Heavy hogs, per cwt	5.62½ 5.87½
Sows, per cwt	4.50 5.00
Stags, per cwt	2.00 2.50

## SAMPLES OF GRAIN.

Another Distribution Will Be Made This Season.

An Ottawa despatch says: By instruction of the Hon. Minister of Agriculture another distribution will be made this season of samples of the most productive sorts of grain to Canadian farmers for the improvement of seed. The stock for distribution is of the very best and has been secured by the Director of the Experimental Farms from the excellent crops recently had in the Canadian Northwest. The distribution this spring will consist of samples of oats, spring wheat, barley, Indian corn and potatoes. The quantities of oats, wheat and barley to be sent this year will be sufficient to sow one-tenth of an acre. The samples of Indian corn and potatoes will weigh 3 lbs. as heretofore. Every farmer may apply, but only one sample can be sent to each applicant, hence if an individual receives a sample of oats he cannot also receive one of wheat, barley or potatoes, and applications for more than one sample for one household cannot be entertained. These samples will be sent free of charge through the mail. Applications should be addressed to the Director of Experimental Farms, Ottawa, and may be sent in any time before the 1st of March, after which the lists will be closed, so that all the samples asked for may be sent out in good time for sowing. Parties writing should mention the sort of variety they would prefer, and should the available stock of the kind asked for be exhausted, some other good sort will be sent in its place.

## RATS CARRY DISEASE.

Responsibility for Spread of Bubonic Plague Fixed.

A Victoria, B.C., despatch says:—Dr. Fagan, secretary of the British Columbia Board of Health, who went to San Francisco to investigate the reports regarding the bubonic plague, has made a report to the British Columbia Government in which he states that a force of men is employed at San Francisco in dissecting rats, and rats that have been found dead have shown plague bacilli when examined. He recommends that strict quarantine be maintained against vessels arriving from San Francisco.

Two hundred thousand Mauser rifles have been ordered for the Turkish army.

## GREAT DURBAR REVIEW.

Men of Many Tribes Pass Before the Royal Party.

A Delhi, India, despatch says:—The Viceroy, Lord Curzon of Kedleston, and Lady Curzon, and the Duke and Duchess of Connaught on Wednesday reviewed the retainers of the ruling chiefs in the Durbar arena. The variety of costume and paraphernalia afforded one of the most striking pictures of the Durbar festivities. Contingents from all parts of Greater India participated, mostly retaining the distinctive features of their customs. The flags and other emblems of the State of Cutch were carried on camels and elephants, accompanied by armed men on stilts, while Arab irregulars danced past the Viceroy to the music of their own instruments. The famous gold and silver guns of the State of Baroda attracted much attention. The ancient Mahratta flags, descended from the Mogul Emperors, were borne past on an elephant carriage. The martial Rajputs were clad in mail armour. State bands, camel kettle-drums, richly caparisoned elephants and horses, and agile swordsmen, many shouting battle cries, followed one another in quick succession. A royal elephant carriage, two storeys high, showed how the palace ladies accompanied the princes of bygone days. The retinue of the State of Kashmir included a fine detachment of cuirassiers and a huge giant. The great Sikh were represented by large, soldierlike bodies of men armed with maces, spears, match-locks and hand-grenades. Each contingent was headed by an elephant bearing a gorgeous howdah, in one of which the sacred book of the Sikhs occupied the place of honor. The book was guarded by the chief priest. The venerable Chief Nappa, escorted by men mounted on richly caparisoned horses, and accompanied by hounds and hawks, was a striking feature of the display, which for wealth and coloring, diversity of components and number of spectators may be considered to have been the most brilliant of the Durbar display.

## KING OF SPAIN SHOT AT.

While Driving in a Carriage From Church.

A Madrid despatch says: An attempt was made on the life of King Alfonso on Saturday night. A man fired at one of the carriages of the Royal cortege. Nobody was hurt. As the King and the Duke of Sotomayor, Grand Chamberlain of the Court, were returning from church, a man who was standing in the street fired a shot from a pistol at one of the carriages. He was immediately arrested. Nobody was struck. The King, on hearing the report, put his head out of the carriage window, but his mother immediately pulled him back into the body of the vehicle.

The prisoner when questioned gave his name as Feito. He said he intended to kill the Duke of Sotomayor, at whose carriage he aimed. His pockets contained the visiting card of the mayor of Madrid, receipts for several registered letters, and some unposted letters, marked "registered," addressed to President Roosevelt, King Edward of Great Britain, the Kaiser, the Czar and the president of the High Court of Justice of Mexico.

Feito said his wife was a French woman, and that at one time she had him confined in a lunatic asylum. He said he was not an Anarchist. He made his statement to the examining magistrate with perfect composure, but his words and actions showed clearly that he was out of his mind.

## BIG FIRE IN LONDON.

\$40,000 Damage to the McClary Works.

A London, Ont., despatch says:—Fire did \$40,000 damage at the McClary works here on Friday night. Originating by friction in an oiling machine in the tinware department, it spread rapidly to the upper floors of the four-storey building. Two hundred employes at work were compelled to beat a hasty retreat, but all got out safely. The fire was confined to the department in which it originated, chiefly owing to the presence of fire-proof walls. The fire service of the city was again proven to be inadequate, and it is probable that in this matter the fire will have a good effect. The heavy machinery on the ground floor of the damaged building was all saved, and the firm state that they will be in a position within a week to resume operations upon the usual scale. They have a large stock of manufactured goods, which escaped the flames, and claim that they will not be crippled by the fire. During the progress of the fire, Chief Roe was buried beneath a falling piece of cornice, and had a marvelous escape from serious injury. The loss is covered by insurance held in a number of companies.

Owing to the intense cold the water froze in the hose-pipes while the fire brigade was endeavoring to extinguish a fire recently at Marienburg, Prussia.

Prof. Koch goes to Rhodesia to study the cattle plague for the British Chartered South Africa Company, and receives as compensation \$250 a day and expenses.

## FARMERS' OPINIONS

On the High Tariff vs. Low Tariff Question.

Low tariff and high tariff letters in about equal proportions appear from week to week in a Montreal paper. In the last received two Northwest farmers express their opinions. One of them signing himself "Pam" advocates free trade. He says:—"Whether duties are high or low, two vital points must be considered as to who pays them or who gets them. Here I call to mind a remark of the present Premier when the Germans were threatening to place extra duties on Canadian stuff that they would pay them themselves, showing his opinion to be that the Government would simply take them from its own people and the Canadian would not sell his goods for less than usual. This would certainly be the case. The internal wheat raiser, say would raise his price and another section of the community would pay it, and the importer from other parts would take a like advantage. We may possibly make the foreigner pay us a duty by putting it on an export, if he can get the article no cheaper anywhere else and he must have it. Then he may bring his factory here to get the benefit and send the product across. Then our Government to save the situation must put an excise on it. If his own Government also exacts a duty it will make the product extremely dear. The manufacturer cannot export unless he can sell at a price that will pay the duty and leave him a fair living. Here he is helped out by the local dealer, who, according to fair repute adds the duty to what he could easily sell for internally and then wonders why the foreigner gets in and duns at the politician for more protection. The result is the same, only the purchaser has more to pay for the article, home or foreign."

Another Northwest farmer writes as follows:—"I came over the border a year ago with my brother, as we had heard much of the cheap farms not many miles from Wetaskiwin and are well satisfied with this country, but we miss the manufacturing towns we had so near our farms in Illinois. The great question here is the cost of transporting our farm products on the railways and on the ocean to distant markets. If there were factories in Alberta a large consuming population would soon grow up in this territory and we would not need to trouble ourselves very much about transportation. Alberta has every natural advantage for becoming a great manufacturing country. There is coal in abundance, the swift little rivers coming down from the mountains furnish cheap water-power. We know what protection has done for the farmers of the United States in building up manufacturing towns near them. My father bought his farm in Illinois for five dollars an acre. He recently sold it for one hundred and fifteen dollars an acre. The increase in price was due to the growth of manufacturing towns in the State. My father's farm was not near enough to the town to be sold in town lots. Its increased value was entirely due to the better market for farm products. However a friend of ours had a farm quite close to a manufacturing town. As the town grew farm lands were required for workmen's houses and he sold his farm to a real estate syndicate for five hundred dollars an acre. The syndicate divided it into building lots and I have heard that they made quite a pile of money out of it. If the Canadian Government would put up the tariff as high as the United States tariff we would soon have plenty of factories in Alberta. I was surprised to see in one of the Canadian newspapers that when the American farmers now pouring into Alberta became Canadian citizens they will force the Dominion Government to adopt free trade. Why should we vote for free trade in Canada when we have been voting for high protection all our lives in the United States?"

## DECREASE OF PUBLIC DEBT

Six Months' Revenue on Account of Consolidated Fund.

An Ottawa despatch says: For six months ended December 31 Canada's revenue on account of consolidated fund amounted to \$31,262,862, giving a surplus over all expenditures combined of \$7,589,199. The revenue exceeded the ordinary expenditure alone by \$1,713,174. Compared with the same period of 1901 the revenue shows a gain of \$3,579,007. The increase of ordinary expenditure during the same period was only \$467,457. The capital expenditure totalled \$4,123,975, or \$2,577,233 less than for the six months of the previous fiscal year. A decrease of \$1,510,270 was made in the public debt.

## BEANS FOR FUEL.

Are Burned in Indiana as a Substitute for Coal.

A South Bend, Ind., despatch says:—In South Bend anthracite or bituminous coal cannot be had at any price. People are burning beans at \$1.50 a bushel, and are satisfied that they are getting the worth of their money, as the beans make a hot fire.

# NEWS ITEMS.

Telegraphic Briefs From All Over the Globe.

## CANADA.

Lord Strathcona has given \$1,000 to Brandon College.
