must win upon their merits. The International Dictionary has won a greater distinction upon its merits and is in more general use than any other work of its kind in the English language.

A. H. Sayce, LL.D., D.D., ed Oxford
University, England, has recently said
of it: it is indeed a marvelous work; it is
difficult to conceive of a dictionary more
exhaustive and complete. Everything is
in it—not only what we might expect to
find in such a work, but also what few of
one would ever have thought of looking for.
A supplement to the new edition has
brought it fully up to date. I have been
looking through the latter with a feeling
of astonishment at its completeness, and
the amount of labor that has been put
into it.
