July Wide Awake.

The July Wide Awake has many strong, timely features, notably two especially American. One is Miss Seward's "Fourth of July at Robert College"-the American college in Constantinople, a seed-bed of American ideas in Europe; the other is Mrs. Burton Harrison's "The Republican Coust," in which she gives portraits and charming little biographies of eighteen of the president ways who the prominent young society women who were in General Washington's circle of friends, Mrs. Washington herself leading the train. These portraits are from the celebrated Baltimore porcelains—an beir loom which ex-Mayor Hodges of that city has "founded" for his descendents; the eighteen plaques form the wall decoration of dining-room. "Mademoiselle Papa" is a touching little tale from the French, translated by Miss Virginia Champlin who, will be remembered, met a fate quite as sudden and terrible as death from an explosion in the mines described in this story There is a thrilling story of another French child in this number, "The Child-Knight of Boufflers," written by Madame Cramer Bernhard, a neice of General Grant 'How Patty earned her Salt," by Walter Colby, is quite a perfect little story.
"Cuck-oo!" by Mrs. Frances A. Humphrey, gives her own acquaintance of this haunting English bird. "Five Little Peppers Further Ou," the Margaret Sidney serial, relates some startling experiences of little Phronsie Pepper, at which everybody will be indignant. "Sybil Fair's Fairness," will be indignant. "Sybil Fair's Fairness," by Charles R. Talbot, is very interesting. Mrs. General Fremont writes graphically of her "Sierra Neighbors" in early Cali-fornia days. Mrs. Clara Doty Bates has a delightful contribution, the best thing in amusing verse for children which has appeared for sometime, "The Monkey and the Camel," illustrated by Garrett. There are also many other bright things in verse and picture Mrs. Sallie Joy White's "Public School Cooking," Mrs. Godard Orpen's diamond paper, Mr. Warren's "Pishing with a Bottle," Prof. Starr's "Geological Talk," and plenty of original necdotes and entertaining "short talks"

Why are they there? Paresis!
Did it come on at once? Not at all. It was a gradual but positive growth. They overtaxed nature. The drain on their vitality, their nerve powers, their brain tissue, was too great, and they gradually but surely sank under it. The things they did to bring this sad end about are precisely the same things that are being done by thousands of men and women to-day. It is not necessary to name them. They all end

not necessary to name them. They all end disastrously unless checked or regulated.

Prof. Phelps, of Dartmouth College, knew this fully when he began his experiments which resulted in the discovery of the wonderful Paine's Celery Compound. He realized that paresis (consumption of the brain) was our great National weakness. He knew that the brain and nervous system must be fortified to meet the great strains which modern life bring upon it. He saw that men were becoming debilitated and women weakened by the pressure and demands of life, and he sought and discovered the remedy Paine's Celery Compound, if rightly taken, will renew the brain and build up nerve tierness fort as they become exhausted. will renew the brain and build up nerve tissues as fast as they become exhausted. It is not a narcotic. It contains no drugs, no nostrums. It is perfectly pure. It is absolutely harmless. The high character of its discoverer guarantees this, and the indorsement of the medical and chemical professions prove it.

The Most Successful Remedy over discovered, as it is certain in its effects and does not blister. Read proof below.
