This is the estimate of J. C. Langelier, superintendent of forest rangers of Quebec. Mr. Langelier takes a million and a half tons of pulp yearly as his basis, that being about the total production of the United States.

AMOUNT STRIPPED EACH YEAR

The forest areas in the four provinces which would have to be denuded yearly to produce the required million and a half tons of pulp are given as follows:

But it is a well known fact that where operations are carried on in a wise and provident manner spruce forest renews itself in 15 or 20 years at most, especially when the soil is good and the climate favorable. It is, therefore, reasonable to infer, says Mr. Langelier, that the spruce forests are practically inexhaustible.

THE KING AND HIS UNIFORMS.

King Edward must have the right to wear more uniforms than any other crowned head. In addition to the field-marshal's uniforms of the British Army, he can wear the four different uniforms of the Guards, and that of the 10th Hussars. He is an English Admiral, and also a general in the Prussian Army, and colonel of German Dragoons and of a German Regiment. The King is colonel of no fewer than twenty-two different regiments in the British Army.

An old man would not believe he could hear his wife talk a distance of five miles by telephone. His better half was in a country shop several miles away where there was a telephone, and the sceptic was also in a place where there was a similar instrument, and on being told how to operate it, he walked boldly up and shouted: "Halloa, Sarah!" At that instant lightning struck the telephone wire and knocked the man down, and as he scrambled to his feet he excitedly cried: "That's Sarah; every inch."
