Crop reports from all parts of the Province indicate that harvesting is well advanced, and probably 50 per cent. of the out crops seems to be turning out better than had been anticipated. A second Govenment bulletin, which will be issued to-morrow, will estimate the average yield throughout the Province at 14 bushels to the acre; on this estimate the total crop will be between eight and nine million brabale.

A second crop bulletin of the Manitoba Government, issued to-day, referring to the spring wheat crop, says: "Correspondents invariably gave what in their opinion was as correct an estimate as possible of the average over their respective townships, and a careful compilation of these show that a yield of 10.8 bushels to the acre will be realized over the Province. The reports vary from 3 bushels in some townships to 35 and 40 in others. Taken by groups the eastern show an average of 14 5 bushels per acre, the southwestern 11.7, the central 15.2, and the northwestern 17.3. The counties of Souris River, Rock Lake, Turtle Mountain and Donnis have how forces here. Mountain and Dennis show how great has been the destruction by gophers. Shoal Lake has also suffered largely, but the loss has not been as general as in other places named. The average yield of oats is placed at 21.5 bushels, barley 19.3 and peas 12.5. A Military Cook's Suicide.

A Halifax despatch of Wednesday says A terrible suicide was committed at the military camp on Macnab's Island at 5.30 p'clock this morning, the victim being Private Joseph Hill, of the West Riding Regiment. Hill was engaged as cook in the officers' mess on the island, and last evening was placed under arrest for some petty offence, but was not put in confinement being what is known as a "prisoner at large." This morning he took a loaded rifle, placed the muzzle fairly in his mouth and pulled the trigger. The top of his head was blown off and the pieces scattered in various directions. The body was brought up to the city to-day. Hill was a young

ZANZIBAR DISTURBANCES.

Rioters Arrested and Flogged-Fears of Another Outbreak.

A Zanzibar despatch of Thursday says : Of the eighteen prisoners arrested yester-day for a raid on the Indian bazaar sixteen day for a raid on the indian bazaar sixteen were in the employ of the Sultan, one was in the employ of the Germans, and the other, an Arab, had no employer. Each received fifty blows with a stick yesterday, and they are lying confined in the barracks. The riot occurred between 6 and 7 in the evening, but as no police are ever on duty in the streets in the daytime, soldiers had to be brought from a distant part of the town, and these, after restoring order, patrolled the quarter until 3 in the morning. To-day there was another slight riot in the bazaar between Arabs and Banyans, and two of the latter were beaten. There is still much talk of disturbance brewing for Saturday or Sunday. The authorities should be compelled to have the streets guarded by the police by day as well as by night. The Sultan was absent at his country house when the riot occurred, and drove into town early this morning. There are only two German ships here. The Fifael and Carola have left their moorings and anchored off the German Consulate as a measure of precaution. It is reported that the German Consul has telegraphed to the German commander at Mozambique to

return with the Leipzig.

A Zanzibar cable of Friday says
The Sultan's principal adviser Mohammed

The British war vessel Mariner left for Seychelles this morning. The Cossack is expected from the opposite coast to replace her. The men-of-war now in harbor are the British Agamemnon and Griffon, the German Pfest and Cariola, the American Swatara, and also one French and one Italian. The Griffon is now moored just below the palace on the northwest side of the town, so as to be able to shell any party coming from the district called Melinde, which is inhabited by Hindees and Arabs and their slaves. If an outbreak should court it is there it will outbreak should occur, it is there it will commence, and then after the rioters have plundered the Hindees they will repair to the German Custom house and wreck it. The Agamemnon is moored off the consulate. Everything is ready on board the British and German ships to assist in maintaining order. To day the place is unusually quiet. Although it is Friday, there has been no selambik or parade of troops, the Sultan having shut himself up his country bouse. Some soldiers are in his country house. Some soldiers are on guard in the streets, chiefly in the Hindee quarter. There is almost a panic among the well-to-do Arabs, who fear an occupation. The fall of the Sultan's chief adviser has completely set aside all idea of a rising, and Zanzibar is now quiet.

Details concerning the bloodless duel beween Calhoun and Williamson, of Atlanta Saturday evening show that the affair though terminating harmlessly, really had exciting and realistic features. When the contestants and seconds reached a battle-ground undisturbed by officers it was quite dark. Japan's Future Sovereign Being Educated

According to Western Notions. His Imperial Highness Prince Haru, heir apparent to the throne of Japan, is now in his tenth year. A delicate child in his early days, he has happily acquired health was merely a midnight picnic. Capt.
Jackson, Calhoun's second, and Mr. King,
Williamson's second, met just between the
two men.

King took one pistol and Jackson the
other. King placed his in Williamson's
hand. Jackson walked over and handed
his to Calhoun. The two seconds took
their positions. The principals and seconds
formed the four corners of a square. Col.
John Seay rushed in and begged the seconds
to settle the matter and not allow the fight.

"It is a shame," he said, "to have two
such fine men stand up here and shoot at
one another." The seconds could not agree
upon a settlement, and so announced. It
had been arranged that each principal was
te empty his pistol—shoot five times. Sud
denly King's voice rang out:

"Are you ready, gentlemen?"

"Yes," answered both.

"The first shots were simultaneous. Williamson emptyied his revolver the five shots The first shots were simultaneous. Williamson emptied his revolver, the five shots being fired very rapidly. Calhoun fired only once, and then slowly lowered his pistol as Williamson's bullets were whist ling past his head.

"Are vou hurt, Pat?" some one cried. "Are you hurt, Pat?" some one cried.
"No, sir," Calhoun cooly replied.
"Williamson, did he hit you?" asked King.
"I was not touched."
Both gentlemen, with smoking pistols in their hands, stood as calm as statues. The silence was broken by the ringing voice of Calhoun.
"Mr. Williamson," he said, "I have four remaining balls which I have the right to fire at you. I now ask if you will withdraw the statement you made before the Legislative Committee?" tive Committee?"

"I will," replied Williamson, in a treats everybody, even to the lowest of clear voice, "provided you will say that you intended no personal reflection up

Her figure is tall, shapely and impressive; her carriage is a little too rapid to be entirely graceful; her costuming is—is English, which requires no elucidation. Despite deficiencies in externals, which a French modiste would have no difficulty in abolishing for War Chattan and the second secon abolishing—for Mrs. Gladstone would be a charming subject for a dressmaker of taste—she would be singled out in any company as its most distinguished woman.

The face is uncommonly long even in England, very high in the forehead, and very strong and gentle, equally devoid of romance and of pedantry. The eyes are large, liquid, well-shaped, dark blue, and meditative. The silvering hair is parted in the usual way, and combed in natural flection."

Capt. Jackson interrupted with:

"Mr. Williamson, have you any respect for me as a gentleman of honor?"

"I have," replied Williamson.

"Well," said Capt. Jackson, "I say as a gentleman that I would withdraw the addresses.

"Mell," said Capt. Jackson, "I say as a gentleman that I would withdraw the addresses.

Economy in Food. Farmer Sawyer, of Wallingford, had quite an experience last winter with his cattle. His stock of hay ran out, and being unable to get more in time he gave the cows some of the dry leaves he had col-lected for bedding, and he was surprised to see that they appeared to enjoy them. The leaves went so well that he concluded that he wouldn't get any more hay for a while, "Allow me to speak to Mr. Williamson," said King, his second.

King approached Williamson and, while talking, began to examine his revolver. Capt. Jackson approached quickly and asked what that meant. "I am simply examining Mr. Williamson's revolver," replied Mr. King, "to see if it fired all five balls."

He wouldn't get any more hay for a while, and, in fact, leaves were the only thing that the six cows and two horses lived on during the last half of the winter. While eating hay the cows had given 12 quarts of milk weekly, yielding five pounds of butter. After being put on diet of leaves the quantity and quality of milk increased until they gave 15 quarts of milk, wielding agen nouvels of butter. Mr Saw, yielding seven pounds of butter. > Meriden Republican. How to Manage a Man.

A man never stoops to the means employed by women; he is broader, more liberal, he applies himself to the things which belong to the day, the hour and the object for which we live. Whoever heard of a man losing his temper because his suit would not match his complexion, or fume houn approached and the two principals shook hands, and the party started quickly for the car. Entering the car, Calhoun said: "Mr. Williamson, we will let this that held his hosiery gave way and wriggled on the sidewalk? None! Yet I saw that happen to a woman recently. Yet men are very much like children. Humor them, and they will do your bidding. Make them believe they are always having their own way; don't let them see the silken net you have woven about them, and they will blandly obey your will; but once let them believe they are captive and no puny woman's power will avail against their superior strongth.—Marie Jansen in New York World.

His Youthful Guard. When the Shah arrived at Berlin a small boy, dressed in gorgeous garments of gold and purple, was noticed at one of the windows of the train. Nobody knew who he was, and many stories were current, but it is now stated that the little lad, who is only 5 or 6 years old, and who accom-panies the Shah everywhere, is a sorcerer from Teheran, whose presence is to guard Nasr-ed-Deen from all ills and all misfortunes during his journey.—Once a

FREDERDICK T. ROBERTS, M. D., Professor of Clinical Medicine at University College Hospital, London, England, says; "Bright's disease has no symptom's of its own and may long exist without the knowledge of the patient or practicioner and no pain will be felt in the kidneys or their vicinity." Ordinary common kidney diseases, many times unreognized as such, will become chronic and terminate in Bright's (organic)
disease of the kidney's, unless taken in
hand. Warner's Safe Cure is the only recognized specific that has ever been discovered for this disease. The late Dr. Dio

Lewis said, over his own signature: "If I found myself the victim of a serious kidney trouble, I would use Warner's Safe Cure."
