Bringing Them to Time.

Although part of the Reform press still insist that the National Policy has proven a failure, the facts do not bear out their assertions. If they cannot realize that this Policy is benefitting, or will ultimately largely benefit this coun. try, then they are greatly behind our friends in the United States, who clearly see that such is the case, and that it He leaves a widow, son and daughter to is being done, at their cost. The finential banker writing to Hon George Brown, urging that gentleman to exert his influence in favor of a commercial union between Canada and the United States. It would certainly be a very desirable thing to have free trade be tween the American people, but there are many other matters to be considered in connection therewith. The action of the Philadelphian banker shows which way the wind blows,-if nothing else. It shows that the Canadian market is considered of great advantage to the United States, and that when the North West is settled, the manufacturers across the lines, would like to have the contract for supplying the inhabitants Reciprocity Treaty would suit Canada far better than a Commercial Union, and there is no saying what our neighbors will next propose. Previous to the introduction of the National Policy the Canadians were supposed to just calmly submit, and be thankful that it was no worse. But it now appears that Canadians can retaliate with high duties, and the dose proves a very unpleasant one
