The Liberal.

RICHMOND HILL, June 28, 1900

Reports from nearly every branch of industry go to show that the financial affairs of Canada are in a flourishing condition. There are signs of prosperity in almost every line of trade and manufacture, and the annual statements of the various moneyed institutions throughout the country give unmistakable evidences of an era of good times. The following figures are taken from the report of the Standard Bank, a branch of which was opened in Richmond Hill about three months ago:—"The net profits have been sufficient to pay the usual half-yearly dividend of 4 per cent. with a bonus of 1 per cent. on the paid-up capital stock, amounting in all to \$90,000, to reduce the office safes and furniture amount \$10,000, to transfer \$15,000 to rebate of interest account, and to carry forward \$28,283 to profit the loss. The sum of \$100,000 has been taken from the profit and loss account and added to the reserve fund, bringing that up to \$700,000. The total note circulation is \$836,750 and total deposits \$7,335,114. The total assets are \$10,561,047, of which \$6,571,824 are current loans and discounts."

There is a good deal of speculation as to when the next General Elections for the Dominion will be held. They certainly will be here before the next twelve months are ended. The Opposition claim that "it is time for a change," but it will be exceedingly difficult to convince the electors of Canada that such a change would be a safe experiment. The present Government has established clean honest administration, restored confidence to a business community, facilitated the development of the natural wealth of the country, enabled all classes of the people to avail themselves to the full of the good times which have come upon us, raised the Dominion to the foremost place in the federation of English speaking nations, and have done more for the people in four years than their predecessors did in the previous eighteen years.

The province of British Columbia should be accustomed to dismissals by this time. First Lieut. Governor McInnes dismissed the Turner administration and afterwards the Semlin Government. And lastly when it was found by a General election that the man whom he called to form a cabinet was not endorsed by the electors, the Lieut. Governor was dismissed himself by Sir Wilfrid Laurier.

The latest figures obtainable from the Department of Trade and Commerce indicate that the present year when completed at the end of this month, will once again make a new record in our history. The total, so far, for eleven months is \$323,596,476 as against \$312,000,000 for the previous full and completed year.
