Further Extracts on Forests.

We this week give further extracts from Mr. Phipps' work on the necessity of Preserving and Replanting Forests.

It is frequently said, "Ontario has plenty of forests; there is yet fifty per cent remaining; let us attend to more important affairs."

Truth says: "There has been an agitation commenced with a view to bring the whole of the telegraphic system of the country under the control of the Canadian and United States Governments."

We are glad to learn the cholera in Egypt is diminishing, and the recoveries increasing. The collapse of the native administration led to the organization of a sanitary board that was virtually under English control.

Grip says: "Our sympathies are entirely and enthusiastically with the telegraph strikers. As we have often stated before, we abhor monopolists of every grade, and especially such heartless, money-blotting grabbers as Jay Gould."

The Ontario Boundary question should be settled. It is said business is suffering, and that the development of the resources of the country is hindered.

The Warton Echo says: "Some of the boys and girls who parade the streets at 10 and 11 o'clock at night, ought to be caught by their parents, well spanked, and put to bed."

The West Northumberland and East Elgin election petitions were brought up on Monday last, at Coburg and St. Thomas respectively.

FOR THE HERALD.— Though some of the following incidents may be amusing, and though they may not be regarded as altogether compatible with the pursuits of Art and Science, yet no one who knows anything about the life of a student, or considers how necessary a little relaxation is to his welfare, will be inclined to be severe on a man who—even while keeping his terms—indulges now and then in some harmless frolic.

The student, in his voyage, is sometimes favored with placid waters, fatiguing gales, and azure skies, but now and then he finds himself in the caves of the Cyclops. He is occasionally taken to the summit of Olympus to dwell in heaven amongst the gods, but he is also led down the faciliis descensus Avernii, and should he be so fortunate as to return, he perhaps finds his great heart betrayed with suitors from amongst his former friends and companions.

A Midnight Tragedy.

A YOUNG MAN SHOT THROUGH THE HEART BY A DRUNKEN COMPANION.

At about half-past eleven Tuesday night residents in the vicinity of York street were startled by the sharp ring of a pistol shot, followed a few seconds after by three others in quick succession.

The dark news soon spread that a terrible tragedy had been enacted at the corner of York and Pearl streets, and in a few moments a surging and excited crowd gathered round the place.

When it was learned that a young man named Jas. Marooney was shot dead by a companion with whom he had been having some words, from the statement of a man named Knowles, who was a spectator of the affair, it appears that Marooney had been walking down York street in company with two or three young men and a person who gave his name to the police as Charles Andrews.

He and Andrews were engaged in a seemingly quiet conversation until they arrived near the corner of Pearl street, when it suddenly rose to an altercation, in which Marooney was heard to say, "Well, you mustn't take any more liquor to-night," or words to that effect.

Almost immediately after the two closed in a scuffle, in which the aggressive was taken by Andrews. Marooney being much the heavier of the two, soon threw his opponent down, when immediately the latter drew a revolver and fired with deadly aim, the bullet passing through Marooney's breast near the heart, and coming out immediately below the left shoulder.

The wounded man staggered a few paces to one side, threw up his hands, exclaiming, "I'm dead," and fell over a corpse.

The Constable Cuddy, who was in the vicinity, hearing the report at once ran towards the spot, and on reaching the corner he saw Andrews running at full speed westward along Pearl street.

With catarrhs, coughs, and influenza everywhere abounding, it should be universally known that Holloway's Ointment, diligently rubbed upon the chest, checks the worst assaults of these maladies, and securely wards off more grave and dangerous diseases of the throat and lungs.

THE truth of this assertion must remain unquestioned in the face of thousands of unimpeachable living witnesses, who have personally derived the utmost benefit suffering from this treatment when their present sufferings were appalling, and their future prospects most disheartening. Both remedies act admirably together.
