## TOYS TEACH MUSIC.

Novel Method of Teaching Music to Little Children.

Miss A. Seppings, L.R.A.M., gave an exhibition of her method of teaching music to little children at Cavendish Rooms, Mortimer street, London, England, recently. She instructs by means of cubes, on which the various short notes are inscribed.

Miss Seppings tells the children that the demi-semi-quaver has a head, one leg, and three feet, so that it can run very fast, and that the semi-quaver has only two feet, because it does not run as fast as the other. By shifting the cubes according to her direction the children see that it takes two demi-semi-quavers to equal one semi-quaver, and so on.

"All children love bricks," says Miss Seppings, "and it is therefore easy to interest them in music by this method. Children of four or five can learn to read, play, and transcribe little pieces in one term."

Host (a trifle nervous about the effect of his guest's wooden leg upon the polished floor): "Hadn't you better come on the rug, major? You might slip there, you know." The Major: "Oh, don't be afraid, my boy; there's no danger. I have a nail in the end of it."

Much distress and sickness in children is caused by worms. Mother Graves' Worm Exterminator gives relief by removing the cause. Give it a trial and be convinced.

A gentleman courted a lady for twenty-eight years, and then married her. She turned out to be a perfect virago, but died two years after the wedding. "ow," said our friend, in a self-congratulatory tone, "see what I escaped by a long courtship."

Cholera and all summer complaints are so quick in their action that the cold hand of death is upon the victims before they are aware that danger is near. If attacked do not delay in getting the proper medicine. Try a dose of Dr. J. D. Kellogg's Dysentery Cordial and you will get immediate relief. It acts with wonderful rapidity and never fails to effect a cure.

## SAW HER FIRST.

Visitor: "Willie, tell your mamma that I have come to call on her."

Willie: "Mamma's not at home."

Visitor (shocked): "Why, Willie, I'm sure I saw her looking from the parlor window as I came up the street."

Willie (stoutly): "No, you didn't neither. That was Sis peering through the parlor blinds. Mom saw you coming from up stairs."

Dibbs (facetiously): "This is a picture of my wife's first husband." Dobbs: "Great snakes! What a brainless-looking idiot! But I didn't know your wife was married before she met you?" Dibbs: "She wasn't. This is a picture of myself at the age of twenty."

The Wretched Condition of thousands is due to the fact that they neglect the simplest care of their health. When in this condition "Ferrovin" will build you up and give you strength.

Gregson (in alarm): "Great Scott! I've left my purse under my pillow." Fisher: "Oh, well, your servant is honest, isn't she?" Gregson: "That's just it—she'll take it to my wife."

To Prevent is Better than to Repent. A little medicine in the shape of the wonderful pellets which are known as Parmelee's Vegetable Pills, administered at the proper time and with the directions adhered to often prevent a serious attack of sickness and save money which would go to the doctor. In all irregularities of the digestive organs they are an invaluable corrective and by cleansing the blood they clear the skin of imperfections.

## INVERTED.

"Did you notice that the dead man's physician was riding in the first carriage after the hearse?"

"Yes; it's the first time I ever saw the cause follow the effect."

## FRENCH LABOR WAR.

Effects of Industrial Agitations Benefit Large Firms.

The labor conflict in France still continues. The workmen declare that they are determined to struggle until the employers capitulate, while the employers apparently equally determined, declare they will not make any concessions. Some of the French industries are very much demoralized.

The labor agitations in recent years are said to have had an important effect in leading to a "concentration of industries." In 1896 there were 2,344,471 independent establishments in France; in 1901 the total number of such establishments was 2,245,356, a diminution in five years of nearly 100,000 establishments. The number now is said to be very much smaller. The small establishments are reported to have been the ones which have largely gone out of business. During the period of 1896 to 1901 no less than 102,355 small firms disappeared, while establishments employing from 21 to 100 workmen increased by 2,535, and the number of large firms, employing more than 100 workmen each, increased from 3,081 in 1896 to 4,628 in 1901. The present agitation with a demand for shorter hours and increased wages is said to have added greatly to this concentration of business in certain lines to the large firms.

Holloway's Corn Cure destroys all kinds of corns and warts, root and branch. Who, then would endure them with such a cheap and effectual remedy within reach?

At the age of 25 a girl is willing to marry a widower with one child, at 30 she will tolerate two children and at 35 she doesn't care how many he has.

Comfort by day and sound sleep by night follow the use of Weaver's Cerate, for skin troubles, no matter how tormenting they be. This ointment soothes and cleanses.

She: "What is meant by the pipe of peace?" He: "Can't imagine. Never yet smoked a pipe in the house but my wife made a fuss about it."

Biliousness Burdens Life.—The bilious man is never a companionable man because his ailment renders him morose and gloomy. The complaint is not so dangerous as it is disagreeable. Yet no one need suffer from it who can procure Parmelee's Vegetable Pills. By regulating the liver and obviating the effects of the bile in the stomach they restore men to cheerfulness and full vigor of action.

Fellow-Passenger: "Pardon me, your necktie has been sticking out for some time. I refrained from telling you sooner because those young ladies seemed so much amused." Farmer: "Thankee; an' the oil from that lamp has been droppin' on that light overcoat o' yours for the last ten minutes, but everyone seemed so tickled that I hated to spoil the fun."

## NO DIFFERENCE.

Dr. Leonhardt's Hem-Roid cures any form of Piles. Internal, External, Bleeding, Blind, Itching, Suppurating, etc., are simply names of the stages through which every case will pass if it continues.

Piles are caused by congestion of blood in the lower bowel, and it takes an internal remedy to remove the cause.

Dr. Leonhardt's Hem-Roid is a tablet taken internally, and no case of Piles has ever been found it failed to cure. Money back if it does fail.

\$1.00 at any dealers, or The Wilson-Fyle Co., Limited, Niagara Falls Ont. 11

Old Flink: "I doubt if one man out of twenty can recall to memory the language he used in proposing." Young Stewpid: "Probably not. But the girl can. Mine did. When the breach of promise suit came up she was able to repeat my proposal word for word."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

## LOWEST BIRTH RATE.

The lowest birth rate in any first quarter of a year since civil registration was established was recorded during the first three months of the present year, according to the quarterly return of marriages, births, and deaths in England and Wales. The actual number of births during this period was 237,396, in the proportion of 27.9 annually per 1,000 of the population. In the ten preceding first quarters the mean rate was 29.2. While the birth rate has fallen so heavily, it is a remarkable fact that, owing to an even greater decline in the death rate the natural increase of population in England and Wales during the quarter was 96,934, as compared with 96,934, as compared with 96,758, 87,166 and 89,740 in the first quarters of 1903, 1904, and 1905 respectively.

## VICTORIAS FIRST WHITE WOMAN.

The Colony of Victoria, Australia, is still so youthful that the first white woman who set foot upon its soil, Mrs. Stephen George Henty, has only just died. She was born at Stokesby, Yorkshire, in 1816, and went with her mother to Western Australia, where at the age of twenty she married a Swan River pioneer, Mr. Henty. Soon afterwards they moved to Tasmania, and thence sailed in a small vessel which reached the bay at Portland one Sunday night in June, 1836. In the moonlight Mrs. Henty was carried ashore through the surf, and thus achieved the distinction of being Victoria's first white woman, as her son, born in August, 1837, was the first white male native of the Colony.

## "INHUMAN" SUNDAY.

London Vicar Sees Little Use in "Smart Set" Crusade.

The vicar of Holy Trinity, Sloane street, London, England, in a sermon recently, said he could not see much use in the denunciation of the "smart set." He could not accept the Puritan idea of Sunday, which was an idea of 200 years ago, and seemed almost inhuman. Nor was it the continental Sunday we had to dread, but the secular Sunday.

The type of character formed by the passion for the motor-car and the social excitements of the day was not, he said, so much the desperately wicked as the rapid, weak and fibreless. Social pleasures and conditions now-a-days tended to produce not so much the militant desperate wickedness for which perhaps some other times might have been noted, as the thoughtless, lazy and frivolous type of degenerate; people of no deep convictions, no earnestness or honesty of purpose.

Those who indulged the most in Sunday exercises and recreations were not always those who needed them the most. English people were often warned against the continental Sunday, but from his own observation that Sunday was not nearly so bad as some made it out to be; the element of reverence, of worship, was always present.

No loss could be greater to any people than the loss of the habit of public worship. The great mark of a nation's worth was the mark of worship. No man could give himself up to selfish, thoughtless, frivolous enjoyments without suffering terrible deterioration.

The Crick in the Back.—"One touch of nature makes the whole world kin," sings the poet. But what about the touch of rheumatism and lumbago which is so common now? There is no poetry in that touch, for it renders life miserable. Yet how delighted is the sense of relief when an application of Dr. Thomas' Electric Oil drives pain away. There is nothing equals it.

He: "Before you married me you used to say there wasn't another man like me in the world." She: "Yes; and now I shouldn't like to think there was."

## MUSKOKA THE BEAUTIFUL.

Do you know the place? If not, your pleasure has suffered. Take a free trip, a mental little journey through Muskoka by asking for that handsome Muskoka Folder issued by the Grand Trunk Railway System,—it contains a large map, lots of views, and a fund of facts. Take the journey some evening after supper with your wife and children. Then slam the door on the doctor for 1906 by taking your family on a real journey through the Muskoka District this summer. Less than a day's journey from principal American cities. The Ideal Family Resort. For all particulars and handsome illustrated publication free, apply to J. D. McDonald, Nion Station, Toronto, Ont.

## A HUNDRED TONS OF WATER.

Rainfall is a condition which has much to do with our health. A wet district with a good deal of subsoil water, making houses damp, is a locality in which rheumatism and consumption are likely to prevail. Over England and Wales the average yearly rainfall is about 34in., in Scotland it reaches 46in., and in Ireland about 38in. Possibly the wettest parts of Britain are in Cumberland, where the rainfall may attain 150in. per year. One inch of rain on one acre of ground means a hundred tons of water.

## PHOTOGRAPHING A BULLET.

Dr. Riegler, of Budapest, has made a very curious experiment in photography, and one that to many people will appear almost incredible. He photographed a bullet after it had been fired from a rifle, and while it was proceeding with a velocity of 440 metres—rather more than a quarter of a mile—a second. A regular infantry rifle was the weapon selected for the purpose of conducting the experiment, which was in every way successful, a perfect reproduction of the bullet being the result. A horse at full gallop, a swallow in its flight, and even a flash of lightning have succumbed to the photographer's art, but his last triumph is still more marvellous.

# Libby's Food Products

make picnics more enjoyable by making the preparations easier.

Easier to carry; easier to serve; and just right for eating as they come from the can.

Libby's cooks have first pick of the best meats obtainable—and they know how to cook them, as well as pack them.

If you're not going to a picnic soon you can make one tomorrow at your own table by serving some sliced Luncheon Loaf. It is a revelation in the blending of good meat and good spices.

Booklet free, "How to Make Good Things to Eat." Write Libby, McNeill & Libby, Chicago
