

**THE LARGEST SPECTROSCOPE.**

Analysis to be Made of What is Burning in the Sun—Great Results are Coming. Madgeburg, Germany, is to have the largest spectroscope ever built. It is to be the property of Dr. Hans Hauswaldt, a rich scientist of that place, who left an order when he was in Pittsburgh a year or so ago. Prof. John A. Brashear, the well-known maker of scientific instruments, of Alleghany, Penn., is the maker of this gigantic piece of work. There are only two other spectroscopes in the world which come anywhere near in size to this one. Of these two, one is at the Royal University, Dublin, and the other is at the McGill University of Canada.

This powerful concave instrument is twenty-one feet long and it will require a room from twenty-five to thirty feet square in which to operate it. The grating on this big spectroscope has an aperture of six inches in diameter, and is ruled with 110,000 lines. These lines have been drawn so accurately that there is not between any one of them a difference of three millionths of an inch.

An ordinary spectroscope shows from 200 to 300 lines of the spectrum of iron, while this one is so strong that it shows at least

2,000 LINES

to the same spectrum. It was formerly thought to be a wonderful achievement if a spectroscope showed the sodium lines double, but the instrument made by Prof. Brashear, with the sun at a low meridian, shows not less than fifteen lines.

"The new spectroscope," said Prof. Brashear, "has its highest powers in photography. The spectrum of the sun has been photographed to a length of sixty feet, literally crowded with lines from one end to the other. It is so arranged that no matter what part of the spectrum it is desired to photograph, the photographic plate is always in focus for every part of the spectrum."

"The instrument also is valuable for making comparisons with anything that may be burning in the sun. If we wanted to determine if the metal calcium is in a state of gas in the light which is coming from the sun we only have to turn the sunlight into this slit in the spectroscope and photograph on our plate the centre of the sun. A bar is then placed over this part of the plate which has received the impression of the solar spectrum, and we turn on the electric light in which has been placed a small piece of pure calcium. In a short time a developed plate is obtained which shows whether or not there is any calcium light in the sun's rays when shining."

Dr. Hauswaldt intends to order several other scientific instruments from Prof. Brashear for his laboratory in Madgeburg, which the doctor intends to make the finest and most complete in all Europe. He is very rich and can well afford to do so.

**CURED OF SCIATICA.**

Left Hip Affected—Suspected Kidney Trouble—Relieved and Perfectly Cured by Dodd's Kidney Pills.

Toronto Junction, March 22 (Special)—Mr. H. Playter, is not a difficult man to find as everybody here knows that he is foreman at No. 1 Fire Hall. He was the picture of health when called upon by your correspondent and told his story thus:—

"In April 1896 I suffered from a severe attack of Sciatica affecting my left hip and the leg to the tip of the toes. I suspected it came from some form of kidney trouble and as they had been recommended I procured a box of Dodd's Kidney Pills."

"At the end of the fourth day I was entirely relieved but desiring a permanent cure I continued to use that and another box and am now perfectly cured and as well as ever in my life. A brother of mine living at Pine Orchard has been cured by Dodd's Kidney Pills."

**HER LUGGAGE.**

A woman who spends her summers abroad says that this last year she took with her only two satchels by way of baggage.

She carried in these another gown, an extra waist, and several changes of underclothing. She never once wore the extra waist, and found that she almost always stayed long enough in any one town to have linen laundered, or could buy anything required nearly as cheaply, so that she did not need the supply on hand.

Thus, although she was laughed at by the friends in her party for her light luggage, and although she had never gone before without a trunk, she came to an important conclusion: "I always learn something in each European journey," she remarks now. "Last summer I learned better than ever to go about with two satchels again. "Next summer I intend to take but one."

**AN IMPORTANT LETTER.**

SHOWING HOW A SUFFERER FROM SCIATICA WAS CURED.

A Correspondent of the Orillia News-Letter, with Permission From the Author Makes the Letter Public—It Will be Gladly Read by Other Sufferers From This Painful Malady. From the Orillia News-Letter.

The following letter has been forwarded us by the Coldwater, Ont., correspondent of the News-Letter, which we have great pleasure in publishing: Coldwater, Sept. 25th, 1896.

A few weeks ago I became very unwell from an attack of sciatica, and remembering that while ago a well known friend of mine, Mr. C. T. Hopson, of Fesserton, a few miles from here, had been a great sufferer from this painful complaint, I thought it would be well to consult that gentleman as to the medicine he gives credit for his relief and cure, as I was aware that he was now well and hearty and had ever since been in steady work among lumber—his regular business. He gave me the information required, and wrote out the following testimonial which he desires to have published in any way I think proper, hoping that it would meet the eye of many sufferers like myself who are anxious to get relief. I therefore forward it to you to publish:—

Fesserton, Sept. 18th, 1896.

"It is with the greatest pleasure that I testify to the marvellous benefit and cure that Dr. Williams' Pink Pills effected in my case. In the year 1892 I was taken very bad with sciatica. I was treated at different times by two doctors but dispensed with their services as I found I was not getting the hoped for relief. I then tried different remedies advertised as a cure for sciatica, but with no better result. Then I tried strongly recommended electrical appliances, but still to no purpose. I did not improve any and the pain was excruciating, and I began to lose all hope of ever getting better. I could not sit down or move about without suffering intense pain, and the only relief I could get was when I lay down with my legs stretched straight out and then the pain was somewhat less. I was in this position one day when I picked up a newspaper lying by my side and there I read of a man cured of sciatica by taking Dr. Williams' Pink Pills. Always having but little faith in proprietary medicines, and in view of the experience I already had, I would not have tried them but for the fact that my wife insisted on going at once and procuring some. She got a box and persuaded me to take them. By the time I had finished the box I believe I felt better, so I kept on taking the pills and by the time I had taken six boxes I was entirely cured. I had been laid up for four months before taking the Pink Pills, and I shall continue to take them occasionally as I know them to be an excellent medicine. I shall never cease recommending them. Yours truly,

Charles T. Hopson, Our correspondent adds that this letter is from a much respected resident of Fesserton, whose word is generally considered as good as his bond.

The earnest question of the hour, And general theme, no doubt, Is not of love or politics, But, "Will the coal hold out?"

It is easy to say that one preparation is as good as another, and it is easy to waste money by buying something you know nothing about, and receiving no benefit.
