

THE HERALD

PUBLISHED EVERY FRIDAY

Is sent by mail or other conveyance when so desired for ONE DOLLAR per annum in advance.

THE HERALD will contain all matters of local importance, articles and comments on the political events of the day, the latest home and foreign news carefully summarized, trustworthy market reports, agricultural matters and general family reading.

Advertisements contracting for space on the second third or fourth pages, for a specified time, will be charged, payable quarterly, as follows:

Table with 4 columns: One, Two, Three, Six. Rows for Column, Half Column, Quarter Column, Two inches, One inch.

Changes allowed in contract advertisements twelve times a year; each change over twelve times will be charged extra.

The copy for changes of advertisements must reach the office on Monday to secure attention the same week.

Lengthy correspondence and advertisements must be received at the office not later than Wednesday noon, to secure insertion the current week.

M. H. KEFFLER, Editor, Publisher and Proprietor.

THE HERALD

RICHMOND HILL, NOV 10th, 1876.

INDUSTRIAL CANADA.

Industrial Canada is the designation of a pamphlet from the pen of A. Baumgarten Ph. D. of Montreal.

"Protection or Free Trade" is just now the great question, engaging the attention of the thinking minds of our infant Dominion.

Without many are, misled by the idea that Free Trade means cheap living; but it is a poor morsel of comfort for the working man and industrious mechanic to tell them that Free Trade means cheap living when all industries are prostrate, and without work so money to purchase food, even though food be cheap.

There is another fact equally obvious, that the growth and development of great centres of trade depends upon the growth and development of industrial and manufacturing interests.

The great cities of the United States owe their prosperity largely to the fostering care bestowed upon manufacturing interests.

"Since the war Americans have started in all possible branches, and we find them now the largest manufacturers of mineral acids, tartaric, citric, acetic, oxalic, and chemically pure acids, of the Alkaloids and all kinds of chemicals, dyeing and photographic preparations, fertilizers, drugs, mineral and organic colors, paints and varnishes, etc.

All this is the more humiliating when we remember that in natural resources Canada is not behind the United States. Our country abounds in ores of every variety, and great richness: phosphates, alkaline earths, salts, coal &c., and yet with a protective tariff altogether insufficient, our neighbors take the raw material from us, and we buy it back at a large advance in the shape of the manufactured article.

"Making every allowance for the superior taste in the display of their productions, which is apt to prejudice in their favor, the cool, impartial observer and technic, after comparing prices and inspecting American manufacturing establishments, will come to the conclusion that our neighbors have

really become the most successful and enterprising manufacturers, and are dangerous competitors in almost every industry in the world.

This conclusion must receive a sound corroboration by the last statistics, which show in the United States an excess of exportations over importations during the last six months, of nineteen million dollars.

The day is past when the prosperity of this country, can be maintained by the export of our natural productions in their raw state, and the import of manufactured goods in return, the profit of the manufacture going into other hands; and this can only be accomplished by giving the men who are willing to risk their money in manufacturing enterprises, a Protective tariff, sufficiently stringent and absolutely certain.

We consider Mr. Baumgarten's pamphlet a most timely production, and bespeak for it a wide circulation. And if the men now in power have neither the heart nor the head to conserve the interests of their country in the time of great difficulties and dangers; let them be removed, and other men more competent put in their place.

MANUFACTURE OF BUNTING.

"The manufacture of bunting was unknown in this country until after the close of the war, so that no American ship ever fought under a yard of American bunting. One or two attempts had been made to make it in America, which had failed.

The above is a strong commentary on the manner in which our beautiful Government, treats our manufactures, and manufacturers, and proves conclusively, that support to home productions, does not at all events, always enhance the price to consumers.

FOR THE HERALD.

COMPULSORY VOTING.

Although this is a subject which has never been deemed worthy, to any extent, of public consideration, as not having much weight on political affairs; perhaps a full investigation might reveal points which have such force, that the desirability of the movement would be owned by all who reviewed the subject rightly.

"Honest poverty should rarely be a bar to wadlock. Granted that two persons are to exist in this world, they can commonly live as cheaply and comfortably in one home as in two separate homes. Tens of thousands of happy and holy marriages have been consummated under no 'cards' were issued, and no bread gifts bestowed, except an honest hand and loving heart.

that whilst choice is left us as to whether we will cast our vote or not, that the Government of our country is influenced by such a contingency as the state of the weather, for when the day of election is five numbers turn out, who, when it happens to be wet remain at home.

WEEDS are the farmer's most inveterate enemies. They look very harmless; but if we recall the appearance of the fields last fall, the tax they drew from the crops may be easily appreciated.

AN agitation is again being revived favoring the abolishment of the Book Concern in connection with the Education Office, Toronto. Years ago leading reformers agitated for the discontinuance of this open door to corruption; and when the clerk, George Barber, robbed the institution, by a fraudulent abstraction of a quantity of books, four years since, that agitation was again renewed.

Things are different when "leading reformers" are in power and when they are not, the sweets of office seem to change their taste upon various subjects. The Globe and other kindred sheets are silent—remarkably silent—about the Book Concern. It is about time steps were taken, to at all events, to gradually get away with a Concern, that has lived out its usefulness.

The Colleged Enterprise states that the steamer "Tecumseh," arrived there from Chicago with 30,000 bushels of wheat; also the schooner "Lotus" and propeller, "City of Owen Sound," with similar cargoes. This is very gratifying so far as the shipping of the country is concerned; but is it fair to our farmers that wheat should be allowed in free of duty from the States whilst an impost is put on similar articles from this side when going into the States.

People who have to pay for these trips of the different members of the Government to the Old Country are anxious to know what it is all about. The latest is Mr. Cartwright, who started the other day on a mission across the water; but the people must wait the pleasure of those who in times past were so eager to fawn on them. Times are now changed.

We noticed in the Globe a few days ago an article entitled "Character no Object," and naturally supposed it to be a fresh inducement—a sort of moral, or immoral bonus to attract laborers to the Reform vineyard. After all, it meant that character is a most important thing, if it be a Grit character, but, of no value, if it be a Conservative. It is very wicked to slander a good Reformer, but quite allowable to asperse the character of a Tory.—National Independent.

An important case in which Agricultural Society Directors will feel interested, was lately decided by Judge Hughes. The Malabide Ag. Society sued Mr. J. Gillott for 20 cents, being the amount claimed for admission to the last show. Mr. Gillott considered he had a right to enter the grounds as often as he chose, for one price of admission. Judge Hughes decided he had not, and gave judgment and costs against Gillott—and added, that all By-Laws and Rules of a Society, passed by Directors, have the force of Municipal Council laws, if adopted within the scope of the Agricultural Act.

"Honest poverty should rarely be a bar to wadlock. Granted that two persons are to exist in this world, they can commonly live as cheaply and comfortably in one home as in two separate homes. Tens of thousands of happy and holy marriages have been consummated under no 'cards' were issued, and no bread gifts bestowed, except an honest hand and loving heart.

Mr. Daniel F. Beatty, of Washington, N. J., the energetic and persevering manufacturer of the Beatty Piano and Golden Tongue Parlor Organs, deserves the highest credit for having produced the most perfect musical instrument combined with the utmost beauty and clearness of design yet offered the musical public. See his advertisement in another page. Address Daniel F. Beatty, Washington, N. J., U. S. A.

AGRICULTURAL.

BARLEY AND OATS can be sown upon a fall plowed stubble, as soon as the surface is dry, and thus, by plowing the ground in the fall, a gain of valuable time is made in the spring.

WEEDS are the farmer's most inveterate enemies. They look very harmless; but if we recall the appearance of the fields last fall, the tax they drew from the crops may be easily appreciated.

SEWING GRASSES are best to be sown early, but what is early depends greatly on the nature and condition of the soil. There are early sals, light, warm, and naturally drained; on these, barley and oats may be sown several days sooner than on cold, heavy clays.

CLOVER SEED takes best upon good soil, that has been harrowed and freshened up previously, and fails most frequently when sown upon poor soil, and on bare hard surface that has been packed by the winter's storms.

CARROTS are a crop that deserves more attention than it receives, for its value as a healthful food for all kinds of stock. A prejudice exists against it, on account of its slow germination, which enables weeds to get the start of it; the length of the roots and the need for clean culture.

THE ROLLER should be used with judgment. It is a valuable implement, but sometimes it is used injuriously. It is most effective upon dry soils; when the soil is damp, clods are easily crushed but the surface is packed and crusted.

CLEANLINESS is imperative everywhere about the house, the horses, the cow, and the stable; health is generally valued much when it is lost, and the quickest way to lose it is to neglect cleanliness.

OXYGEN IS LIFE.—DR. BRIGGS'S PHOSPHORIC-MERITOL is a powerful medicine for the cure of Debility, Nervous and Liver Disorders, Dropsy, Spasms, Rheumatism, Indigestion, Want of Power, etc., whose cause is a permanent cure by the new remedy, Phosphoric (disease Oxygen), which at once dissolves all irritations and excitement, imparts new energy and life to the exhausted constitution, and cures every stage of these hitherto incurable and distressing maladies.

LIBERAL CONSERVATIVE ASSOCIATION FOR THE East Riding of York. Parties desirous of becoming members can forward their names to Mr. John Gibson, President, Milliken P O Mr. H. Jennings, Treasurer, Victoria Square P O Mr. S. T. Lumberstone, Sec'y, Newtonbrook P O

FARMERS: Should have in mind that the Canadian Farmers' Mutual is a thoroughly practical, financial, and agricultural association. It is a mutual benefit association, and it is one of those right things which we wish to give to them, but we will force them to exercise their "right of suffrage" which is one of the most glorious which the constitution can bestow upon them.
