#### SEENTIFIC GOSSIP.

Dr. Vigouroux recommends a glass of lemonade, taken as hot as possible every hour or half hour, as not only an easy and agreeable but a most efficient cure for diar-

Prof. Miall says there are to be found associated with seams of coal, and especially with the underlying shale, the flattened impressions of creatures which once had life, though at first strenuously doubted.

A well-deserved honor has been conferred on M. Cailletet, one of the two physicists who liquefied the last of the gases. He has been nominated a "Membre libre" by the Academy of Sciences, Paris, in place of the late M. du Moncel.

To preserve wood from decay and render it fairly fire proof, a solution of lime, salt, | him. und wood ashes may be applied. Enough of lampblack or yellow ochre may be added to impart color if desired. For light fences or small wooden structures it ought to do very well.

New iron works will soon be opened at Kobe, Japan, by a native capitalist, who has engaged several hundred men trained at the Alabama Iron Works and elsewhere in Tokio. It is also stated that as the iron yielded by the ore of the Shimonida mine has proved itself to be of a very fine quality it will be employed hereafter for the armor of Japanese war yessels, according to instructions issued by the Naval Department.

A German statistician says that there are 3,985 paper mills in the world, and that of the 1,904,000,000 pounds of paper turned out annually half is used for printing, 600, 000,000 pounds being required for newspapers alone, the consumption of which has risen by 200,000,000 pounds in the last decade. He alleges that on an average an Englishman uses annually 111 pounds of paper, an American 101, a German 8, a Frenchman 71, an Italian or an Austrian 3½, a Spaniard 1½, a Russian 1½, and a Mexican 1.

An official report from Col. Majendie, Col. Ford, and Capt. Cundil, British inspectors of explosives, states that within the past year the dynamite trade in Great Britain had grown considerably, four new factories for explosives having been erected; that the number of license storage magazines had increased from 320 to 329; and that the total number of registered premises for explosives in the United Kingdom was 19,386. During 1883 there were 179 explosions, causing the death of 89 and the injury of 109 persons.

Prof. O. C. Marsh finds that the skulls of the pterodactyls of the Middle Chalk, West Kansas, differ from those of other known pterosauria in the absence of teeth and of anterior nasal apertures distinct from the antorbital openings; in the presence of the elongated occipital crest, and, lastly, on the whole jaws, which appear to have been covered with a horny sheath, as in recent birds. All these cretaceous reptiles belong to the genus Pteranodon. Some of the species were of enormous size, with a spread of wings of about 25 feet.

If, says M. Moatigny in L'Electricite, we cast a rapid glance over the progress that | to the hovel, and search every part of it." has been made in electricity in less than half a century, we shall see that after presenting itself suddenly under an entirely new form in the Volta pile, after manifesting its surprising action upon magnets and currents at a moment when the science of the phenomena engendered by the pile seemed to some to be exhausted, electricity is again presenting itself under a new light in induction apparatus wherein it is excited by the most surprising means.

The physical comfort of a man who, of his own accord, is industrious, the Builder and Woodworker says, is in every way a matter which has an actual money value. Those who are disinclined to keep steadily at work should be allowed no pretense of an excuse of unsuitable surroundings. The inference it adds is plain: Do justice to your workmen, and, as a rule, they will do justice to you; at any rate, any injustice done them will surely, sooner or later, be returned with interest.

It is not unlikely that the diamond field of Bingera, New South Wales, will equal in richness the famous Kimberley district of South Africa. At Bingera within the last few months hundreds of diamonds have been discovered, and the size and number of the gems are said to increase with the depth of the diggings. A very formidable obstacle to the development of the locality has been removed by the discovery of abundance of water for diamond washing and other purposes at no greater depth than 50 or 60 feet from the surface.

A 3 year-old gorilla which died lately at the Jardin des Plantes, Paris, was imported from the Gaboon district, West Africa, and was the first living specimen of this ape ever brought to France. He was surly and solitary in his habils, barely tolerating any of the other apes near him. His intelligence was far below that of the orang-outang or the chimpanzee. He had full command of his well-developed hands. His physiognomy, says Milne-Edwards, was very peculiar, his eyes being very mobile, and crowned with large superciliary ridges, the nose flat, and the nostrils wide.

Dr. W. Alexeyeff, of the Russian Chemical and Physical Society, has published a memoir on the specific heat of solutions. After a searching investigation of those solutions which are accompanied by a lowering of temperature he believes that this phenomenon takes place in those liquids which have not a chemical affinity, and that these liquids are true solutions. On the other hand, in those cases where a rise of temperature occurs, he believes that the dissolved liquids enters into chemical combination with the dissolving one.

Paper bottles are made on a large scale in Germany and Austria. This is the recipe for the stock: Ten parts of rags, 40 of straw, and 50 of brown wood pulp are thoroughly incorporated. The paper is impregnated or coated on both sides with 60 parts of defibrinated fresh blood, 35 parts of lime powder, and 5 parts of sulphate of alumina. After drying, 10 or 12 rolled leaves are coated again, placed over each other, and then laid in heated moulds where pressure, acting on the albumen of the blood and the lime, produces a strong and

of two pieces joined together. When in England Cetywayo and his atthis remedy: About 18 ounces of good | weeks after the guilty couple expired on the onions, after the peels were removed, were scaffold.

slightly incised and boiled for three quarters of an hour in 35 ounces of water, with 131 ounces of moist sugar, and 23 ounces of honey. The liquid was then strained and bottled for use. One tablespoonful was taken when the attack of coughing was severe, and half a tablespoonful at intervals afterward until the distressing symptoms disappeared. This treatment of cold has a familiar old New-England sound.

### DISCOVERED BY A DREAM.

#### How a Terrible Murder was Unearthed.

In 1861 a young man stopped at an inn in the little town of Argentiere, near the foot of the Cevennes Mountains in France. The first night while sleeping there he dreamed a dream that made a strong impression on

"I thought I had arrived in the same town," so he related, "but in the middle of the evening; that I had put up at the same inn, and gone out immediately in order to see whatever was worthy of observation in the place. Presently, I reached a miserable cottage, in front of which was a garden covered with weeds. I had no great diffi culty in getting into the garden, for the hedge had several wide gaps in it. I approached an old well that stood solitary and gloomy in a distant corner, and looking down into it, beheld, without any possibility of mistake, a corpse which had been stabbed in several places. I counted the deep wounds and wide gashes. There were six.'

At this moment he awoke with his hair on end, trembling in every limb, and cold drops of perspiration bedewing his forehead. He sprang from his bed, dressed himself, and, as it was yet early, sought an appetite for his breakfast by a morning walk. He went accordingly into the street and strolled | round without creaking last longest. along. The farther he went the stronger became the confused recollection of the objects that presented themselves to his view. He hurried forward, no longer doubting that the next moment would bring him to the cottage; and this was really the case. In all its exterior appearances it corresponded with what he had seen in his dream. He entered the garden and went directly to the spot where he had seen the well; but here the resemblance failed; there was none. He looked in every direction, examined the whole garden, and even went round the cottage, which seemed to be inhabited; but nowhere could he find any signs of a well. He then hastened back to the inn in a state excitement hard to describe. He went to the landlord, and asked him directly to whom the cottage belonged that was on the by-road.

Said he: "It is inhabited by an old man and his wife, who have the character of being very unsocial. They scarcely ever leave the house, see anybody, and nobody goes to see them. Of late, their very existence appears to have been forgotten, and I believe that you are the first who for years, has turned your steps to the lonely

Hastening to the nearest magistrate, he related the whole circumstance briefly and clearly. "It is very strange," said the officer. "I will place two of the police at your command : you can then go once more

He allowed but a very few minutes to elapse before he was on his way, accompanied by two officers. The old man received them somewhat uncivilly, but showed no mark of suspicion when they told him they wished to search the house.

"Very well: as fast and as soon as you please," was the reply.

"Have you a well here?"

"No, sir; we are obliged to get our water from a spring about a quarter of a mile dis

They searched the house, but discovered nothing of any consequence. They however, resolved to inspect the garden. By this time a number of persons had collected together outside, having been drawn to the spot by the sight of a stranger with two policemen. They were asked if they knew anything of a well in those parts. They replied they did not; the idea seemed to perplex them. At length an old woman came forward, leaning on a crutch.

"A well?" said she. "Is it a well you are looking for? That has been gone these thirty years. I remember as if it were yesterday; how I used to throw stones into it just to hear the splash of the water."

"Do you remember where that well used to be?" asked the gentleman.

"As near as I can recollect," replied the woman, "it is on the very spot where you now stand."

He suddenly started as if he had trodden upon a serpent. They at once commenced digging up the ground. At about twenty inches deep they came to a layer of bricks, which, being broken up, revealed some rotten boards. These were easily removed, when they beheld the mouth of the well.

"I was quite certain that this was the spot," said the old woman. "What fools they were to stop it up, and then have to travel so far for water 1"

A sounding-line, furnished with hooks, was now let down into the well—the crowd hard pressing around them, breathlessly bending over the black and fetid hole, the secrets of which seemed hidden in impenetrable obscurity. This was repeated several times without any result. At length, penetrating below the mud, the hooks caught in something of considerable weight, and after much time and effort they succeeded raising it. It was an old chest. The sides and lids were decayed, and it needed no blacksmith to open it. Within it they found what they were sure they would find, and which filled the spectators with horror-the remains of a human body!

The police officers now rushed into the house and secured the old man. As to his wife she at first could not be found. But, after a fatiguing search, she was discovered beneath a pile of wood, being much bruised by the heavy logs above her. By this time nearly the whole population of the town had collected around the spot.

The old couple were brought before the proper authorities and separately examined. The man persisted in his denial most obstinately; but his wife at once confessed that she and her husband, a very long time ago, had murdered a pedlar who possessed a large sum of money. He had passed the night at their house, and they, taking advantage of blood and the lime, produces a strong and intimate combination. Bottles are formed strangled him, after which they placed his body in a chest. The chest was thrown into the well, and the well stopped up. Terrified tendant Zulus are reported to have sought | by the deposition of his wife, the old man and tound relief from coughs and colds in at length made a similar confession; and six

### GEKS OF THOUGHT.

There is but one virtue, the eternal sacrifice of self.

Contentment gives a crown where fortune has denied it.

If any man offend not in word, the same is a perfect man. Persistent people begin their success

where others end in failure. Prefer knowledge to wealth; for the one

is transitory, the other perpetual.

Experience is a trophy composed of all the weapons we have been wounded with. Happiness consists not in possessing much

but in being content with what we possess. A piece of steel is a good deal like a man; when you get it red hot it looses its temper.

God bless our women! To their soft hands and pitying hearts we must all come at

Unselfish people are always polite, because good manners are only the absence of selfishness.

Gold can buy nearly everything in this world except that which a man wants most -happiness. The great thing in this world is not so

much where we stand as in what direction we are moving, When a strong brain is weighed with a

true heart it seems like balancing a bubble against a wedge of gold. Any man can pick up courage enough to

be heroic for an hour; to be patiently heroic daily is the test of character. When you fume and fret at the petty ills

of life remember that the wheels which go

Restraint and liberty go hand in hand in the development of character-indeed with

out the former the latter is impossible. The work an unknown good man has done is like a vein of water flowing hidden underground, secretly making the ground

A word of kindness is seldom spoken in vain; while petty sayings are as easily lost as the pearls slipping from a broken string.

Reflect upon your present blessings, of which every man has many; not on your past misfortunes, of which all men have

Memory is a net. One may find it full of fish when he takes it from the brook, but a dozen miles of water have run through it without sticking.

The golden moments in the stream of life rush past us and we see nothing but sand; the angels come to visit us, and we only know them when they are gone.

True modesty is beautiful, but it announces the supremacy of the idea of perfection in mind, and at the same time, gives truth and sincerity the victory over force and vanity.

Let a man take time enough for the most trivial deed, though it be but the paring of his nails. The buds swell imperceptibly, without horry or confusion, as if the short spring days were an eternity.

When God would educate a man He compels him to learn bitter lessons. He sends him to school to the necessities rather than to the graces, that, by knowing all suffering, he may know also the eternal consola-

The sea drowns both ship and sailor, like a grain of dust, and we call it fate; but let him learn to swim, let him trim his bark, and the water which drowned him will be cloven by it, and will carry it like its own foam—a plume and a power.

Rumor is a pipe, blown by surmises, jealousies, conjectures; and of so easy and so plain a stop that the blunt monster, with uncounted heads-the still discordant wavering multitude—can play upon it.

That fortitude which has encountered no dangers, that prudence which has surmounted no difficulties, that integrity which has been attacked by no temptation, can best be considered but as gold not yet brought to the test, of which therefore the true value cannot be assigned.

# Look Here.

Do you feel blue and despondent? Do pains rack and tear away at nerve and muscle, and have you been disappointed in finding a remedy that will afford certain and speedy relief? If so, go at once to any drug store and buy a sample bottle of Polson's Nerviline. Polson's Nerviline never fails to relieve neuralgia, cramps, headache, rheumatism, and all internal or external pains. J. B. Cartman, drnggist, Morrisburgh, writes: "All the parcies I supply speak very favorably of Nerviline, and always purchase a second lot." Polson's Nerviline s sold in sample bottles at 10 cents; large size 25 cents-by all druggists and country dealers everywhere. Try a ten cent to:tle.

A man named Songster shot another man in Philadelphia last week. He sings in another key now-turn-key.

Not another Pill shall go down my throat again, said a citizen "when I can get such a prompt and pleasant ure for my Bilious attacks, such as Dr. Carson's Stomach Bitters. It renders the Blood Pure and Cool and m kes a splendid Spring Medicine. Large bottles 50

"It's swarm weather," remarked the man who was endeavoring to get away from the inhabitants of a bee-hive.

Grand Union Hotel than at any other firstclass hotel in the city.

A circus tumbler ought to live long. When one is turned over so often, it must take the sande of life a long time to run out.

### Catarrh-A New Treatment.

Perhaps the mo t extraordinary success that has been achieved in modern science has been attained by the Dixon Treatment of Catarrh. Out of 2,000 patients treated during the past six months, fully ninety per cent, have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent. of the patients presenting themselves to the regular practitione are benefitted, whi e the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this accomplished the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four years any address for \$1. F. REINHARDT, Mail Building, questioned, as cures effected by him four years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Mesers. A. H. is one of the hits. Not that a carriage top is anything new, but the great want of something more perfect than the heavy, expensive, inconvenient tops in use, suggested the invention of the Conboy Adjustable Top, which has been altered and improved until it now stands without a rival. The styles and grades now manufactured are the most popular, and are varied enough to suit all tastes. Mr. Conn by is the Pioneer in this business. It has been his aim since the commencement to merit the patronage and confidence of the trade and the public, by producing durable and convenient, and at the same time, elegant and stylish tops, that could be sold at exceedingly low prices. That this end has been attained is abundantly proved by the thousands sold, and the numerous letters of approval received from the leading carriage builders throughout the country. Since moving to Toronto, Mr. Conboy is giving his whole attention to the improvement and manufacture of carriage tops, where his increased facilities, his practical knowedge, and his numerous patenteed improvements, give him great advantages over all competitors.
