A COLLEGIATE APPOINTMENT.

The Weekly British Whig of Kingston of August 4 contains the following:—"The management committee of the Board of Education met last evening and appointed S. H. Henry, M. A., Toronto, formerly of Morrisburg, as assistant science master. The salary from both collegiate and faculty of education sources will be \$1400. Mr. Henry is a recent Queen's University graduate and is highly regarded."

THE CROP THAT PAYS.

No farmer can make the broad statement that one crop pays better than another. The amount of the return depends largely upon the character of the land on which the crop is grown. One kind of land brings the greatest return from a certain crop; another piece of land of different quality would perhaps yield a very small return if sowed to the same crop. Finding out the particular class of crops the land is best suited to growing is therefore a very important matter for the wide-awake farmer.

A splendid example of what can be gained by the intelligent adaptation of crops to soil conditions is to be found in the county of Norfolk, Ontario. In certain parts of that county there are considerable areas of sandy land that cannot hope to compete with heavier richer soils in the growing of wheat and other staple grains. Thus, farmers who attempted to grow these crops found that their profits were not as satisfactory as might have been desired. Some years ago, however, a few men noted that the climate and soil of the county were well suited to growing fruit, especially apples. The Norfolk Fruit Growers' Association was formed and forthwith started on a reputation making campaign. All members agreed to care for and spray their orchards as stipulated by the rules of the Association. Incidentally, too, all fruit was to be marketed through the central agency. The results have been little short of phenomenal. The orchard acreage has been largely increased, Norfolk apples are now held as second to none in the markets of the world and the profits have been most gratifying. As a consequence, land values, in the last six years, have doubled.

And this has been accomplished mainly by selecting the crop best adapted to the soil. The work that the Commission of Conservation has undertaken, of classifying lands according to the character of the soil to determine what crops can most profitably be grown, is therefore a task of no small importance. If the Commission points out the crops that pay the best on different soils, both the farmer and the nation will be the richer for it.

GOOD TIME.

The Welland Tribune of the 4th inst gives a good account of the recent celebration in that town, pointing out that music was furnished by 11 bands, and that 26 fire companies competed in the contests. When it is considered that the best fire brigades in the Province were present, we must admit that our brigade made a remarkably good showing. They made a good run in the Hook and Ladder race, and came in 4th in the Hose Reel contest. The first half dozen teams in the hose reel race are as follows:

Brampton	48 2/5 sec.
Paris	50 "
Milton	51 3/4 "
Richmond Hill	51 4/5 "
Merriton	51 4/5 "
North Toronto	52 2/5 "

Maple.

The citizens have decided to keep next Monday as civic holiday and will hold a picnic picnic at Bond's Lake. Hasp was unloading a new traction engine at the station last Saturday when it upset off the platform, breaking several parts. It took considerable time to put it to rights.

Mr. and Mrs. P. Kaiser and Mr. Erni Kaiser of Toronto visited over Sunday at Mr. J. Kaiser's.

The monthly meeting of the Women's Institute was held at the home of Mrs. H. C. Bailey on Wednesday afternoon. The subject discussed was "The Hurry Worry, and Waste in Modern House-keeping" and was led by Mrs. J. B. McLean. A feature of the programme was the roll call, responded to, with quotations from Longfellow.

Mr. and Mrs. C. Norman have removed to their new home at the West of the village.

The funeral of the late Mrs. P. Lippey, of Teston took place here on Saturday afternoon.
