HOW DISCOVERIES ARE PLIED TO COMMERCE.

Uses of X-rays in the Pearl Fishery-Radium-rays for Mediical Purposes.

Learned men and women are so busy trying to make startling finds in the various paths of scientific knowledge that the average person is showing signs of weariness at being wsked to follow them so rapidly.

It seems but yesterday that the great Finsen light came into prominence, followed by Rontgen's great discovery of the X-rays, which in its joined the ranks of the great army turn was supplanted by the Curies' discovery of radium, to be followed Dodd's Kidney Pills. Mr. Thomas again by the finding, by Professor gives his reasons for doing so as fol-Blondlot, of other hidden rays. The lows: tatter discovery, which is the last of the family, brought into being the flicted with Kidney Trouble, having lin. rays that are now called the N-rays; many of its worst symptoms in an band returned to prison; he but there appears to be some doubt aggravated degree. I had Lumbago, as to whether these are well authen- and was in such a condition that ticated.

All those finds are extremely inter-time. esting, because of the fact that each 'Insomnia resulted and I was en apparently has its own mission to intense sufferer. I had almost perperform in the world of commerce, petual headache and grew thin in of science, and of medicine. What flesh. mission in particular each may have "I had been treated by a doctor is now being tested and found out without good results, so upon the by the savants of every branch of recommendation of a cousin, who had science all over the world.

THEIR COMMERCIAL USES.

The practical person might ask: But what is the practical use of all these wonderful scientific "finds"? They come in here. The discovery of the X-rays, for instance, is one of the oldest, and scientists have been experimenting with it longer than with anything else of the same nature. Apart from the medical uses of the X-rays-and there is no question that in the practice of medicine and surgery hundreds of lives have already been saved and deathbed miracles performed by the X-rays-Rontgen's "find" is already being junior clerk knows; but with the made useful in the world of com- Becquerel rays in use the process is merce, where everything is positive and matter of fact.

Take the pearl industry. A new being taken. application of the X-rays has been discovered by Professor Raphael Du- of a second, and nothing more need bois, of Lyons. In the pearl-fisher- be done. The X-rays have been apies there takes place every year a plied to the same purpose in insurwholesale destruction of oysters and ance offices. incipient pearls. To ascertain the size of a pearl it was necessary, of course, to open every oyster. The death of the oyster naturally followed, and-as in nine cases out of ten the others, if we admit the fact of the pearl was too small, or was only their discovery. Radium-rays, howin the incipient stages of formation -both the cyster and the pearl had to be thrown away. Thousands of pearls have thus been lost in that way, and they might have been saved if the fishermen could only have had some means of examing an oyster

BEFORE OPENING IT.

. We write the above paragraph in the past tense for a very good reason. As a matter of fact, the custom of opening every oyster, just to see what sort of a pearl is nestling lasting. At the best, they are only within the shell, is carried on at every pearl-fishery. In a short while, however, the new system will be coming in; and this consists of examination by the help of the Xrays, and by them it will be possible to tell the size of the precious pearl know it," he said. "I have a very without opening, and thus killing the sensitive tooth, which is liable to valuable crustacean. If the rays ache if I do." "What do you mean, discover that the treasure within the sir ?" "Why, you are so sweet, you shell is yet only half grown, the liv- know !" ing oyster will be replaced in its lodgings by the sea, and left till its hidden treasure has grown to its proper size.

This must mean more pearls than as mercury will surely destroy the sense shoes one dollar seventy-four." usual being placed on the market, of smell and completely derange the and their price will come down, and probably no more "corners" in should never be used except on pre- MRS. WINSLOW'S SOOTHING SYRUP has been used by pearls will be heard of.

Now, what is possible for the Xrays to do is possible for any other | from them. Hall's Catarrh Cure, mankind of rays already discovered, or on the eve of discovery. For a while they will be the property of the scientists, and they will have only a scientific value on the account; but it is clear that sooner or later Ohio, by F. J. Cheney & Co. Testiother rays will be found to possess perhaps an even greater commercial value than the X-rays.

X-RAYS AS DETECTIVES.

Telling criminals by their thumbmarks is an especially valuable adfunct to the detection of crime, but Bertolet's happy discovery is some what scientifically lessened in importance by the fact that the X-rays are now frequently employed by the minlons of the law in their hunt for evildoers. Germany is first in the field with that bright idea.

To avoid detection, thieves all over the world, it is well known, think little of swallowing precious stones, the more artful being able to retain them in the larynx. A well-dressed man, according to a Kieff journal, was arrested in that city the other day for personal incapableness: but it turned out that he had meen drugged, rendered insensible, and then robbed.

The German police were soon on the track of the suspected thieves, and five men were arrested the same afternoon. Nearly £100 was found upon them, and by means of the Xrays the best part of the balance was found. The latter treasure consisted of diamonds, which the thieves

spent by every business house in the process of copying letters. It is long and tedious process, as every expedited, and is much cleaner, whilst there is no fear of a bad copy These rays are able to photograph letters in the fraction

RADIUM TO THE FORE.

It is only a question of time as to whether the N-rays will be fathered upon commerce in the same way as ever, seem to be more adapted for medical purposes. It is devoutly hoped by many a medical man in this country that that may prove the panacea for two of the greatest scourges that afflict humanity. That they have already done some good in cancer is reported from more than one hospital; whilst in a certain painful nasal disease radium-rays have effected a surprising cure. No one can say with any certainty, however, whether cures by radium are successful experiments; but the belief is universal that they will be lasting remedies.-London Answers.
