Record of the Mutual Reserve Fund Life Association.

E. B. Harper, President.

A RELIABLE COMPANY.

Sirty Millions of New Business in 1892 Death claims paid in 1892, \$2,705,000.00 Total death c'aims paid \$1,00,000.00 Reserve or Emergency fund \$3,371,303.59

W. J. McMURTRY, MANAGER FOR ONTARIO,

MAIL BUILDINGS, TORONTO.

The Mutual Reserve Fund Life Association he'd its twe'fth annual meeting in New York on Wednesday, the 25th of Jan., in the business offices of the institution in the Potter building, and the gathering was one of the largest in the history of the association. The reports also were of a highly satisfactory character, showing as they did that progress had been made in every department.

When the call for the meeting had been read President Harper arose to deliver his annual address, and he wasroundly applauded

President Harper's report was for the year ended Dec. 31, and showed that the insurance in force had increased from \$7,633,000 in 1881 to \$235,421,790 in 1892, and the cash and invested assets from \$6,024 to \$3,690,592. The report

"We have increased our gross assets during the year 1872 from \$4,349,202.09 to \$4,785,286.06, making a net gain of \$436,083.97. "We have increased our reserve or surplus

crease of \$216,082.65.

"The income during the year 1892 from all sources amounted to \$4,097,243.09, against an a net increase for the year of \$393,116.68. "For the year 1892 we have paid in death

claims to the widows, orphans and representatives of deceased members \$2,792,337.04, while our disbursements for death claims in 1891 were \$2,290,108.80, making a net increase of disbursements to the widows and orphans over the previous year of \$412,228,24, and making a grand total of death claims paid of nearly \$15,000,000, being an average yearly disbursement to the widows, orphans and representatives of our deceased members of nearly \$1,250,000. while at the close of the year we had in our reserve emergency fund \$5,000 for each \$1,000 of outstanding death claims of every nature, and a single mortuary call now produces more than half a million dollars. Special a tention was directed to the fact

which illustrated the great economic principles underlying the system of the Mutual Reserve. that the total gross mortuary premiums paid by the members during the year 1892 were \$3,041,740.93. Of this sum, \$216,000 were added to the reserve or emergency fund, while the amount paid to the widows and orphans exceeded \$2,700,000, or a sum within a fraction of the amount of the total mortuary premiums paid by the members for the year 1892.

Equally interesting and satisfactory reports were received from Hon. Henry J. Reinmund. second vice-president, and ex-superintendent of insurance of the state of Ohio; John W. Vrooman, treasurer; O. D. Baldwin, chairman of the death claims department; Frederick A. Burnham, counsel of the association; J. Douglas Wells, third vice-president, and the secretary, Mr. F. T. Braman,

The following gentlemen were voted a personal testimonial by the board of directors of the association for the faithfulness, devotion and loyalty which they displayed in behalf of the association, namely E. M. Castillo, New York city.

T. H. Jones, Atlanta, Ga. W. J. McMurtry, Toronto, Canada. G. A. Sanderson, Kansas City, Mo. E. M. Acevedo, Havana, Cuba. A. R. McNichol, Winnireg, Manitoba. C. M. Oakley, San Francisco, Cal.

C. B. Wolfson, New Orleans, La. W. J. Murray, Brooklin, Canada.

J. J. Rooney, Birmingham, Warwick, Eng-After the announcement of the names of the prize winners the speechmaking began, A number of ringing addresses were made by Hon. Henry L. Lamb of Lansingburgh, Gen. tural parts. Electricity in its numerous I. H. Shields of Philadelphia, and D. E. Cameron, Deputy-Treas., Province of Ontario. We herewith give a synopsis of Mr. Cameron's speech. After a few preliminary remarks he expressed his deep interest in the proceedings of the Afternoon. He was much impressed with the penness with which everything was done, with the fullness of the information afforded to policy holders and members, with the enthusiasm displayed, and with the wonderful growth of the association. The \$50,000,000 of new business of tained during the past year meant \$200,000 a day for each of the 300 working days of the year, and the contemplation of these figures would give the members some idea of the enormous labor entailed upon the management in attending promptly to this vast business in all its details. The results actived in the Dominion are especially gratifying. Of the \$16,500,000 of foreign business oh in during the year Canada contributed \$4.500,000, or nearly one third of the whole, and amount exceeding that written by any or our Home Companies with one or two exceptions, and the Mutual Reserve has to-day in force in Canada a larger amount of insurance than any of our Home Comapnies with two or three exceptions. When it is considered that these results have been achieved by the Mutual Reserve with its ordinary staff of agents, while the Home Companies have all the prestige and advantage of magnificent Head offices with influential boards of directors, it surely speaks volumes not only for the energy of the management of the association, but also for the confidence of the people of the Dominion in its stability and success. As in former years scandalous attacks, by anonymous circuları and otherwise, in the interest, and doubtless at the instigation of jealous and anscrupulous rivals have been made upon the Association. The old line insurance journals have likewise maintained their unfriendly at-Litude towards the Association, but the answer of the public has been \$60,000,000 of new business for 1892, and the evidences of increasing popular confidence in the soundness of the principles and the excellence of the methods of this beneficient institution. These attacks have, of course, their origin in the fact that the Mutual Reserve offers life insurance at enormously reduced rates as compared with the old line Companies, a fact that the insuring public are not slow to appreciate. The splendid success of the Company is due in a great measure to the indomitable energy and great ability of President Harper, who has laid its foundation so strong and deep, and has associated with him such able, experienced and devoted men, to whom he has imparted his enthusiasm, and to some extent, his other high qualities, that its career of progress and prosperity will undoubtedly be maintained and before many decades go by this Association is bound to become one of the greatest, if not the greatest, insurance comhis stirring address with a resolution of confidence on behalf of the Canadian policy-holders, which was seconded by Mr. Wm. Wilson,

the well-known manufacturer of Toronto. Insurance.

The Mail last week had a comprehensive article on the fires of 1892, in Canada, the United States, and Newfoundland, compiled from the statements of the companies. The losses were pretty well spread over the country, and included nearly all descriptions of risks. On the large lines, such as business blocks, great manufactories, public buildings, etc., the force of the loss is usually districts in towns and cities in which there were many policy-holders of one company. A company that takes a risk for a very large amount on a valuable building, or several risks in the same neighborhood of a

town or city, seldom confines the whole responsibility to itself. It divides the risk by reinsuring parts of it in other companies, make Jean Ingelow poet laureate. Jean so that in case of fire the brunt of the whole | Ingelow is unquestionably a poet of fine gifts heavy claim will not fall on itself. This and just now poets of fine gifts are extreme system of rear columns distributes the loss | ly few in England. If the matter were to in the same way as if it had been originally be decided solely upon the merits there is no insured by several companies instead of by reason why Miss Ingelow should not stand one. This is one of the results of the forma- as good a chance as any of the male aspirtion of the Board of Underwriters. The losses | ants for the honor. But we do not underof 1892 would have been very desolating if | stand that Miss Willard's suggestion is made they struck. thing than it used to be, and fire insurance | the world have been the work of womenthe mortgage and of mercantile debt. A the rest. The greater part of the clever, very large proportion of the farms of On- workmanlike English fiction of our time has tario are encumbered with mortgages; the been done by women. We have had fine cities-especially those that have been essays from women and fine work of other through a boom-have like heavy burdens | kinds. But there have been very few womon their real estate. The mortgagees al- en who have taken high rank as poets. who buy on time are required by some the period in which almost all the great wholesalers, particularly of the grocery poetry and nearly all the great litincrease of insurance is attended by income of \$3,704,126,41 for the year 1901, making an increase of fire protection in towns and cities. The now combined insurance companies can raise the rates on towns with a poor water supply or an inferior fire equipprotection, and their power over the rates makes their influence in favour of improved protection hard to resist. The English John's Newfoundland, have concluded to ture and art. put on an additional rate to insure the conflagation risk in Halifax and the Maritime Provinces generally, on account of the large number of wooden buildings in that part of the country. There is a leaning towards an advance, too, on the part of Canadian companies in the rates now charged in Montreal, Ottawa, Hamilton, Brantford, and London. Inspection is now more thorough that ever it was, and for the same reason that the requirements of first-class protection are higher. Thus the self-interest of underwriters works for the general good, of the non-insured as well as of the insured. It is becoming the custom to consult the Board of Underwriters before building blocks or other large structures, in order to get its suggestions as to the best fire protection to secure cheap insurance.

The number of fires assigned to unknown causes is probably greater than all the other fires on which insurance is claimed. Half of these fires of mysterious origin are set down by the companies to incendiarism for the sake of the insurance. Old houses or superfluous barns get on fire very frequently from unknown causes when times are hard. Sage's Catarrh Remedy. Only 50 cents Lightning figures as a leading cause in the by druggists. fires of last year. It usually is credited with from 8 to 10 per cent, of the fires in the country districts, but last year's numerous | T gained a lawsuit, and once when I lost thunderstorms raised the proportion of loss one, to about 20 per cent. of the total in agriculapplications as power, light, and heat is a source of danger that is carefully watched by the inspectors, and so far it has not done so large a proportion of damage here light company is under agreement with the on them in a flood. Board of Underwriters to report to the inspector of each district in which it puts in a plant, the report to be regardless of the fact whether the owner of the plant is or is not insured, and the electric companies are | had to work for her living, and many a dysfurther under agreement to make every- peptic man would be well if he lived upon thing satisfactory to the underwriters' elec- sixpence a day and earned it. tricians. The chief objection of insurance companies is to the wires used for electric purposes. These inter ere with the firemen. About three weeks ago a fire in Montreal destroyed from two to three hundred thousand dollars' worth of property, mainly because it was fortified behind a network of wires. The insurance people want all wires to be put underground, and as they have enormous interests at stake their wishes may prevail. Coal oil lanterns are blamed for a very large proportion of barn fires. With all the improvements that have been made in lanterns there is no reduction in the losses from them.

Afraid of the C.P.R.

Mr. Thurston, who has been engineering the annexation of Hawaii at Washington, thinks that England and the C. P. R. desire to get control of the island. He says that with Kainlani, who is the daughter of an Englishman, on the throne, the British would soon have an undue influence, and adds :- "The Canadian Pacific Railway is now making arrangements to run a line of subsidized steamers to Australia, by way of Honolulu, to be immediately followed by a telegraph cable. With English control of the Government and an easily corruptible Legislature, it would be an easy matter to throw the subsidies now paid by Hawaii to American steam lines and the subsidy now offered to an American cable into the hands of their Canadian allies; and with the additional ability to offer the sugar planters cheap labour from India, it would be but a few years before the whole trend of island sentiment and association would be away from the United States and toward Eng- lady of Piqua, Ohio, was poisoned while asland. It is well to consider that not only sisting physicians at an autopsy 5 years ago the Canadian, but the New Zealand and and soon terrible ulcers broke out on her Australian Governments, have protested to head, arms, tongue and throat. Her hair all their home Government against the propos- came out. She weighed but 78 lbs., and saw ed annexation of Hawaii. At the present moment it is English policy to remain quiescent; it certainly has been a most diplomatic move, if the object was to prevent annexation, for nothing would have so united American sentiment as England's open opposition; but there is no guarantee that such will continue to be England's policy. broken by reinsurance. The same is true of Mr. Thurston is trying to stir up the cupidity of Americans by persuading them that they have a financial interest in the annexation of the islands. He is a student of

human nature.

A Suggestion from Miss Willard.

Miss Willard wants Queen Victoria to

they had in all cases spent their force where upon the ground of merit. She wants Jean of the insurance companies, which were thinks women have been slighted and put may be attributed to defective judgment, strong enough to stand the shock and to upon, as it were, in this matter. There for the careers of other men who operated make a very good showing at the year's end. never was a female poet laureate in Great on Wall street at the same time that Hatch If the losses had in all cases remained with Britain, and Miss Willard wants the Queen | made and lost his millions show that coolthe owners of the destroyed property, their to make one by way of asserting the dignity ness of judgment is the prime factor of suc results would now be very prominently re- of womanhood. The suggestion raises the cess there as elsewhere. Hatch, however, flected in the condition of many sections of question. Why has no woman ever held was a true representative of the vast majorthe country. Fires destroyed big patches of this post? A sufficient answer seems to be ity of speculators, whose fate is to lose more several towns and villages, burning indus- that no woman has ever been the foremost in the end than they gain. Her eminence serves only to emphasize the rarity of great poetic achievement by women. It ment. The more the companies have to do, is surprising at first glance that this should the more it is to their interest to insist on be the record of literary history. One would naturally expect the more sensitive and emotional sex to win its best laurels in verse. But women have done companies, after their experience in St. relatively better in other walks of litera-

A laugh is worth a hundred groans in any

It was Ben Johnson, we believe, who, when asked Mallock's question, "Is life worth living?" replied, "That depends on the liver." And Ben Johnson doubtless saw the double point to the pun. The liver active-quick-life rosy, everything bright, mountains of trouble melt like mountains of snow. The liver sluggish-life dull, everything blue, molehills of worry rise into mountains of anxiety, and as a result-sick headache, dizziness, constipation. Two ways are open. Cure permanently, or relieve temporarily. Take a pill and suffer, or take a pill and get well. Shock the system by an overdose, or coax it by a mild,

Dr. Pierce's Pleasant Pellets are the mild means. They work effectively, without pain, and leave the system strong. One little, sugar-coated pellet is enough, although a whole vial costs but 25 cents.
