

LORD HERSHEY'S LITTLE JOKE.

Three Dollars Ahead on Account of Guide's Ignorance of Value of an English Sovereign.

Lord Herschell had a fondness for going around and looking at things on his own hook, says the Washington Post. When he first came to Washington he was driven over the city numbers of times and shown the points of interest, but he liked walking better; and he took numerous long prowls about the city quite unaccompanied. On one of these occasions he was accosted in front of the Smithsonian Institution, by a guide. The guide's manner of mixing his negatives probably appealed to the Englishman's fancy, for he consented to be shown through the Smithsonian Institution and the National Museum by the man. A member of the Smithsonian Institution's scientific corps, who was no great distance from the titled Englishman and the guide as they went around among the exhibits in the two buildings, says that it was delicious to observe Lord Herschell's solemn reception of the guide's misinformation. The guide knew absolutely nothing about the exhibits, but the fashion with which he decanted upon them, says the scientist, who overheard him, was gloriously pompous and ridiculous. Lord Herschell listened to the man as if he were "sitting under" some famous lecturer, only occasionally regarding the guide with a sly twinkle in his eye when the wealth of misinformation and tomyrot was flowing particularly free. After an hour or so thus spent the Englishman dismissed the guide and handed him a sovereign from among a number that he fished out of his trousers pocket. The guide looked at the coin suspiciously, sized up both sides of it and then handed it back to Lord Herschell. "That's dago money, ain't it, sir?" he asked the member of the Joint High Commission. "Why, no," replied Lord Herschell. "That's an English sovereign—the equivalent of about \$5 in American money."

"That so?" said the guide. "Well, it don't look exactly right to me, sir, and I'd rather have the American stuff if you've got it handy." Lord Herschell then pulled out his wallet, took a new \$2 bill therefrom, handed it to the guide and went his way with a smile.

ISN'T THIS PROOF

Clear and Convincing that Dodd's Kidney Pills Cure Diabetes.

Engineer James Graham's Case Was Proven Incurable by a Leading Montreal Physician—Yet Dodd's Kidney Pills Cured It.

Montreal, P. Q., April 3.—Thick and fast come the most convincing proofs of the really marvelous cures of Kidney Diseases, in this city, by Dodd's Kidney Pills. Not a day passes on which we cannot read reports of several cures—at home, right here in Montreal, at our own doors.

In the face of this vast mass of proof, we must believe what such an enormous number of our fellow-citizens write on the subject, viz: That there is no other medicine known to science, that can at all equal Dodd's Kidney Pills, as a cure for Kidney Diseases of all types.

Many hundreds of Montreal people have been cured of Diabetes by Dodd's Kidney Pills, but there are in the city, still, hundreds of other sufferers who do not know that by using this famous remedy, they can be cured, positively cured, for all time and at almost no expense.

That such is the case, let the experience of Engineer James Graham, of No. 150 Victoria Square, prove.

Mr. Graham had Diabetes for six years. One of the most eminent of Montreal's physicians examined him, and informed him that his case was beyond all aid—incurable.

No wonder the sufferer grew despondent. But one day he read of a wonderful cure of Diabetes, effected by Dodd's Kidney Pills. He at once bought a box and began to use them. They caused marked improvement, and he used two boxes more. Now he is as healthy as he ever was, robust and hearty.

Isn't this proof enough that Dodd's Kidney Pills will cure Diabetes? It ought to be, surely!

MIKADO'S FAD.

The favorite sport of the Mikado is, like that of most of the Indian Princes, horse racing, but he allows no betting, and the price of admission to the races is placed so high that only the upper classes can attend. The Mikado's stables accommodate about 3,000 animals.

CRIME IN ENGLAND.

The British Home Office report for 1897, shows that while serious crimes tend to diminish in England, there is a great increase of minor offenses. By far the larger number of criminals convicted during the year have been convicted before—a fact that led the Home Office to conclude "that neither penal servitude nor imprisonment serves to deter the habitual offender from reverting to crime, and it is the habitual offender who forms the bulk of the prison population."

HARD GRAIN.

Silicon is generally spoken of as the element of sand, and little thought of its value in grain growing enters into our usual calculations, yet in conjunction with the potash the acid of silica or silicic acid, forms an important part of the grain, and through it we get the hardening. When we consider that the amount of silica required to harden grain and give straw stamina is nearly equal to the total aggregation of nitrogen, phosphoric acid and potash, over 90 per cent, and stamina is nearly equal to the total mineral matter of the crop, it assumes some importance—in the light of our softening grains and softer straw.

The fact that there is lots of it in the soil, does not meet the case, as like the other essential inorganic elements it is usually locked up so hard that our plants cannot assimilate it; consequently the valuable Thomas-Phosphate Powder with its available silica comes to our aid, and along with it phosphate of lime, phosphate of magnesia and phosphate of iron. This, and the fact that grains, particularly wheat, take their phosphates largely as phosphate of magnesia, partly accounts for the hardness and quality as well as the great yields of wheat, 77 bushels per acre, obtained from the use of Thomas-Phosphate, as well as the stiff straw of the crops.
