"How often do we hear it said of the fate of nations that it is trembling in the balance, ready to be moved this way or that by the slightest touch? And if this can be true of nations how much more may it be true of individuals, who may be swayed, their fortunes for the time settled, or their whole conduct of life determined by the slightest cir-

"Coming back now to cold plates. You take a man who has worked hard and been hurried all day and who comes home at night tired and worried and whom a square meal would brace up mightily and cause this life is not a road strewn with him to take a new view of life and to set his face in the right direction, and you give this man a good dinner with hot plates and don't you see that you head him up right and confirm in him his good impulses? You nail him, so to speak, you start him off right, and you keep him going right; and there's a man saved.

"And now you take that same man and give him his dinner on cold plates; and that may be the last straw that breaks the camel's back, and he may get peevish over it, and not enjoy his after dinner smoke, and get so wrought up that he doesn't sleep well that night and wakes up the next morning and goes to business already tired out and not fit to do anything, so that he loses his temper and is cross and irritable, and misses every play he makes and goes from bad to worse and winds up maybe by killing somebody before the day is over. All this is absolutely attributable to cold plates.

"So of major crimes such as murder and that sort of thing; but when it comes to little things, such as plain sulkiness and kicking over chairs at home, and being cross to the children and making your wife unhappy and causing gloom to settle on the household generally, why, these cold plates have crimes to

answer for innumerable. "Tall oaks from little acorns grow, mill-dams break and spread their devastating waters from leaks that at first you couldn't put your little finger through, and I have no doubt that many disturbing, distressing, harowing things have been primarily due to so small a thing as cold plates, which indeed, as I have More little lives are lost during said, I believe to be the one most

> "And taking this view, what a responsibility rests upon those whose duty it is to see that the plates are hot! For the good of humanity, if not for our own comfort, well being and happiness, give us hot plates!"

THE EARTH'S XENOGE ESIS.

(By a Banker.)

In the earlier epochs of its history, the aspect of this earth of ours was subject to continued and violent changes. In that remote period far tures, mighty beasts, the largest of ment due by all who will accept away down the dim vista of the past, which - the Atlantosaurus - was Him as their Redeemer.
