Child at the Age of two a Crippled Victim of Disease.

Edna Rathburn, of Hampstead, N. B., fell and broke two ribs-Injured the Kidneys and Diabetes Developed-Dodd's Kidney Pills in curing the Kidneys straightened injured spine.

Hampstead, N.B., June 10.—Special. -Little Edna Rathburn of this place has had a sad experience for a child so young. She is now nearly eleven years old. Eight of her few short years have been passed under the saddest cloud possible in life.

At the age of two the child met with an accident which left her with two ribs broken, split off at the back bone. Though they were set and healed her little body did not straighten. For eight years she could hardly walk, being almost doubled up. The acciddent affected her Kidneys and Diabetes set in. Diabetes is a particularly dangerous form of Kidney trouble, in this case particularly severe by nature of injuries to the spine.

The family doctor was, of course, consulted. He diagnosed her case correctly, but couldn't cure it. She was sent to the Public Hospital at St. John, in the hopes! that the greater skill and facilities there would avail. They could do nothing for her. The authorities advised the mother to take the child home to nurse her and give her good care while she lived, which would not be very long. The suffering of the little one was

heart-rending to the mother and friends. She cried with pain night and day. The mother grew desperate and determined she would find a cure for her child if it took every cent she possessed.

She saw Dodd's Kidney Pills advertised and immediately purchased some. From the first they were beneficial. The little girl commenced to get better. Every day saw an improvement. Dodd's Kidney Pills were doing the work. Six boxes in all were used and

If you could see him in his study, says a writer in the 'Universal Magazine," you would notice at a glance how methodical he is. Everything is in its proper place. There is no searching for pens, book-cutter, or letter-weight; all are within his reach. His lordship is a voracious newspaper reader, as a statesman should be who desires to keep

The growth of a few tiny rootlets, observed the teacher, has been known to lift a heavy rock from its place, and the root of a tree growing out under a stone pavement will sometimes push it up and break it. Other cases of a like nature, showing the strong uplifting power of vegetable growth have occurred, I doubt not, within your own observation. Is it not so?
