The satisfaction of having the washing done early in the day, and well done, belongs to every user of Sunlight Soap.

## PAPERED WITH ENVELOPES.

A most quaint and novel way of papering a room has lately been invented by a young lady of more originality than taste. She has adorned the walls of her special sanctum with the envelopes of all the letters she has received for the last few years. These are, of course, of every conceivable shape, color, and size, and also bear all kinds of stamps and handwritings, so the effect is most odd. She has pursued no plan in regard to them, but has pasted them on the walls in all kinds of positions as soon as she received them. The effect is startling, but it cannot be said to be in any way artistic.

## A MAMMOTH WATCH.

A mammoth watch will be one of the features of the coming St. Louis World's Fair in America. It will have a polished metal case, and will be large enough to allow people to walk inside it and inspect the machinery. Its diameter is to be 75ft. and height 40ft., with neat stairways running all about. The balance-wheel will weigh a ton, and the hair-spring will be 300ft. in length and made of ten sprung steel bands, 2in. thick, bound together. The watch will be wound by steam regularly at a certain hour during the day.

## Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous services.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Blue Ribbon Tea is "hill grown" Ceylon tea.

The best tea because it grows slowly in the cool mountain air and obtains all the fragrance and deliciousness the plant can extract from a soil rich in these properties.

A nerve-nourishing tea—a sense-pleasing tea—invaluable for brain-workers—solacing and comforting.

THE RT. HON. JOSEPH CHAMBERLAIN AND THE MASAI WARRIORS.

REMARKABLE INCIDENT.

On the occasion of Mr. Joseph Chamberlain's recent visit to Mombasa, East Africa, a torchlight war dance by the picturesque Masai warriors was given in his honour. In this connection a striking incident, as showing the world-wide use of Holloway's famous remedies, is illustrated by the accompanying photograph, taken on the spot by a correspondent of *The Sphere*. Indeed,

**HOLLOWAY'S PILLS AND OINTMENT**

are used wherever the white man has set his foot.

The Masai warrior carrying his grease pot slung from the lobe of his right ear. The pot in this case was a HOLLOWAY'S OINTMENT jar, and the lobe of the ear had been stretched to get round the pot.

THE PILLS are a wonderfully prompt and effectual, but gentle and benign, remedy for all disorders of the Liver and Bowels. They cleanse and thoroughly regulate the system. Females should never be without them.

THE OINTMENT is the greatest healing agent known for Old Sores and all skin affections. Rheumatism and Sciatica yield to its influence quite magically, as also most throat and chest troubles.

Manufactured only at 78, New Oxford Street (late 533, Oxford Street), London.

## THE HORSELESS CARRIAGE

THE MOTOR CAR ENTERS MANY NEW FIELDS.

Lumbering Camp and Warpath Are Invaded by Horseless Carriages.

With the wholesale invasion of auto vehicles, and the consequent rejection of the slower means of transit, the horses are eating their heads off in their stalls, while steam engines and other primitive modes of locution rust away in idleness.

The day of the long faithful four-footed beast of burden, who has patiently dragged after him every kind of wheeled contrivance made by man, is gone with the appearance of auto power. Everywhere one turns one sees the horse and old time vehicles giving way to motor cars. A municipality runs by auto power street cleaners and sprinklers that penetrate the smallest and all trackless streets, a trolley company owns repair wagons so compact as to obviate the usual congestion caused by the original big, clumsy wagons, and store deliveries; a big item in the routine of every day life, are made in a small fraction of the time formerly consumed.

Then the need of the noisy trolley is done away with in many city streets—much to the relief of the inhabitants of the fashionable quarters—by the auto omnibus, which rolls swiftly and noiselessly through the streets and saves the time and patience of every one.

Besides this, by means of this all conquering power, the difficulties of hauling and making a way through trackless wastes and forests have been overcome by motor vehicles, when even the horses and wagons, going at snail's pace, could scarcely make way and the use of steam engines was an impossibility.

## WARPATH IS INVADDED.

Even the warpath is invaded by the horseless carriage, which leaves destruction in its wake while escaping from it.

This death-dealing carriage recently made its appearance in London in the shape of a round steel shell spiked on top with three formidable guns, as a contrivance for road and coast defence in time of either naval or land battle.

Its principle object is to act on the defensive on the coast roads, or with certain modifications for offensive work over smooth or rough roads; for keeping open lines of communication, hauling guns into position, or for carrying and hauling stores and men. As it is impervious to bullets of small caliber it may also be effectively employed to dampen street riots or for searchlight operations.

The main object of the car, however, is that of coast defence, and it could, if employed in sufficient numbers, make it impossible for any landing party of the enemy to come ashore, for this war car would soon be able to destroy or sink any invading forces.

The great mobility and therefore the great range of action, the fact of its being able to carry sufficient fuel for some 500 miles, the invisibility of the car itself, the absence of noise, as well as its general construction, all add to its great scope and utility.

## IN LUMBERING CAMPS.

Amid snow, ice, and trackless forests, lumbering and hauling logs are now carried on with the greatest ease and speed, for the snow traction auto, the biggest thing in automobiles, has successfully smoothed away all the difficulties attending the work.

This huge machine, in successful operation in Gen. Russel Alger's extensive Michigan pineries, plows its way through snow drifts and over rocks, stumps, everything in the way of obstacles in an uncleared country, leaving behind it a smooth and hard packed ice road. At the same time it carries an enormously heavy load of lumber and moves at the rate of about twelve miles an hour.

The big auto was made strictly for work and looks much like an unusually large box car, with doors and windows on all sides, and a big chimney protruding from the top.

The snow traction auto, however, is not the only machine that can overcome difficulties in transit.

Of even more importance in keeping a municipality up to the requirements of modern progress is the unique automobile street sweeper and sprinkler that a Frenchman gave to the world.

There are the trolley sweepers and sprinklers, to be sure, but this little

Keep Minard's Liniment in the House.

## French machine which has won such universal favor is far more serviceable—being small, compact, and manipulated equally well in highways and byways.

No tracks are needed for the running of this machine, which goes into places that have probably never felt anything but a semi-occasional scrub from the human street sweeper's broom.

A great advantage about the auto street cleaner lies in the fact that it raises not a particle of dust, and in sprinkling the streets it does not flood them, making passage disagreeable for pedestrians.

For speed and comfort in the way of street carriages nothing can exceed the automobile bus, which first made its appearance in London streets and has rapidly made its way into the popularity of other big cities on both sides of the Atlantic.

This auto-bus slows up for a passenger, and is off again, all in one-half the time it took the original bus to stop. The remarkable ease and facility with which the huge vehicle is made to thread its way through the crowded traffic of the city streets has been a great card in its favor among pedestrians, and the fact that it is self-controlled and needs no expert drivers has found favor in the eyes of street railway companies, so the automobile-bus has undoubtedly come to stay.

A company which supplies the railroad ticket offices and hotels with time tables, maps, and folders of all the roads runs an automobile Pullman car to make the rounds of the offices. On both sides of the vehicle are wooden compartments, or "pockets," closely resembling the pigeon holes of a railway mail car used for sorting letters. These pockets are filled with railroad and steamship folders, and two men in the car are busily engaged in selecting an assortment of the folders, carrying them into the ticket office, and placing them in the standing racks.

The neat racks are furnished and kept filled by the one concern without trouble to the roads, and within twenty-four hours after a change in train schedules the new time tables are available to the traveling public.

## WHISTLING IN CHURCH.

The Rev. P. Bilderback, of Millville, New Jersey, has introduced a choir of thirty young whistlers into his church. On their first appearance the boys in the gallery and several of the congregation joined in. The discord was so painful that many ladies left the church.

Amy: "Poor Mr. Billion has been in a railway smash and is sinking fast." Della: "Dear me! How sad. And I only refused him last April!" "Bridget, did the dog eat much when he got into the pantry?" "Shure, mum, he ate everything but the dog biscuit."

Lever's Y-Z (Wise Head) Disinfectant Soap Powder is a boon to any home. It disinfects and cleans at the same time.

A slow-match is made of rope steeped in a solution of saltpetre and lime water.
