-A London publishing house has decided upon an experiment which should succeed. London managers run eagerly after the plays of modern French dramatists ; why, then, should not the English public welcome trans-lations of the best French novels ? Care, of course, will have to be bestowed on the selec tion, and this publishers recognize. At present, with the exception of Dumas and Hugo, the works of French novelists are but little known in England. We do not see wh English novel readers, unacquainted with the called Beekonsfield. are married fractionally, now a small fraction, then a large fraction. Very few are married totally, and then only, I think, after some forty or fifty years of gradual approach and experiment. Such a large and sweet fruit is a complete marriage, that it needs a very long summer to ripen in and then a long winter to mellow and season. But a real happy marriage of love and judgment between a noble man and woman is one of the things so very handsome that, if the sun were as the Greek poets fabled, a god, he might stop the world in order to feast his eves with such a spectacle.
