"Positively—absolutely."

A peculiar sound such as might issue from the tips of a woman who strives to repress an exclamation of pain, came from the room beyond; but the two men were so absorbed in their conversation that they did not heed it.

There was a singular contrast between the pair, and no observer, looking at them as they stood together, could possible have guessed that there was but ten years difference in their ages. And I In my besotted, idiotic infatuation I could not remember that a great impulse had been given to our acquaintance by the surrender on my part of a large sapphire that hung from my watch chain. That cursed cotton mill in Massachusetts furnished such things too liberally for me to value them, and I could not suppose that she did. It took some time for my imagination to grasp the fact that the little hand that passed carelessly over my bosom was attracted thither by my shirt studs. And yet,

I daresay I am misrepresenting her. She was so young, childish, and the passion for ornaments was but the instinct of her race. "In my case the course of true love, ran, or appeared to run, with remarkable smoothness. The sight of the golden circlet that was to be her wedding ring did not alarm her as a similar suggestion had done on the part of her last lover neighboring parish, whose acquaintance I had made, pronounced us man and wife in the very shadow of the old Druid oak. Then, in a shooting-box amidst the Scottish heather, whither I took my bride for three short months. indulged in all the luxury of loves young dream. And she too was happy. It takes fully three months for a woman to explore all the miracles of finery and furniture with which the fashions of the present day surround a bride ; for although I had married her in her wild gipsy garb, London milliners and up-holsters had prepared her home.

" It was knowledge that broke the

was just explaining the awful meaning and significance of the letter A as it appeared on the first page of a primer, wnen she broke away from me and rush ed away through the garden and into the woods. Smiling at the result of the first lesson, I lit a cigar and fell to dreaming of the pleasure I should yet have in guiding my dainty little wife along the rough road that leads to knowledge. It would be a labor of love, and however painful, the result would repay us both. And surely her ignorance was sweeter than all the accomplishments of another woman. That very night, as I was closing the snutters of my room previous to retiring, I was startled as I was closing the snutters of by the figure of a man upon the lawn. Sometiming in his gast remonded me of the lithe form that strode away from us on the first day I met my love; I attached no importance to it, however; and yet during the months that followed I met him three times always apparently

on his road to or from my house. "But a great anxiety was upon me. The cheeks of my gipsy maiden were losing their roses; she could no longer roam through the heather with her hand in mine, and I shuddered as I thought of the consummation, of the trial in store for her. At last I ordered the servants to pack our belongings, and I hurried away with my bride to one of the suburbs of London, where she might have the most skilful physicians to attend her. What I mistook for disease was nothing more than the longings of the Zingar blood for the freedom of its native forests. Like a bird in a cage. I

was killing ner by my care for her. I ten you how wall ! 'eved her; still less could I give you an idea of the rapture of thanksgiving that possessed my soul on the night that they put her baby in my arms, and told me her life Yet mindful of my duties as a host, I quickly surrendered the infantile wonder, and hastened to accompany the weary physician to the door of our house. I lingered a moment watching him as he passed the gate, when suddenly there daried from among the trees the same figure that had grown so familiar in the Scottish Highlands. The moonlight fell on the handsome face and showed the same auxious expression my own had worn during the past weeks The man seized the doctor by the arm, apparently asked some eager question, to which he received an affirmative answer and then disappeared.

"I never saw her but once more—A month later—I had nursed by darling back to health-when, coming tack from a short journey to London, I saw a carriage driving rapidly away from my gate. There were only two occupantsmy wife and her bypsy lover. Instinctively I rushed towards them and seized or es by the bride. Then a den thish, followed by a report, and the bullet intended for my heart buried itself in my lungs.
