A Minute too Late

"Cheap" watches are dear at any price. They only give you an idea about what time it is, and you may "get left." The railroad companies realize the value of accurate time and compel their trainmen to carry watches which do not vary more than 30 seconds per week. "If familiarity has not dulled our perceptions," says engineering, "we—especially such of us as our mechanics—should be lost in admiration of the watches we carry in our pockets. The accuracy with which they measure time is so wonderful that it transcends nearly all other kinds of measurement. It is by no means an extraordinary watch which can be relied upon within an error of five seconds per day or one part in 17,280. This is a degree of accuracy which is absolutely unattainable in many kinds of measurement, and only to be got in others by trained observers working under favorable conditions with high-class apparatus. Compared with other measures it represents an error of less than 1/4 grain in one pound avoirdupois, of a yard in ten miles, of one second in five degrees of an arc, of four drops in a gallon and so on.

What would your Grocer say if you would make a demand on him for a deficiency of four drops in a gallon?

I am selling the above high grade railroad standard watches at very moderate prices. The best is cheapest.

CLEVELAND BICYCLES

It was thought last season that Cleveland Bicycles had almost reached perfection. The spring of 1901, however, has ushered in several new improvements. The most noticeable improvement is probably

THE CUSHION FRAME BICYCLE.

Its chief feature is the saving of the efforts and vitality of the rider by absorbing vibration—that is the jerking up and down experienced on rigid frames. Call at THE LIBERAL OFFICE for a descriptive catalogue. Make your selection as to frame, finish, handlebar, pedals, saddle, tires, etc. No extra charge for Dunlop tires. Old wheels taken in exchange.
