The Horrified People Burn the Woman

Alive. A Savannah, Ga., despaich says: The full account of the Tatnall county canniba affair is as follows: A few days ago some of the colored peop's in the lower end of the county held a pionic. They had engaged as cook and general overseer of the outinary department an old negro woman. Great preparations had been made for the feativi ties and the sport ran high. It was a hurgry band that gathered for dinner and awaited the summions. It was served as last, and the merry-makers fell to with a will. Hardly bad the edibles begun to dis appear, when a strange but hell upon the boisterone group; one had been served to a piece of meat that clung to a small-jointed toge. It did not look like anything he had ever seen come from a fryingpau before and he showed it his neighbyr. The other looked at it attentively for a moment "It is the figer of a child," he said.

There was a sensation which quickly spread into a panic. A heaty examination of other plates was made. More flogers were found, and pieces of meat that were evidently human flash were held upon forke and gazed at by the now thoroughly excited negroes. They gaz d at each other in a frightened way, and then there was simultaneous break for the cabin, in which the cook had prepared the meal. She met them at the door, brandshing a large knife. A wild light—like that of a mantao—gleamed from her eyes. The cow pansed as the knife was flourished over their heads, all but one, a woman, who rushed forward with a shrick, "My child what have you done with my child? There was no answer from the old coos. "I left it here in her charge," cried the excited mother, appealing to the frient-about her. "Where is my child? She has killed it." With flendish yells the dusky army, fired by her agonizing cries, bore down upon the cook and in spite of her frantic struggles tore the knife from her grasp. Evidence of the murder were abou-them, there was blood on the floor and the table was smeared with it. The living child was not here to be seen but in it-place was a portion of a little human body which had been taken from the oven Pieces of flesh had been carved from it. The excitement among the searchers was of the wildest kind. They tore everything of the wildest find. They tore everything to pieces in the cabin in their fury. It was plain enough that the old woman had murdered the child there, and had cooked half of the body. Where was the other half? There were drops of blood across the floor. Since one, less excited than the rest, followed the tell-tale trail. It led to barrel just outside and behind the shanty A shous informed his companious that the missing portion had been found. They rushed out to find him pulling it from the barrel, where it had been salted down Then there was a general cry for vengeauc. and the free z ed shouts rang through the trees. Some suggested lynching, but there was no rope. Others wanted to back her in pieces with the same knife that took the life of the listle child. Still another crise "Burn her!" and the ory was taken up and repeated until all in the excited crowd were crying "Burn her! burn her!" She fought like a wild beast. She crouched and savingsled, and used her teeth and hands But her captors were too many to cope with successfully, and she was led out to the slaughter kicking and shricking. They dragged her to a tree and bound her tightly to it. Then they heaped brush second her and fired it in a dezen places A circle of fire surrounded her, and from the midet of it the begged for mercy one moment and shrinked her impressions the next; and around her stood the excited negroes watching the flames as they scorobad her fish and seized upon her clothing and enveloped her in a sheet of fire. It was a rocue too terrible to paint, but not one of them took their eyes from

ARGYLL'S CHOFFERS.

The Boycott and Agitation the Cause of the Trouble.

AT LEAST THE DUKE SAYS SO.

A London cable says: The difficulty with the crofters at Tiree is assuming au acute shape. Military preparations are being made to reduce the island to obedi-ence. Mr. MacFarlane, the crofter memper who was defeated at the late elections his morning attacks the Dake of Argyll as responsible for the trouble at Tires, by consolidating small holdings into great farms, thereby doing great injustice to the islanders. The Duke has written a brief letter, which will appear in the Times to morrow, plumply contradicting the assertion of Mr. MacFarlane. The Duke authorizes the statement that the present rouble is due to the determination of the andlord of Tiree to protect one of the enants, rec. n ly a crofter, against boycot

ing by the local Land League.
The Doke states that this crofter is able to command capital enough to enable him to take over stock and cultivate a small lairy farm. The farm was held by a lamily now settled in Australia and doing well. The girl of this family wished to take the farm last year. She had so much sense that the Duke directed the farm to be set to her, but her brother, an engineer from New Zaland, persuaded her that she would do bester there. She went, leaving the farm vacant. The crofter referred to tenred to improve his condition and family by taking it. He was the brother of the League. The members of the Land League were so incensed at this step, which they regarded as likely to encourage landlordism, but they ordered a boyout and sent threat ning letters to the crotter and the Duke's sent, whose life for some time was in langer. Furthermore they displaced from position the President of the Land League a brother crofter, and insisted that the land should be broken up into small and inade quate holdings again. It is the conviction of the Duke that the local Land League wishes to prevent any hig like prosperous it velopment to the tenants in Tirre, the nope being common with Land Lesgues in Irrland and of similar organizations suroughout Soutland to attack the principle.

A landlardiam. The Dake does not expect there will be any serious attempt at armed resistance o the military force the Liberal Government has despatched to restore order.
As an illustration in regard to the condition o which the island has been reduced, in he Duke's opinion, by the operation of the Land League, he cites the case of two policemen, who being driven out of the bland a few days ago, found themselves on a steamer returning with a third person, whom they arrested as soon as the main-land was resched, the reason being not of by particular connection with the nphe southing of a ship many months ago Tiree, because no constables would enture to arrest him.

A difficult job is before the new Government in bringing about a "new reign of tww," to use the phrase made popular by the Duke's blok. The military demonstrations made against the orofters ast year, while it put a stop upon visiont ou rages, has not been so colowed up by strict and impartial administration as to secure the regular The Party Identified by a Witness-uples operation of authority on that island, consequently the pour rates have not been A Chicago de patch says: In the Anarchies trial yesterday, H L Gilmer, a painter, testified that he arrived at the H-ymarket at 4.45 o'clock. The impor tance of the Tiree troubles, in the mind he Duke, resides in their representative character, as they simply give local expres aton to the general disturbance of ideas broughout the Birish islands. Among certain classes of the population, the term and and rights of property in land-looked at from this point—are of more importance than might be inferred from the direct con usion and trouble caused by them, and the Duke is inclined to attribute them less t any suffering or distress among the people ban to the spirit of agitation on thes cts such as was f mented originally in the Justed Etates and since then in Great Britain by Mr. Henry George and his fol-

A St John's, Nfld., special says : Hergenatis Yer, one of the E quimaux whi arrived here on the Nancy Berrett from Okkah, Labrador, says the population of that settlement was nearly 130, but when be left with his wife not a soul remained. Early in March the food gave out, every drop of oil and bit of seal skin was utilized, and at rare intervals bear was killed, but finally the supplies were quite exhausted. On June 3:d they had eaten nothing for six days, and goaded by hunger they feasted upon the corpses of several of the whites and a few Indians that had been killed by the cold. When one of their own party died the body was cut open, the entrails were taken out, and the remainder was frozin up for use. From this food territle dysentery set in among the survyors, and on July 7th there were but sixteen persons left alive. The bodies of over teen persons lett alive. The bodies of over twenty-five were eaten. The sixteen survivors started down the coast in aledges drawn by four dogs, the only living creatures left them. The polies had been sacrificed to appease hunger long before. # THE DEADLY PICNIC.

Fifty People Polsoned at a Nova Scotia

Picnic. A last (Friday) Light's Halifax despatch caye: Tremendous excitement was created in the city this evening by reports, that -pread like wildfire, of the wholesale poisooing of a ricuic party at McNab's I.land, a pleasure resort down the harbor. The picnic was one held by the Band of Hope, a javenile temperance organization, and the attendants numbered probably about 1 200, ucluding about 300 small children. About children began to take sick, vomiting and omplaining of cramps and pains through mable to move their limbs, and had to be carried to a neighboring cottage, where a O here took to the woods when their illuess came on, and remained there ustil the steamer returned to the city in the evening All suffered serribly, some of them contin-ning ill all the afternoon and evening, and being unable to move; and many of them vere at first rendered unconscious. Owing to the sensation caused amongst the pic nickers by the affair, and the confusion which followed, it is impossible to obtain a full list of the people affected, but it is beieved the sufferers numbered fully fifty No fatal results are anticipated through the potenting. It is not known what was ascribing it to diseased meat, others to ice and others to the water. Some people who partook both of the beef and the ice-cream, however, were not at all affected, while in some cases those who ant by them at the same tables were taken violently ill an hour later. The extraordinary affair completely destroyed the success of the piccic when it was only hal over, everybody becoming greatly excited and crowding about the sick people in alarm. Only two of the persons affected were able to walk to their nomes after returning to the city, the others being driven off in carriages. Most of those wio were ill were grown up people, only three or four of the small couldren making any com laints. The bast served to the picnicker ad been tooked on Tuesday for day, but the picuic being postpone lit was preserved on ice until to day.

# A ROMANTIC STORY.

Lovers Divided by the Franco Prussian War United at Last.

A New York despatch says: Mayor Whitney, at his fice in Brooklyn, married to day Herman Krauz and Anna E chencach. Pussian war medals decorated the groom's breast, and something unusual about their demeanor led to questioning which developed a remantic story. Herman and Anna lived at F iederichetadt, on the Rhine, and he was 18 years old when the Franco-Prossian war broke cut. He marched (if to fight for the vaterland, and his sweetheart rode after him in one of the waygons of the Red Cross Hospital corps. An G avelonte a fragment of shell struck Herman, and when the soldiers came round after the battle to bury the dead he was pu into a shallow pit with twenty or thirty other bodies. Grief at the news of hideath drove Anna out of her mind, and wandering on the battlefield, she sought the pit in which he had been buried and dug out his body. Soldiers came upon her and forcibly carried her off to the hospital where she was sent back to Germany, but they did not bother to reinter the body beavily and Herman was revived by it. He was nursed back to life, but a portion of the skull pressing upon the brain made him incase. Anna recovered her reason, and shinking him dead came to live with her ather in America. Last fall a celebrate German doctor examined Heiman, and, by trepanning, res ored him to reason. He made it quiries about his betrothed, and. discovering her location in Brooklyn, to her and learned that she was free and loved her still A week ago he reached America, and to-day's wedding ends the story for the present.

The Perilans Voyage to Land of Two Gloucester Fishermen.

A St. Pierre, Que., despatch says Harvey Daley and Jaremiah Smith, two seamen belonging to the schooner Frederick Garing, of Gloucester, Mass, while fishing on the Green Bank, got adrift in a dory during a thick fog and stormy weather. They lay around twenty four hours hoping to find their vessel, but, abandoning that hope, they decided to pull to the northward for land. After four and a half days, strengthy exhausted, being without food or water, they sighted and got on board the marketo K nuck, and Bourbou whiskey. terribly exhausted, being without food or water, they eighted and got on brand the French fishing schooner Eitza, anchored on the St Pierre Bank. They passed thirty. six hours on the achooner, and after ecuperating obtained food and water and took to their cory again, and after five days eached Lamaine. There they were provided with lodging by a fisherman of the district and brought to St. Pierre to-day, safe and cound.

pricking letters from Persia were not relished by the subj-ore of the Shah, is back again in the United States, and one of his early calls after his arriva in New York was at the office of the Turf, Field and Farm, where he got his first tessous in incestive journals m. The Persia of reality is far different from the Persia of romance and imagination. It is a land without roads and without civilization. The rough bridle paths speak unmistaka. bly to the tourist of a non-progressive people. The saddle is in general use, and the best horses are the Arabs, and after them come the Turcomans. Some of the them come the Turcomans. Some of the latter attain to great size, and are used by the rich for display. The average Turcoman is a first and hardy horse, capable of going from 100 to 150 miles without rest. He is educated to get along with very little water, and to subsist on balls if highly concentrated food, the two principal ingredients of which are suet and barie; fluir. When the master contemplates a raid, he gradually reduces, for a period of thirty days, the food and water allowance of the bore, the food and water allowance of the horse, and thus inures it to privation. Grass does not grow in the vicinity of Teheran and the principal food of the horse is and the principal rood of the horse is barley, exc-pt for two months each year, when the daily ration is of herbs possessed of laxative properties. Outside of the gates of Teheran is the race-course, the longer circuit of which is about five milet. Only one meeting is held each twelve-month, and is at the beginning of the Persian New Year, the opening of spring. Arabians. Turcomans, and a gross hetween Arabians, Turcomans, and a gross between the Cossack and Turcoman compete, and the chief race is five circuits, or about twenty-one miles. Mr. Schierbrand saw the distance run in 27 minutes 47 seconds. Either the time taken was not correct, or the winner was a wonderfully good horse. The purses were of gold and silver coins, tied up in little bigs, which were pitched to the successful j ckeys, who caught them in their turbans. No entrance fee is charged to the races, and no betting system is carried out. About two hundred thousand persons cheered the contestants the walls of the city being dense with people. The outer walls overlook the course, and from them the spectator gets a grand view of the horses. The Shah witnesses the sport from a pavilion, as do

witnesses the sport from a paylion, as do also his efficers and members of the different legations. The jockeys are mainly boys, but sometimes a heavy weight, a full grown man, acts as pilot. The Arab from Bagdad is prized more bigbly than any other breed of horses. The ordinary saddle horse has an early striking degree. The tourist has to use the lash freely to make any kind of speed between the rude stations which mark she course of the rough bridle paths.—Turf, Field and Farm.
