Massey-Harris Bicycles 1900

Their very name is their guarantee—want proof of their staunchness?—want proof of their strength?—want them compared with other makes?—here's evidence from the Government "Blue Books"—the Victorian Government of Australia recently purchased a number of Massey-Harris Bicycles for use in its Cycle Postal Department—at about the same time the New South Wales Government purchased a number of American and other makes of wheels for similar service, and from statistics printed it is shown that it cost twenty times more for repairs on the American collection than for the Massey-Harris Bicycles—improvements and features in the 1900 models are not made for the sake of change, but in the everlasting trying to make the best wheel better—get a catalogue and study it.

The Ball Head Spoke is a Little Thing

But mighty as an improvement in bicycle-making—and its great usefulness is in the fact that when the spoke is in position it never pulls out—and to remove it is simple—all that is necessary is to loosen the spoke at the rim and move it to a right angle position—it's one of "1900" improvements on the

Cleveland Bicycle.
