**THE TABLE OF PRECEDENCE.**

As the heir apparent to the Throne of the British Empire is now on his way to visit Canada, and is certain to receive a right royal welcome from all classes when he does arrive; in order that our readers may understand the procedure observed on such occasions, we publish the "Table of Precedence," as it appeared in the official gazette.

The "Canada Gazette" dated Ottawa 14th Feb'y, 1880, contains the following:

**METROPOLITAN MANAGEMENT (?)**

Complaints against the Management of the Metropolitan Railway have been frequent ever since the first car began to run. THE LIBERAL has always been inclined to believe that many of the charges of carelessness and a lack of courtesy

towards the travelling public were not well founded. We could understand, also, the difficulties to be met with in dealing with so many people every day, and expected that matters would improve as time went by. But after fair trial we have come to the conclusion that those who pretend to manage the road are either incapable or are altogether indifferent as to the wishes or convenience of their patrons. Those who patronize the road should be reasonable in their demands, but they certainly have rights which ought to be respected. And the Company should know that to serve the public well is to serve themselves, and put more money into the pockets of the stockholders.

There have always been weak points in the management, but one particularly in keeping from the people the special rates on holidays, and the hours that special cars will be run. During the last week of the Toronto Industrial Fair many people complained because it was impossible to ascertain with any degree of certainty whether they could return home on a late car after the evening programme. As a matter of fact late cars left the crossing every night of the last week of the Exhibition at 11.30. On Monday one conductor, when asked by an anxious passenger, said he thought there would be a late car, though he was not positive. Another said the last car would leave at 10 sharp. And a third ventured on opinion that all who wished might remain on the Exhibition Grounds until after the fireworks. Had a notice been posted up in the Toronto waiting-room and three or four other places along Yonge Street the public could have seen for themselves. Then the passengers need not have bothered the conductors or motormen about late cars as they knew nothing about them because they had not been told. Those who pretend to manage the Metropolitan Railway should feel ashamed of themselves.

The Provincial Inspector of Licenses, Mr. J. K. Stewart, who has been making a series of investigations of the working of the License Law in various parts of the province, says: "On the whole the law in Ontario is respected more than in any other province in Canada. I have studied the matter carefully and the records show that there is much less intemperance at present than ever in the history of the province. In 1889 there were 3,797 commitments to jail for drunkenness in Ontario; in 1889 the number was only 1,892, and there has been a substantial decrease in every year during this period." In concluding the Inspector said: "The County Inspectors are just as vigilant to-day as ever they were and there is not nearly as much illegal business done by licensed men as there used to be."

The deepest sorrow is felt and expressed everywhere over the attempted assassination of President McKinley. The shooting of this good man in the Temple of Music at the Pan-American Exposition on Friday was cruel and cowardly, and is enough to cause any civilized nation to bow with sorrow and humiliation. The stricken President is making a gallant fight for life, and all reports from attending physicians point to his recovery. That their hopes may be realized is the wish of all good citizens not only of the United States but of all countries.
