TESTIMONIALS.

Messus R. S. Williams & Son's

General Barriage I have much pleasure in testifying to the great excellence of your Pianos. I have not them severely to the test, and find them possessed of those qualities of tone and tauch so acceptable to the true musician and lower of classical music—a charming singing tone, easily graduated from the most delicate plants into to every degree of loadness and fulness, and a touch which answers readily to every shade of feeding.

I consider these instruments a great acquisition in musicial society, and am much pleased at finding a piano which I can recommend with perfect confidence.

I am, Gentlemen, yours very truly, CHAS W. EWING, (Of Landon, England.)

Messus R.S. Williams & So's — Toronto, Nov. 4th, 1882.

O'STE—Having the outfile examined the Workmenship of your Fignor. Nov. 4th, 1882.

I can only speak in the same girls terms regarding their musical quadrities; for their fine full single quadrities to tone, pleasant touch, &c, are such, that there so must be no necessity to purchase Tamiglat to hear that the extensive sale of your instruments, when our bonne enterprise cur produce such Pianos, and at one-third less cost. I amiglat to hear that the extensive sale of your instruments shows that you are meeting with the success that I think you justly deserve. success that I think you justly descrive.

I am, Gentlemen. Your Obedient Servant,

AN OPINION AND ITS BASIS.

medical men, have greatly extended their ravages of late years, and assumed a more malignat form. Be that as it may, there can be no doubt that such disorders prevail most eminent medical men. One of their worst features is that they paralyze industry of the busiest seasons of the year, and, if fore trusted to dangerous curatives, and entirely upon this powerful yet harmless vegetable remedy.

We state these facts, derived from competent sources, as matters of general inter-

CATARRH-A NEW TREATMENT,

CATARRH—A NEW TREATMENT.

Perhaps the most extraordinary success that has been achieved in modern medicin. has been attained by the Dixon treatment for Catarrh. Out of 2,000 patients treated during the past six months, fully unively per cent. have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent. of patients per senting themselves to the requiar practitioner are benefited, while the patent medicines and other advertised cures never record a cure at all. Starring with the claim now generally believed by the most scientific men that the disease is due to the presence of living paresites in the tissue. Mr Dixon at once adapted his cure to their extermination—this accomplished, he claims the Catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four years ago are cures atill. No one clse has ever attempted to cure Cetarrh in this manner, and no other treatment has ever cured Catarrh. The application of the remedy is simple, and can be done at home, and the present senson of the year is the most favourable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should or treespond with Messrs A H DIXON & FON, 3.5 King street, west, Toronto, Canada, and enclose stamp for thoir treatise on Catarrh.—Montreal Star.
