treasury. ---The following letter was lately addressed to the wife of a French Prefect who had taken a part in carrying out decrees against the re-ligious orders : "Madame la Prefecte, for the past six years we have washed the linen of the prefecture; we were glad of it; we had need of the money is brought us. ---Edwin Booth says that the most genuine compliment he ever received was on the occa-sion of the playing *Iago* for the first time at Grass Valley, then a new mining camp. The audience, who had not seen a play for years. were so much incensed at this apparent vilainy that they pulled out their " shooters" n the middle of the third act, and began blazing away at the stage. Othello had the tip of his nose shot off at the first volley, and Mr. Booth only escaped by rolling over and over up the stage and disappearing through

a trap door. A speech from the manager calmed the house; but even then Mr. Booth thought it best to pass the night in the theatre, as a number of the most elevated spectators were making strenuous efforts to nduce the Vigilance Committee to lynch ' the infernal sneaking cuss."

-It would be well if theater-goers generally possessed the cool head of Gen. Canrobert. A play was once being acted in a temporary

theater, constructed of wood, in the camp of Chalons. The house was crammed to suffocation, when a cry of fire made itself heard Instantly every one rose and a stampede more dangerous than fire would have commenced, when Canrobert, who was in one of the bexes with his wife, cried out in a ringing voice. " Let every one stay in his place." The olaiers immediately became motionless, and

the Marshal resumed : " Let every one go out quietly in order, the younger soldiers first, then the older, after them the non-commissioned officers, then the officers, the highest to go last." In a few minutes, though it was no false alarm of fire, the theater was empty without a single man's toe being trod len on. The Marshal and his wife went last.

-The importation of American salmon into Europe is causing trouble among the tishermen in some districts of Germany. They have been accustomed to supply Metz. Stras

burg, Brussels and other cities both within and beyond the borders of the German empire with all the salmon (home-caught) needed by them, and upon this trade they have been lependent for a meagre living. The Ameri can fish, caught in enormous quantities and put up with all the best appliances, now comes into the European market at a much lower price, and seriously disturbs the business of the German fishermen. The competition has already reduced the price of the German salmon nearly one half. At the same time American grain is troubling the farmers o Austria, and American lard, beef and cheese are causing more or less disturbance else

where. It is more than probable that pro tective tariffs will be resorted to for the purpose of making competition in these various lines of production possible at living prices.

A TERRIBLE DEATH.

NEWMARKET, Jan. 18 .- About four o'clock Sunday morning, the farm house and pro-perty of Mr. W. Stoddard, one mile west of Bradford, occupied by Mrs. Anson, was hurned o the ground. The eldest son was aroused from brought from an adjoining chamber. his sleep by a feeling of suffocation, and dis-covered the room full of smoke. He immediately awoke his brother, and rushing into heir mother's room, found her standing on the floor enveloped in flames. When they aucceeded in dragging her to the open air the flesh was literally roasted on her. Bare-footed and bareheaded the sons carried their dying mother to the residence of Mr. Stoddard, a distance of 300 yards. She lingered for 16 hours in great agony, when death terminated her sufferings. The two sons were terribly burnt and frost bitten. The fire is supposed to have been caused by a tramp, who, after lighting his pipe, threw the match among some shavings.

-An enterprising burglar has been caught a flagrante delicto by the Warrington police, in England, summoned in hot haste to arrest the offender by the alarmed occupants of a provision shop. The burglar awoke the sleep-ing inmates by the noise with which he carried on his depredations, smashing the glass and knocking about the jam pots in a manner for eign to the professional housebreaker. The master of the premises, armed with the fireirons, accompanied by his wife, determined to cut off all means of escape, pending the ar-rival of the police. The surprise of all present may be imagined when, on a light being procured, the burglar, in the shape of a monkey, was discovered gorging himself with sweetmeats and cakes amid the ruins of broken glass and crockery.
