FROM BONNIE SCOTLAND

OF INTEREST FROM NOTES HER BANKS AND BRAES.

What is Going On in the Highlands and Lowlands of Auld Scotia.

The death rate in Perth in December was 13.6 per 1,000.

There were 2,137 criminal offences

committed in Paisley last year. Renfrew has now a population of 12,355. It has gained 3,000 since

the last Government census. All the linen factories in Dunfermline are on full time. It is over a year since a similar activity

prevailed. Galashiels Town Council have bought for \$10,000 the property in Channel street, to widen the street.

Over \$46,455 has been spent on Ladybank drainage and water schemes. They are nearing completion.

Last year Galashiels had 271 births, 91 marriages and 179 deaths, and Selkirk 158 births, 46 marriages and 94 deaths.

established in Hawick, and the sisters will come from the Dominican sciatica, and neuralgia. All drug-Convent of Stone, Staffordshire.

At a meeting of over 2,000 ratepayers of Glasgow recently, a resolution was passed protesting against the proposed alteration in charges for stair-lighting.

Scottish iron and steel makers resolved to stop work rather than pay the proposed demurrage charges for railway waggons, etc.

Hamilton Corporation will pay all workmen for holidays, half-pay is to be given to employes in cases of sickness, while foreman are to be paid full money when ill.

Isabella Beatts was fatally or consciousness. strangled in the works of Valentine Sons & Co., photographic publishers, Dundee. The moving machine caught a scarf she was putting on

and dragged her in. The death occurred of Mr. George Syme, who, for nearly half a century, was the principal tacksman of the burgh land at Kinghorn. Mr. Syme, familiarly known as have to acquire these gifts through "Kinghorn Geordie," was over 90 the exercise of close intellectual

years of age. There is about to be erected a

> "I have taken Scott's Emulsion for six weeks and have found it a wonderful remedy. Before I took the Emulsion I had no appetite; was weak; had lost nearly fifty pounds of flesh, and now I eat well and am gaining every day. I find Scott's Emulsion to be very easily digested and a good food for all weak people."-FLORENCE BLEEKER, No. 1 Myrtle Avenue, Bridgeton, N. J.

This is only one of thousands of

cases where

has given an appetite. It's so easily digested that it doesn't tax the digestive organs and they rest; yet the body is wonderfully nourished and built up. The digestion is improved—then ordinary food is sufficient.

Growing boys and girls, who need so much food to keep them well and strong, and also growing, should be given a bottle of Scorr's EMULSION every few weeks. It does wonders for them. It prevents their getting run down and spindly. Nothing does them so much good.

At a meeting in Glasgow the Certres Which Attend Always to Same Details.

Habit is the acquirement of a machine-like or automatic power of performing certain duties. Actions which we have at first to exercise our intellectual centres to be able to perform are ultimately discharged without any reference to our mind

Indeed when the intellect comes to interfere with the automatic performances of such acts, says the London Illustrated News, they are apt to be less perfectly executed than when the machinelike activity of brain is permitted to have its sway. Take the case of reading, writing and spelling; at first we attention; later on they are automatically performed.

We do not after the childish stage of education require to bethink ourselves over the shape of letters. the sound of syllables or the formation of words by act of the pen. Clearly what was at first an intellectual act has become purely mechanical.

Also in exercising the other "R" and in doing a sum we arrive at a correct solution without having to think out the rational of the operation, as we did when taught arithemetic at school. The saving to the intellectual centres which deal with questions and affairs of every moment must be enormous in consequence of this division of labor. The centres in question are left free to exercise judgment and to engage in the highest operations of our conscious life.

In the brain structure we actually find centres which discharge these automatic duties and play the part of private secretaries to the head of the mental firm. Even when we come to higher brain operations a like principle prevails.

Centres are set apart for governing muscles, others receive messages from organs of sense, and others again, sitting in the judgment seat, report upon information received.

THINGS WE CAN DO WITHOUT

we think most needful are really their policies. of paper and write down all the 856.65, an increase of \$314,383.91, things you "want." Make the list exclusive of guarantee capital. as full as your desires are. Put this list away for one hour, then including guarantee capital, now look it over. Cross out the things you think you can do without, and in another hour revise the list once reserves and all outstanding claims more. Next pick out the things is \$3,045,786.00, showing the handyou feel you cannot afford to buy. Then, with a mind determined to be level and sensible and pratcical, go over the list once more. What is the result? Try it and see.

A FOND RECOLLECTION.

or Pork Chops.

"I have wondered sometimes," said the amiable head of a voracious city family, "why we didn't have more griddle cakes, wheat and buckwheat, and that sort of Zam-Buk Cures a Bdy who Suffered thing in our house, because I am very fond of such cakes, and so are all the children, and of buckwheat cakes in particular I have a very pleasant recollection.

"When I was a boy we used to have always buckwheat cakes for time to prove Zam-Buk's healing breakfast in winter, with fried pork chops or fried sausages, and I used to think that that was a breakfast good enough for anybody, and I still think so.

"The cakes we used to mix in a

Great Inventions.

Some of our most useful mechanical appliances owe this rexistence to the ingenuity of children in fashioning their playthings. Argand, who invented a lamp with a wick fitted into a hollow cylinder, was one day busy in his workroom; sitting before the burning lamp, his by placing a bottomless oil flask over different articles. Su'denly he placed it upon the flame of the lamp, which instantly snot up the long circular neck of the flash with increased brilliancy. Argand did not allow such a suggestive occurthe lamp chimney almost immediately came into his head, and in a short time his invention was perfected.

The telescope owes its origin to a similar occurrence. The children of a Dutch spectacle-maker happened Sunday. to be playing one day with some of shop door. Placing two of the glasses together, they peepel eyes. They were naturally puzzled, This company offers policy-hold- and called to their father to see the

His one absorbing interest was agriculture, as it had been that of his father.

SPENT A MILLION

When the latter succeeded to liams' Medicine Co., Brockville, Holkham much of the estate was a mere barren rabbit warren, some of it unredeemed marsh lands. Father and son, in almost equal amounts, spent well over a million sterling in improving and developing the estate. Holkham is regarded as the cradle of English farming of the advanced type.

Holkham was the birthplace of enlightened estate management and agricultural practice. There was introduced into farming the four course shift, turnips, barley, clover, wheat, practised in East Anglia to this day. To the Holklittle brother was amusing himself ham sheep shearings at the end of the eighteenth and beginning of the nineteenth century can be traced the origin of the show system that has done so much to improve live stock. It is acknowledged that the efforts of these two Earls of Leicester placed English agriculture in rence to escape him. The idea of the front rank throughout the world. To Holkham went the most eminent agriculturists of England and from abroad to see what was being done and to exchange ideas.

Thus it may fairly be said that the greatest farmer in England died on

SAVED BABY'S LIFE.

Mrs. T. Osborn, Norton Mills, Vt., says:-"I have no hesitation in saying that o Baby's Own Tablets saved my baby's life and I cannot & say enough in praise of this medicine. He was so weak and sickly that he took no notice of anything, and cried so much that I was worn out caring for him. After giving him the Tablets there was a great change, and he is o now a bright-eyed, laughing baby, the pride of our home.' Baby's Own Tablets cure all b stomach and bowel troubles, break up colds, destroy worms and keep little ones o healthy and happy. Sold by * medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., ♦ Brockville, Ont.
