The Liberal.

RICHMOND HILL, July 5, 1900

SECOND ONLY TO "BOBS."

After reading the speeches delivered by some of the Opposition members in the House of Commons, and the same sort of thing in some of the party newspapers who are opposed to him, it is a pleasant change to note the observations of imperial writers who, from their broader standpoint and untrammelled by petty party prejudices, speak fairly and honestly their mature judgment on passing events. The British Weekly of June 14th says of Sir Wilfrid Laurier's recent speech in the House of Commons:—"Sir Wilfrid Laurier apparently believes that many battles have yet to be fought, and he does not underestimate the gravity of the problems which await us when the war is over. British subjects the world over will echo his prayer that the life of Her Majesty may never more be disturbed by war, and that before her glorious reign comes to an end, her subjects in South Africa may have learned to appreciate those British institutions, which in this age and in every land signify liberty and equal rights. Many of those who have read with tears and with pride the noble speeches of the French-Canadian Premier during the war, must feel that on the day when we welcome home Lord Roberts and his army, the presence of Sir Wilfrid Laurier must not be lacking to the general happiness. In these testing months we have learned what men the world over are most precious to the empire. Before all, and separate from every other, comes the Queen's noblest subject, Field Marshal Lord Roberts. After him is there any name we could mention in preference to Sir Wilfrid Laurier?"

In the course of a statement before the Agricultural committee the other day Prof. Robertson testified that there were last year in the North-west territories no less than 42 creameries in operation, whereas five years ago there was only one. The total value of the butter produced was over \$103,000. This gives some idea of the value to the farmers of the North West and to the country generally of the work of the Agricultural Department in encouraging dairying in the West. Similar success promises to attend the efforts of the Department to encourage chicken raising. A trial shipment of chickens was sent to England early in the present year, upon which, after paying all charges, a net profit of 53 cents a pair was realized. This is a pretty clear indication that there is money in chicken raising for the Canadian farmer.

A work by Mr. John Macoun, naturalist to the Geological Survey of Canada, has just been issued from the Government press, which will be of great value to those interested in the natural history of Canada. It is the first part of a work to which Mr. Macoun has given many years of study, and is entitled "A Catalogue of Canadian Birds." In compiling this catalogue the author has endeavored to bring together facts on the range and nesting habits of all birds known to reside in, migrate to, or visit the northern part of the continent. In addition thereto he has included Newfoundland, Greenland and Alaska.

Attended every day—Mary Gorman.
H. J. SAIGEON, Teacher.

On Saturday, June 30th, 1900, the Public School children of Oak Ridges and Jefferson along with their teachers, officers and friends met at Bond's Lake where they held their annual picnic.

Although the wind was high and the weather cool the children and young people appeared to enjoy the boating until about 5 p. m. when the children were called to sit down at the well-filled tables. After they had satisfied themselves with the delicate viands placed before them, the tables were then made ready for the parents and young people who showed that they heartily appreciated the good things before them, by the length of time they remained at the tables.

It was encouraging to see the number of parents who turned out thus showing that they co-operated with the trustees and teachers in their effort to give the children one good day's outing during the summer holidays.

After tea the races were held on the green in front of the hotel. The first was boys under 6. The names are arranged according to merit. Harold Murphy, Willie Patton, Sydney Morris, Bert Williams, Elmer Clubine.

Girls under 6—Hazel Duncan, Wroxy Topper, Bennie Stewart, Edna Clubine, Kora Phillips.

Boys between 6 and 9—Erny Dibb, Leonard Duncan, Stanley Casely. Girls between 6 and 9—Georgie Brown, Almeda Stewart, Lory Routledge and Maud Ball (equal).

Boys between 9 and 13—John Mortson, Kenneth Legge, John Hearn.

Girls between 9 and 13—Clara Bostwick, Jennie Gamble, Sadie Fisher.

Boys over thirteen—Garfield Bostwick, Geo. Hart, Chas. Routledge. Girls over thirteen—Idelzia Bostwick, Edna Hodgins, Mary Hogan.

A special prize was then given for a bicycle race which was won by Ralph Kerswill, Nelson Legge, Jack Legge.

A second special prize was given for boys under 20, and this was won by Arthur Mortson, Ralph Kerswill, Ernie Phillips.

This closed the day's sports and all went home satisfied with their day's outing notwithstanding the unfavorable weather.

Correct Form in Letter Writing.

To every one outside the family circle the Christian name and surname should be written in full. A married woman writes her name, Mary Bruce Talbot, and in a business letter adds beneath it, in brackets, Mrs. John Talbot. An unmarried woman writes "Miss" in brackets, before her full name, to a stranger when a reply is expected.

Typewritten letters are only admissible for business communications. In such epistles the signature should be written by hand.

Speak first of the interests of your correspondent and afterwards of those which concern yourself.

Never write anything over your own signature of which you might later be ashamed.

Never allow anyone to read a letter intended for your eyes alone. It is entrusted to your honor, even if not so explicitly stated.

One does not use the word "house party" in an invitation, but says, "I am asking a few friends, etc."

A letter sent by hand should be left unsealed, unless a servant be the messenger.

Business letters should begin with "Sir," "Dear Sir," or "My dear Sir," or if in the plural, with "Gentlemen," and end with "Yours truly" or "Respectfully yours"—never "Respectfully" alone, omitting the subject of the sentence. Ladies are addressed as "Madam," whether married or unmarried.—Mrs. Burton Kingsland, in the June Ladies' Home Journal.

**Spavins, Ringbones, Splints
Curbs, and All Forms of
Lameness Yield to**

Works thousands of cures annually. Endorsed by the best breeders and horsemen everywhere. Price, \$1; six for \$5. —A's a liniment for family use it has no equal.

West Lomo, Ontario, Can., Dec. 14, 1893.

DR. B. J. KENDALL CO.
Dear Sirs:—A year ago I had a valuable horse which got lame. I took him to the Veterinary Surgeon who pronounced it "Spavin" and gave me little hope, although he applied a sharp blister. This made matters only worse and the horse became so lame that it could not stand up. After trying everything in my power I went to a neighbor and told him about the case. He gave me one of your books and I studied it carefully and being resolved to do the utmost in favor of my horse, sent to the nearest drug store and got a bottle of your Spavin Cure and applied it strictly according to directions. Before the first bottle was used I noticed a marked improvement, and when the seventh bottle was about half used, my horse was completely cured and without leaving a blemish on him. After ceasing treatment I gave the horse good care and did some light work with him, wishing to see if it had effected a cure. I then started to work the horse hard and to my entire satisfaction he never showed any more lameness through the whole summer. I can recommend Kendall's Spavin Cure not only as an excellent, but as a sure remedy, to any one that it may concern. Yours truly, S. J. THURTELL.
Ask your druggist for Kendall's Spavin Cure, also "A Treatise on the Horse," the book free, or address DR. B. J. KENDALL COMPANY, ENOSBURG FALLS, VT.

**Interesting Facts
About Watches**

The balance in nearly all watches vibrates 18000 times per hour, making about one and one half turns each vibration. The approximate circumference of the pivots being .471 millimeters and would travel in two years a distance of 222,866,448,882 yards, 1 foot, 6 1/2 inches.

The approximate circumference of the balance is 47.12 millimeters and would travel in two years through a space of 461,878 miles, 3057 yards, 1 foot, 11 inches or nearly twice around the globe.

If your watch has been running two years since it was cleaned, it will pay you to have it properly cleaned and oiled to avoid ridges wearing into the pivots and causing expensive repairs to make it keep good time again.
