X Rays Are Not Needed
 X X X

It is extremely expediting to experiment with expensive articles and not experience exact satisfaction. Take clothes for example. You can't tell exactly even by examination with X rays whether they are extraordinary or not. To be exact you must wear them. That extra quality exists in our clothing we know from our customers who exhilaratingly told them to an extreme extent. No further explanation need be exacted.

THE PERFECT TEA MONSOON TEA

THE PERFECT TEA IN THE WORLD
 FROM THE TEA PLANT TO THE TEA CUP IN ITS NATIVE PURITY.
 "Monsoon" Tea is packed under the supervision of the Tea growers, and is advertised and sold by them as a sample of the best qualities of Indian and Ceylon Teas. For that reason they see that none but the very fresh leaves go into Monsoon packages.
 That is why "Monsoon," the perfect Tea, can be sold at the same price as inferior tea.
 It is put up in sealed caddies of 1/2 lb., 1 lb., and 5 lbs., and sold in three flavours at 40c., 50c. and 60c.
 If your grocer does not keep it, tell him to write to STEEL, HAYTER & CO., 11 and 13 Front St. East, Toronto.

CHOICE RECLEANED SEEDS OATS CLOVERS

—Early Gothland. This Swedish Oat we consider one of the very best, and unhesitatingly recommend it as a superior variety. They are different from other Oats in the way they grow, being neither a side nor a spangle, but growing closely and evenly around the main stalk. The oat in the field is handsome and is very stiff in the straw, free from rust and stands up well. Very early and pleases everybody who has grown it. The grain is exceedingly handsome and large.
 Siberian White. A comparatively new variety, recommended by the Ontario Agricultural College and which has given great satisfaction to those who have grown it. Grain plump and heavy, straw stiff and strong, stools well and not inclined to lodge; productive.
 Lucerne or Alfalfa (Medicago Sativa). The great value of Lucerne is in its enormous yield of sweet and nutritious forage which is highly relished by stock, either when green or cured into hay. It will grow and yield abundantly in hot, dry sections, and on poor, light and sandy land, where no other grasses can be grown, for it sends its roots down to enormous depths, consequently it consumes food, moisture and the leach of fertilizers which have been for years beyond the depths of ordinary plants. The best method is to sow broadcast 15 lbs. per acre where land is in good condition. Cut when in full bloom. Call and get prices and see samples.
