to donate a few dollars as a foundation to work on, and Mrs. Graham added:

"It would be so pleasant in after years for you to remember that you gave this society its first dollar and its first kind word."

He slowly opened his wallet, drew out a ten dollar bill, and as the ladies smacked their lips and clapped their hands, he asked:

"Is this society organized to assist the poor of other countries?"

"Yes—yes—yes!" they chorused. "And it wants money?"

"Yes—yes!" said Johnson as he folded the bill in a tempting shape, "there are twenty married women here. If there are fifteen of you who can make oath that you have combed your children's hair this morning, washed the dishes, blacked the cook-stove, and made the beds, I'll donate this \$10."

"I have," answered two of the crowd, and the rest said:

"Why, now, Mr. Johnson?"

"If fifteen of you can make oath that your husbands are not wearing socks with holes in the heels, this money is yours," continued the wretch.

"Just hear him!" they exclaimed, each one looking at the other.

"If two of you have boys without holes in the knees of their pants, this X goes to the society!" said Johnson.

"Such a man," they whispered. "If there are five pairs of stockings in this room that don't need darning, I'll hand over the money!" he went on.

"Mr. Johnson," said Mrs. Graham with great dignity, "the rules of this society declare that no money shall be contributed except by members; and, as you are not a member, I beg that you will withdraw and let us proceed with the routine of business."

He Gets all the Points.

He was not a large man, says a San Francisco journal, except in his ideas and in the manner of his speech. His face was as grave as a Chinese problem, but there was a quizzical cast in his left eye, and his tongue was rich and heavy with foreign accent, albeit as rapid as the running waters of the river. Dec.

Leaving against the frequent head of one of the main lines in California street, with the general appearance of being ready either to brace up the market or ready to stand under he voiced this idyl:

"It's a fine thing to dale in stocks, when ye know ye're right. I get all me points from Flood. Misher Flood's a friend of mine. I make all me money through him. He's a kind adviser. A few days ago, I went to me friend Flood and sez I:

"Misher Flood," sez I, 'would it be best buying a few shares of Savage? It's goin' cheap,' sez I, 'an' the Lord knows but it'll get out of me rache soon.'

"Me friend Flood looked up from his writin' he was signing a check for an orphan asylum, an' sez he to me, shakin' his big head betwixt us:

"Don't touch it," sez he. 'Divil a thing is in the mine but wather, and it might hurt ye,' sez he.

"Thank ye misher Flood," sez I.

"Thin I went an' tuck in seven hundred shares. I got all me points from Flood. It was goin' at seventeen dollars. Befine it rose to twenty-two dollars, an' I bethought me of me frind Flood again, an' went to his office. He was glad to see me. He was speaking to his chafe clerk about keepin the assessments from gettin' mixed with the dividends, but kindly stopped and gave me a nod an' a wink.

"Good-mornin, Mr. Flood?" sez I. "Savage is a quare stock. It's 'papi' like a dog with a mule o' poison," sez I. "Wouldn't I best sell a trifle of it short?"

"He looked at me kindly an' sez he: "Have it alone for awhile; it's risin' like a full moon without signs of stoppin' an' I couldn't advise ye to sell."

"Thank ye, Misher Flood," sez I. "Thin I went an' sold me Savage to Keen. He had a trifle to treat, but was friendly to take it and gave me a profit of thirty-five hundred dollars. I got all me points from me frind Flood; but don't be takin' about it—he might change his system some time an' break me."

Rich Without Money.

Many a man is rich without money. Thousands of men with nothing in their pockets, and thousands without even a pocket, are rich. A man born with a good sound constitution, a good stomach and good heart and good limbs, and a pretty good headpiece is rich. Good bones are better than gold; tough muscles than silver; and nerves that flash fire, and carry energy to every function, are better than houses and land. It is better than landed estate to have the right kind of a father and mother. Good breeds and bad breeds exist among men as really as among the animals. Education may do much to check evil tendencies, or to develop good ones; but it is a great thing to inherit the right proportion of faculties to start on. The man is rich who has a good disposition—who is naturally kind, patient, cheerful, hopeful, and who has a flavor of wit and fun in his composition.

Shrewd Trick of a Newsbury.

Persons who are in the habit of passing in the neighborhood of the post office in Portland, Me., in the evening cannot help noticing a little newsdealer who is crying bitterly for some one to buy his last paper that he may go home. Of course he finds a great many sympathizing persons who buy the paper and bid the little fellow go to his mother. As soon, however, as the purchaser is out of sight the little chap procures another paper and goes through the same performance. Sometimes the police find him at his post at midnight, and are obliged to send him home. He probably sells twice as many papers as any other boy in the city.

A Seaside Romance.

Among the recent summer guests at Narragansett Pier have been a wealthy resident of Baltimore, his blooming daughter and a companion whose office it was to stand guard over her young mistress, and intercept any letters she might send to a young man in the South. Before a fortnight had elapsed a dainty missive was in the Baltimore mail-bag. The young gentleman packed his valise and started for Rhode Island. The father was forbidden by his physician to bathe in the surf, and his daughter's companion hated salt water, and usually sat on the rocks when her charge donned a bathing suit. While the happy girl was in the water her lover appeared, before her swimming like a duck, and proposed that they should be married next day in the breakers. She said yes. The next morning the lovers, a clergyman and two witnesses formed a little group in the surf a little farther out than the other bathers dared to go. The marriage ceremony had to be suspended every few minutes on account of the breakers, and a laugh broke from the lips of the girl when the clergyman solemnly gave full opportunity for the forbidding of the bans. Every body noticed how gay she was at dinner that day, and her father thought, "She's forgotten that Baltimore upstart already." A few hours later he was undeceived. Then the tempter raged again, but a lawyer's cool counsel prevailed. The bridegroom lingered a few days, and then went back to Baltimore, where next October the participants of the Comedy in the Surf will reappear in the same characters in the drama of a grand wedding before the eyes of the world.

The Modern Husband.

He is not unsympathetic and hard. His business tends to make him somewhat harsh and rough. Contact with the world rubs the poetic bloom from his mind and dries his sentiments, and unfits his tongue for the utterance of the sweet and dainty nothings, which occupy so large a place in the vocabulary of woman's expectations. He is decidedly matter-of-fact. He takes a great deal for granted, and wants his wife to assume something, and not look for vain repetitions when words are worth so much. The wear and tear of life tells on his nerves and sensibilities, and takes the sentiment, the poetry, the gallantry out of him, insensibly but effectually, and he appears indifferent without knowing it. He is absorbed in his business plans and ambitions, and cannot pretend to the least enthusiasm in his wife's ruffles, and laws, and his enjoyment of her new set of jewels is materially abated by the prospective raid upon his bank account.

In modern life differentiations are vastly greater than in the old days, when husband and wife worked together behind the counter and on the farm, each understanding the labor of the other, and joining as a true yoke fellow in drawing the mutual load. The modern husband does not weary his wife out by working her too hard. She neither weaves nor spins, and the tailor makes his coat if he does not sew on his shirt buttons. He treats his wife more as a companion than a drudge. He takes pride in her wit, enjoys her singing, admires her taste, and is pleased with the society she draws around their fireside. The old actor is not utterly gone, though it no longer flashes into exclamations of endearment; and it only needs the breath of a real occasion to blow what seemed to be dead embers of affection into a brilliant flame. Scarcely a day passes that we do not hear of some beautiful instance of devotion and self sacrifice on the part of those when it is too much the fashion to ridicule for selfishness, and accuse of infidelity. The steady toil and devotion of a lifetime are a thousand times more precious than gallant protestations, and the husbands who stood with folded arms on the deck of the sinking steamship, choosing to go down in death with their wives rather than escape and leave them to their fate, illustrated in a picturesque and thrilling way what the thousands of modern husbands are doing every day.

Napoleon III.

When Napoleon III., Emperor of France, was on a visit to a distant part of his domains he was welcomed by the school children of the village. After their teacher had made a speech for them, he thanked them. Then taking an orange from a plate he asked:—"To what kingdom does this belong?" "To the vegetable kingdom, sir," replied a little girl. The emperor took a gold coin from his pocket, and held it up, and asked:—"And what kingdom does this belong?" "To the mineral kingdom, sir," replied the little girl. "And to what kingdom do I belong, then?" asked the Emperor. The little girl blushed deeply, for she did not like to say "the animal kingdom," as she thought it might offend his Majesty, with a bright idea came, and she said, with radiant eyes:—"To God's kingdom, sir." The Emperor was deeply moved. A tear stood in his eye. He placed his hand on the child's head, and said, most devoutly:—"God grant that I may be accounted worthy of his kingdom."

He was Troubled with Bolls.

There was a sad expression on his countenance, and one could tell by the precision with which he walked, and the carefulness with which he avoided passing objects, and by the superhuman efforts he made to shrink himself up so that his clothes wouldn't hit him, that something was the matter.

"O-o-o! Whoop! Great G—us!" he exclaimed as a man ran against him; "I'll choke you to death if you don't keep on your own side of the sidewalk!"

"But a gentleman jostled me, sir," stammered the man.

"Hang the gentleman! Hang you!" exclaimed the irritated man; "I've got a bile; I've got two of them; I've got three of them; and when I get well, I'll bust the man that busts them!"

He laid his hand carefully on his thigh and lapped away with tears in his eyes, and in turning out to let a woman pass he ran against the hitching post.

He grabbed the post and jerked and wrenched it from its place; kicked it into the street, and whacked it against the pavement, and then started after the woman like a madman.

"Madam," said he as he overtook her in a dry goods store, "one word! I have upon my thigh a circumscribed subcutaneous inflammation, characterized by a pointed pustular tumor, and suppurating with a central core. I also have one on the backside of my front side, and another one—"

"Get out!" shrieked the woman, whacking him with a bundle of calico; "get out, or I'll call the police!"

"But I'm going to die!" "Get out," she shrieked.

"That you!" "Get out!" she yelled again.

"Busted one of them, he finally ejaculated, and if ever I find out where you live I'll let your cow loose in your yard some washing day, and let her chew up all your potatoes, and tread your corn, and pillow-cases into the mud and break your front gate."

Then he slid out and was limping down the street when he slipped on a piece of ice and came down with an energy that startled all the horses in the vicinity and shook the window panes in the store fronts.

There was a shriek, a long drawn wail, a volley of oaths, and a variety of groans and sobs, which attracted the attention of a kind-hearted doctor, who took him into a drug store and hung him across the back of a chair, where he writhed and wriggled until a boy with a grocery cart gave him a seat in a bushel basket and took him home.

And now he walks the streets, and he hurls at all he meets.

Such sad snites. And upon his ragged coat There is hanging this brief note "I've got bile."

Beecherism in Indiana.

Corydon, Ind., is the scene of an exciting. The Rev. Mr. Lothario H. H. of the Methodist Church, attempted to kiss a handsome lady of his congregation, a proceeding to which the lady so decidedly demurred that her sermons called her husband, who was at work in the field. That gentleman, though a devout member of the church, could not exactly see the propriety of sharing the conjugal kiss with his beloved pastor. He therefore put on a very helligerent aspect and chased Lothario to his horse and stoned him as he rode away. Thereupon charges were made before the Church, before the Masonic Fraternity, and before the courts.

The Modern Husband.

He is not unsympathetic and hard. His business tends to make him somewhat harsh and rough. Contact with the world rubs the poetic bloom from his mind and dries his sentiments, and unfits his tongue for the utterance of the sweet and dainty nothings, which occupy so large a place in the vocabulary of woman's expectations. He is decidedly matter-of-fact. He takes a great deal for granted, and wants his wife to assume something, and not look for vain repetitions when words are worth so much. The wear and tear of life tells on his nerves and sensibilities, and takes the sentiment, the poetry, the gallantry out of him, insensibly but effectually, and he appears indifferent without knowing it. He is absorbed in his business plans and ambitions, and cannot pretend to the least enthusiasm in his wife's ruffles, and laws, and his enjoyment of her new set of jewels is materially abated by the prospective raid upon his bank account.

In modern life differentiations are vastly greater than in the old days, when husband and wife worked together behind the counter and on the farm, each understanding the labor of the other, and joining as a true yoke fellow in drawing the mutual load. The modern husband does not weary his wife out by working her too hard. She neither weaves nor spins, and the tailor makes his coat if he does not sew on his shirt buttons. He treats his wife more as a companion than a drudge. He takes pride in her wit, enjoys her singing, admires her taste, and is pleased with the society she draws around their fireside. The old actor is not utterly gone, though it no longer flashes into exclamations of endearment; and it only needs the breath of a real occasion to blow what seemed to be dead embers of affection into a brilliant flame. Scarcely a day passes that we do not hear of some beautiful instance of devotion and self sacrifice on the part of those when it is too much the fashion to ridicule for selfishness, and accuse of infidelity. The steady toil and devotion of a lifetime are a thousand times more precious than gallant protestations, and the husbands who stood with folded arms on the deck of the sinking steamship, choosing to go down in death with their wives rather than escape and leave them to their fate, illustrated in a picturesque and thrilling way what the thousands of modern husbands are doing every day.

Oxygen is Life.—Dr. Bright's Phosphodyne.

DR. BRIGHT'S PHOSPHODYNE—MIGRAINE OR PAIN IN THE HEAD, NEURALGIA, RHEUMATISM, GOUT, BRUISES, SCALDS, BURNS, AND ALL AFFECTIONS OF THE SKIN, AND ALL AFFECTIONS OF THE NERVOUS SYSTEM, AND ALL AFFECTIONS OF THE DIGESTIVE ORGANS, AND ALL AFFECTIONS OF THE RESPIRATORY ORGANS, AND ALL AFFECTIONS OF THE CIRCULATORY ORGANS, AND ALL AFFECTIONS OF THE EXCRETORY ORGANS, AND ALL AFFECTIONS OF THE REPRODUCTIVE ORGANS, AND ALL AFFECTIONS OF THE URINARY ORGANS, AND ALL AFFECTIONS OF THE GENITAL ORGANS, AND ALL AFFECTIONS OF THE PERIPHERAL ORGANS, AND ALL AFFECTIONS OF THE CENTRAL ORGANS, AND ALL AFFECTIONS OF THE NERVOUS SYSTEM, AND ALL AFFECTIONS OF THE DIGESTIVE ORGANS, AND ALL AFFECTIONS OF THE RESPIRATORY ORGANS, AND ALL AFFECTIONS OF THE CIRCULATORY ORGANS, AND ALL AFFECTIONS OF THE EXCRETORY ORGANS, AND ALL AFFECTIONS OF THE REPRODUCTIVE ORGANS, AND ALL AFFECTIONS OF THE URINARY ORGANS, AND ALL AFFECTIONS OF THE GENITAL ORGANS, AND ALL AFFECTIONS OF THE PERIPHERAL ORGANS, AND ALL AFFECTIONS OF THE CENTRAL ORGANS, AND ALL AFFECTIONS OF THE NERVOUS SYSTEM, AND ALL AFFECTIONS OF THE DIGESTIVE ORGANS, AND ALL AFFECTIONS OF THE RESPIRATORY ORGANS, AND ALL AFFECTIONS OF THE CIRCULATORY ORGANS, AND ALL AFFECTIONS OF THE EXCRETORY ORGANS, AND ALL AFFECTIONS OF THE REPRODUCTIVE ORGANS, AND ALL AFFECTIONS OF THE URINARY ORGANS, AND ALL AFFECTIONS OF THE GENITAL ORGANS, AND ALL AFFECTIONS OF THE
