

### AMERICA'S EX-CHAMPION WRESTLER

SAYS: "After my great wrestling match with J. Mellor, of Staleybridge, at the Crystal Palace, England, for the International Championship, I was covered with cuts and bruises. I applied my favorite balm, Zam-Buk, and in a marvellously short time the abrasions and cuts were healed and I was fit and well again. At another time I had a piece of flesh almost torn completely off my arm above the elbow. I anticipated being unable to do anything with the arm for a long time. To my delight, however, Zam-Buk closed up the wound in two days. In three days it was covered with new skin, and a few days after, there was no trace of the injury. I recommend Zam-Buk for cuts, bruises or skin injuries of any kind.

Yours truly, HUGH LANNON.

The above testimony given by Mr. Lannon when visiting Toronto shows the great value of Zam-Buk for injuries received in out-door sport.

Baseball, Football and Lacrosse players should always keep Zam-Buk handy. It prevents cuts and injuries "taking the wrong turn." It stops the pain and smarting, and heals. It is also an excellent embrocation, curing stiffness, sprains, twists, etc. Used and recommended by Sherring, the Marathon winner; Madrali, the world's second greatest wrestler, etc.

### DEVICE TO RECOVER GOLD.

Sunk 100 Years Ago in a British Warship.

To the mouth of the River Colne, off Brightlingsea, England, an extraordinary machine was towed and anchored the other day. It is to be used in a final attempt to recover the \$2,500,000 treasure of gold, in coins and bars, which is said to have gone down in the British warship Lutine in 1797, near the Island of Terschelling, off the coast of Holland.

A portion of the treasure has been recovered, but an ordinary dredging plant is now useless, as the vessel has sunk into the sand. The new device is a great steel tube nearly 100 feet in length, and wide enough to allow a man to walk erect down its centre. At one end is a metal chamber provided with windows and doors, and at the other a medley of giant hooks and other tackle.

The apparatus has just been completed, after years of work, by Messrs. Forrest and Co., shipbuilders, in their Wyvenhoe yard. "One end of the tube," explained a member of the firm, "will be clamped to the side of a steamship or barge. The other end, by means of water ballast tanks, will be sunk until it touches the bottom. Then, by means of compressed air, all the water will be forced from the chamber at the bottom of it, which will be flush upon the bed of the sea.

"Divers will walk down a stairway in the centre of the tube until they reach the submerged chamber. Here they will don their diving costumes, and, opening a series of watertight doors, will step straight out into the water. Engineers will be stationed in the chamber, and following the instructions of the divers, who will communicate with them by means of portable telephones, they will operate the mechanism of two powerful suction pumps or dredges which are fitted to the sides of the tube. These dredges, it is hoped, will suck away the sand around the sides of the heavy chamber until it gradually sinks by its own weight right down on the dock of the wrecked ship. Then the divers, making their way from the chamber to the deck of the ship, and thence to the hold, will be able to transfer the treasure from the ship to the chamber by easy stages."

### FLIES AS GERM CARRIERS.

Therefore Keep Food Under Screen in Darkness.

Flies hate darkness, and have been shown by experiment to lose all interest in even the most tempting food if there is no light.

Advantage should be taken of this characteristic of the fly, and the larder should be in such a location that the food may be kept in darkness besides being thoroughly protected from fly contamination by the use of efficient fly screens.

The normal healthy person rarely allows a fly to come into intimate contact with the easily infected mucous membranes of his mouth, nostrils or eyes, so it is by food contamination that these germ-carriers do their greatest damage.

We may not be public spirited enough to attempt in any practical way to prevent flies breeding in our stables, but since recent scientific investigations have proved the possibilities of the fly as a disease carrier the mere human instinct of self-preservation should make us take every precaution to keep existing flies from coming into contact with people suffering from germ diseases.

A few shillings would pay for serviceable fly screens for the typhoid patient's room and for the kitchen and larder as well.

Flies have been placed in a large sterile bell glass under which a small dish containing a gelatine culture of live typhoid bacilli has been put. After waiting until the flies have walked about on the typhoid culture this has been gently withdrawn and a dish containing carefully sterilized gelatine has been inserted in its place. After the flies had walked about on this sterile gelatine the dish was removed and put under conditions of moisture, temperature, etc., suitable to the growth and development of typhoid bacilli if any were present. In a long series of such experiments in nearly all cases, bacilli grew and multiplied on the gelatine medium which had been quite sterile until contaminated by the flies.

Since we cannot hope absolutely to exterminate the species, a single member of which can carry enough bacteria to devastate an army, precautions must be taken to keep the fly away from the sick as much as possible—by means of fly poison solutions and by screen, and also away from food.

### NAILS MEND BROKEN LIMBS.

French doctors have found an ingenious but simple remedy for fractures, in the use of aluminum nails. For a simple fracture of the shinbone, or of the thighbone, a nail of nickel aluminum or magnesium is driven in to hold the two pieces together. Nails of ivory and bone have been used, but it has been discovered that the aluminum and magnesium nails are absorbed by the system after they have performed their function.

The great ocean liner rolled and pitched. "Henry," faltered the young bride, "do you still love me?" "More than ever, darling," was Henry's fervent answer. Then there was an eloquent silence. "Henry," she gasped, turning her pale, ghastly face away, "I thought that would make me feel better, but it doesn't!"

### THEY ALL BELIEVE IT.

One Bible truth there is in which Girls have abiding trust; Our wives especially believe That man is made of dust.

The Flagging Energies Revived.—Constant application to business is a tax upon the energies, and if there be not relaxation, lassitude and depression are sure to intervene. These come from stomachic troubles. The want of exercise brings on nervous irregularities, and the stomach ceases to assimilate food properly. In this condition Parmelee's Vegetable Pills will be found a recuperative of rare power, restoring the organs to healthful action, dispelling depression, and reviving the flagging energies.

The average married woman is well aware of the fact that she earns all the money she gets—and then some.

Preacher—"When you're tempted to drink, think of your wife at home." Henpeck—"I do—and that's what drives me to drink."

Every time a married man starts to settle down his wife stirs him up.

"Man is Filled With Misery."—This is not true of all men. The well, sound of lung, clear of eye, alert and buoyant with health, are not miserable, whatever may be their social condition. To be well is to be happy, and we can all be well by getting and keeping our bodies in a healthful state. Dr. Thomas' Electric Oil will help all to do this.

It is easy to prevent failure; all one has to do is refrain from trying.

Spinsters know a lot of things they imagine they would do if they were wives, but as a matter of fact they wouldn't do anything of the kind.

### THAT'S IT.

"Thomas," said Major Hartigan, as he gazed into his son's eyes with a soul-searching look, "have you eaten any of those peaches your mother put in the cupboard?"

"Father," said Tommy, "I cannot tell a lie. I have not touched one."

The Major eyed him wrathfully as he plunged his hand into the pocket of his coat and drew forth five incriminating stones, which had once been enshrined in the luscious flesh of a peach.

"Then how is it," said the parent, "that I find these peach stones in your bedroom, while there is only one peach left in the cupboard?"

"Father," said Thomas, as he silently but swiftly left the room and placed a chair in such a position that his father would fall over it if he followed too quickly—"father, that is the one I never touched."

### ART NOTE.

Although women pretend to dislike flattery, they invariably want their photographs retouched.

Sleeplessness.—When the nerves are unstrung and the whole body given up to wretchedness, when the mind is filled with gloom and dismal forebodings, the result of derangement of the digestive organs, sleeplessness comes to add to the distress. If only the subject could sleep, there would be oblivion for a while and temporary relief. Parmelee's Vegetable Pills will not only induce sleep, but will act so beneficially that the subject will wake refreshed and restored to happiness.
