LATE NEWS NOTES

Foreign Matters of Interest Briefly Told. News to Interest the News Hunter. Herr Scholz has been appointed German

Minister of Finance. The name of the new Bulgarian Minister of the Interior is Soboleff, not Skoboleff.

It is reported in Berlin that the Emperors of Germany and Austria will meet at

Dr. J. Marion Sims has received from the King of Spain the decoration of the order of Charles III.

The Spanish Government will propose a vote of 150,000,000 pesetas for the reconstruction of the Navy.

A Vicksburg, Miss., cow stuck her tongue through a lattice work and a vicious mule bit off feur inches of it.

The Sultan has presented Mr. Wallace the United States Minister, with a painting representing a Turkish girl. Mr. Wallace has not accepted it.

The French Chamber of Deputies has voted a grant of 19,000,000 francs to defray the cost of the expedition to Tunis during the second half-year of 1882.

A colored man, while ploughing near Opelousas, La., a few days since, struck a ten gallon jar filled with Spanish silver coins of date of 1779. The amount is estimated at \$8,000 to \$10,000.

A rebellion has broken out in Muscat against the Imaum. The movement is headed by the Imaum's brother. A British man-of-war has proceeded to Muscat to protect British subjects.

The resident population of Great Britain in the middle of 1882 is estimated by the Registrar-General at 36,280,299 persons; that of England and Wales at 26,406,820, of Scotland at 3,785,400, and of Ireland at 5,088,079.

The Russian Generals Colbass and Skobeleff have arrived in Sofia. The former will be appointed Minister of War and the latter Minister of the Interior. It is reported that the whole Bulgarian Cabinet will be reconstructed.

Venice and Amsterdam are the cities of bridges. The first has 450, the last 300. London has 15, Vienna 20, and Berlin will soon have 50. Altogether the most beautiful and striking bridge in Europe is that over the Moldau at Prague.

At a meeting of holders of Virginia bonds in London, it was decided to address amemorial to President Arthur, drawing attention to the facts attending the repudiation of the obligations of the State of Virginia by its Legislature and praying the assistance of the Federal Government.

The New York Telegram has the following: Irkutsk, July 5.—Have just returned from Yakutsk with Berry, Gilder and Melville after a journey of twenty-lour days. We missed Harbor between Olekinan and Yakutsk. Ensign Hunt, of the Rogers has gone to join Harber. (Signed), Jack-

Two Uhlan officers found distributing revoluntionary proclamations in St. Peters-burgh were arrested. They were among those specially charged to protect the Emperor. M. Tolstoi, who has been threatened, is constantly guarded. Additional precautions have been taken at the Peterhoff Palace.

THENIHILISTS -According to good informa tion, Dr. Weimar, who was sentenced to exile to Siberia, is still in the fortress St Peter and St. Paul, in St. Petersqurg The authorities lately have shown nuch anxiety concerning the safety of the ground underneath the fortress and cathedral of St Peter and St. Paul, in which are thesbmot of the Czars.

The Times says it is also informed that Egyptians of good position have petitioned the sultan and the powers, through Dervice Pasha, to restore the status quo, as the country is becoming utterly discreanized. This information, though known in seme quarters, lasfailed to arrest the downward course of Egyptian securities because of the announcement of a large fillure in Paris necess titing some forced clos as of accounts.

Little did Colonel Alexander, of Kentucky, thin when he sold his young colt Foxhall to James R. Keene for \$650, that he would prove to be the most conspicuous horse of the time by carrying off the great racing prizes of France and England. His last great triumph previous to Ascot was in July of last year, when he won the Grand Prix de Paris, at Long-champs, having as contestants Karas de Chamant's Tristan, Count Lagrange's Albion, Blanton's Scobel, Lagrange's Leon, Baron Rothschild's Forum, De Chaumot's Royamount, the Duke of Hamilton's Fiddler, Lagrange's Dublin, and Ephrunssi's Casimir. The Ascot Gold Cup is valued at 1000 guineas. But Mr. Keene is said to have won largely in addition by private

Peter Helm was menaced by a mob near Fort Wayne, Ind., twenty years ago. He had killed a popular man in a drunken wrangle, and was in imminent danger of being lynched. He had summoned John L. Farrar, a lawyer, but the crowd was inclined to hang the prisoner without listening to his counsel. In this emergency Farrar drew his client aside as if for consultation, and then advised him to run for the woods, which were close by. Helm did so, and was not caught. The lawyer got no fee, and narrowly escaped vicarious lynching. He never heard of Helm again until recently, when he received a letter from Mexico containing a draft for \$500, with the information that the fugitive had become a successful coffee planter.

The doctors who have examined Guit teau's brain report that lymph was found in it, and the enveloping membrane was not healthy. But the brains of lunatics have been found to be perfectly sound to all appearance, and those of persons reputed sane have been found to be in a more or less diseased state. So that the autopsy is not likely to prove anything conclusively, either for or against Guitteau's insanity There is only this to be said, that if the brain had belonged to a person whose acts in life had been entirely unknown, the chances are than none of the doctors, taking the indications at their worth, would be positive that the person was sane, while they might really admit the probability of his in-

AN ODD OCEAN STEAMER

No Masts, the Deck Covered with a Dome, and to Cross the Atlantic in Six Days.

A dome-covered and mastless vessel is being built at Nyack at the yard of James E. Smith, for the American Quick Transit Steamship company. It is the invention of Capt Moreland, for forty years connected with the Cunard line. She will be launched about the middle of July, but, as it will take at least a month to put in her boilers and machinery, she will not be ready for her trial trip before the latter part of August. If she realises the expectations of her inventor she will be put in the West India fruit trade, and other vessels will be made for the freight and passenger translantic service. All of her timbers are in position, her planking is about completed, and a large force of men are hurrying forward the work. The best materials are used, and she will be stronger than the ordinary vessel to sustain the strain of her engines, which will be double the usual

The vessel is 150 feet long, 21 beam, and 16 extreme breadth. She is sharp forward, and has a long, clean run aft. The speed promised is about twenty-five miles an hour, so that the voyage across the Atlantic may be made in less than six days. The model is different in every ir portant respect from the ocean steamers now in use. First, she has about 33 per cent. more beam, and instead of the straight sides going deep down into the water, there will be a graceful rise from the keel to the load line. It is claimed that the hull will be more stable without ballast than the present type of vessels. The "turtle back" or dome deck, is a distinguishing feature as it will afford enlarged space on passenger vessels for saloon accommodation, and on freight vessels for the comfortable housing of cattle. It can be used as a promenade-deck in fair weather. The whole upper deck will thus be covered in, and the space usually exposed to the weather will be entirely utilized. It will thus be light, airy, and well ventilated. Abaft will be the main saloon, a spacious apartment, furnished in mahogany and black walnut. Large state-rooms will open from the main saloon. Directly forward of the main saloon will be the engine-room, then the mess-room and officers' state-rooms. Still further forward will be the quarters for the crew. Greater safety is claimed for the turtle-back; it will tie the vessel's sides together, thus making her stronger; no sea, no matter how large, can strike at right angles, and the concussive force from boarding seas is avoided by the perfect shedding of them on the curved surface. The wheel-house, smoke-stacks, ventilators, and flag and signal staffs, will be the only things rising above the upper decks. There will be no spars or masts. Among the advantages claimed are the absence of all top weight, which strains the ship in heavy weather, the avoiding of a great out-lay for sails and rigging, and the dispensing with a large crew of practical sailors. Another claim is that, in a straight course of the ocean, taking the wind as it blows, the atmospheric resistance against the spars, masts, and rigging of a vessel driven by steam power is so great that the gain by their removal will more than compensate for the loss of the advantage of sails in a favorable breeze. To meet the emergency of derangement to the main shaft, screw, or machinery at sea, a pair of auxiliary screws are placed one above the other in the deal-wood just forward of the main shaft and screw. When not in use, they will be inclosed by large shutters flush with the wood. It the ordinary steering apparatus should become disabled the arrangement of these shutters is such that they can be used as a sort of double rudder, one for port and one for starboard. -New York Sun.

CALIFORNIA LIONS.

Driven by Hunger, they Make Raids on the Pioneers' Farmyards.

For some time past, during the winter, California lions have been numerous in the mountains above West Point, causing considerable annoyance to the farmers of that neighborhood raids then young stock and their poultry, and became even bold enough to follow teams for some distance. Three of the animals have been killed there during the winter.

A Mr. Haynes, a well-known pioneer, residing on a ranch about six miles above West Point, was on his way home from town recently, and on reaching the ranch of Dee Ham he observed a huge lion in Mr. Ham's pasture after his calves, and not 200 yards from his residence. Mr. Haynes having his gun with him, opened fire on the animal, but without effect, the lion disappearing into the depths of the thick woods. The next day some mining experts were in a carriage on their way to examine a mine near the same place, and on looking back beheld two of those animals following them at no great distance behind. Mr. Ham was informed of the fact, and, arming himself, started in pursuit, with his dogs, but without success. A few days later Mr. Haynes observed one of these animals in his orchard. not far from the house. Haynes started with his rifle and dog in hot pursuit, and came upon the lion, who refused to retreat, and with glaring eyes and open mouth showed a determination to fight. Raising his rifle, a well-directed shot lodged a bullet in the animal's mouth, which only infuriated the beast, and, had not the dog rushed in at the time, the consequences to Mr. Haynes might have been decidedly serious. While the animal's attention was now turned to the dog, Haynes succeeded in getting another shot and put a bail through its body, when the dog laid hold of the lion

and a savage struggle ensued.

But it soon became evident that the dog, although a powerful one, was far from being a match for his adversary, and though twice wounded, the lion would have made quick work of the dog but for a timely ball from Haynes' rifle, which finally did the work. The animal measured seven feet in length, and, although emaciated, weighed nearly 200 pounds.

An impetus man at Winona. Miss. failing to coax a girl to elope with and marry him, lassoed her as she was going to church, and was dragging her towards a Justice's office when succor came.

Dr. Schliemann at Hissarlık.

Dr. Schliemann is carrying on new ex cavations at Hissarlik with the assistance of two eminent German architects. No fewer than 150 workmen are daily employed in laying bare the foundation of the ancient cities. Two perfectly distinct cities have lately been discovered in the burnt stratum, the lower one resting on the large walls which have hitherto by mistake been attributed to the second city Hissarlik now turns out to have been the Acropolis of this lower burnt city, this being proved by the walls and the pottery, as well as by two vast brick buildings, on of them 43 feet broad by 150 feet long, the other 23 feet broad by less than 100 feet These buildings seem to have been temples, a separate gateway, flanked by enormous towers, leading up to them. There are besides three or four large buildings, apparently dwelling-houses, but no smaller buildings. The city walls now that during the contract of the city walls now that during the city walls now that the city walls now the city wall now the city walls now the city wall now the city walls now the city wall now the city wall now the cit stand out very imposing. They rest on a substructure of large blocks, 33 feet high, afterward superseded by great brick walls All the treasures formly found by Dr. Schliemann are now ascribed to the first burnt city. Dr. Schliemann has found in the temples copper nails of a very peculiar shape, weighing from 1,000 to 1,190 grammes. The second burnt city, being the third city from the rock, and hitherto identified with the Homeric Troy, turns out to have had but very small houses and no lower town at all. Dr. Schliemann will continue his excavations until the middle

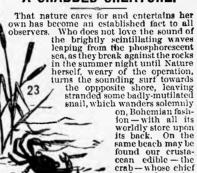

If a few more women will just invent a few more medicines and have their portraits published with the advertisements thereof, the daily paper will soon look like a photograph album.

of August, and is unable to present himself

at Oxford, where he was to have received

ad honorary degree at the forthcoming commemoration.—London Times.

A CRABBED CREATURE.

the oppposite shore, leaving stranded some badly-mutilated smail, which wanders solemnly on, Bohemian fashion—with all its worldly store upon its back. On the same beach may be found our crustacen edible—the crab—whose chief apology for existing at all seems to to be its ability to furnish a delectable meal to fortunate bipeds. The crab being covered with a hard, impenetrable shell, it is not easy to molest or make him afraid; therefore he wages war in his water world unceasingly when once attacked. Althoughtiny, he cannot be said to be devoid of understanding, having ten legs to assist his locomotion; this, however, avails him little, for, when conquered, he never turns his back to his enemy, starting into a bold run, but, like many politicians during election time, slips off sideways. There comes a time in the life of this pugnacious fellow when the years bring him more bone and muscle than he can dispose of with comfort, and he finds himself in a very tight place; his shees pinch him and he begins to realize the practicability of applying to Dame Nature for more room or a house in proportion to his increasing size. Nature slowly responds to the call; but in her own good time provides a new home, so that the enterprising little creature does not wander about homeless, but is provided for suitably, as was the old sailor, who dropped his rheumatism and crabbedness when he applied the Great German Remedy, St. Jacons Oh. This last, however, may sound rather fishy to the skeptical reader, and to such we would reply in language too plain to be misunderstood—in words illustrating facts that even the waves of time cannot wash away or scaly epithets affect. St. Jacons Oll. to-day has rendered the lives and homes of myriads of sufferers brighter than ever the electric light eam, which people pause to admire along the way. Still more happily served than the old sailor was an invalid, who wrote thus concerning his case:

"CROOKED HAERTEL."

"CROOKED HAERTEL."

Accept a thousand thanks for that "golden remedy." I suffered for many years with rheumatic pain in my limbs. My legs were drawn together, and people called me "Crocked Haertel." I used St. JACOBS OLL and was cured, and now feel so well that I think I could dance, as in my young days. JOHN HAERTEL. Fremont. III.

 ${f WHAT}$ IS CATARRH ?

WHAT IS CATARRH?

Catarrh is a muco-purulent discharge caused by the presence and development of the vegetable parasite ameeba in the internal lining membrane of the nose. This parasite is only developed under favorable circumstances, and these are: morbid state of the blood, as the blighted corpuscle of tubercle, the germ poison of syphilis, mercury, toxemea, from retention of the effeted matter of the skin, suppressed perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal lining membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces or back part of the mouth, causing ulceration of the throat; up the enstachian tubes, causing deafness; burrowing in the vocal cords, causing honyseness, usurping the proper structure of the bronchial tubes ending in pulmonary censumption and death.

To effect a cure the parasite must be removed or destroyed hence inhalants and snuffs are worthless.

Some time since a well known physician of 40 years standing, after much experimenting, succeeded in discovering the necessary combination of ingredients, which never fails in absolutely and permanently cradicating this horrible disease whether standing for one year or forty years. Sufferers should, without delay, communicate with the business manager, Mr. A. H. Dixon, 307 King St. West, Toronto, and get treatise free by enclosing stamp. Ask your druggist for it

Ayer's Sarsaparilla, For Purifying the Blood.

This compound of the vegetable alteratives, Sarsaparilla Dock, Stillingia, and Mandrake, with the loddes of Potash and Iron. makes a most effectual cure of a series of complaints which are very prevalent and afflicting. It purifies the blood, purges out the lurking lt purifies the blood, purges out the lurking lt purifies the blood purges out the lurking and settle into troublesome disorders. Eruptions of the skin are the appearance on the surface of humors that should be expelled from the blood. Internal derangements are the determination of these same humors to some internal organ, or organs, whose action they derange, and whose substance they disease and destroy. Ayer's Sarsaparilla expels these humors from the blood. When they are gone, the disorders they produce disappear, such as Uterations of the Liver, Stomach, Kidneys, Lungs, Eruptions and Eruptive Diseases of the skin, St. Anthony's Fire, Rose or Erysipelas, Pimples, Pustules, Blotches, Boilts, Tumors, Tetter and Salt liheum, Seald Head, Ringworm, Uters and Sores, Ricumatism, Neuralgia, Pain in the Bones, Side and Head, Ringworm, Uters and Sores, Ricumatism, Neuralgia, Pain in the Bones, Side and Head, Ringworm, Uters and Sores, Ricumatism, Neuralgia, Pain in the Bones, Side and Head, Ringworm, Uters and Sores, Ricumatism, Neuralgia, Pain in the Bones, Side and Head, Remale Weakness, Sterility, Leucorrhæa arising from internal uteration and uterine diseases, Dropsy, Dyspepsia, Emaciation and General Debility.
