ONTARIO GROWING SOBER.

Another great Local Option Campaign is in progress in the Province of Ontario.
On Monday, January 2nd, 1911, between 80 and 90 municipalities will vote upon the question of Local Prohibition and the inevitable result would seem to be the still further weakening of the Liquor Traffic and strengthening of the Temperance Forces.
This year, contests are on in both the extreme Eastern and Western parts of the Province.
A striking feature of the Campaign is the fervency of the attempts to repeal Local Option. Last year there were 111 municipalities in which repeal contests were possible, but in only 12 was the matter brought to a vote and only 2 By-laws were repealed. This year there are 128 municipalities in which Local Option By-laws have been in force for 3 years or more, and where repeal contests might be brought on. If the law were really a dismal failure as its opponents prophesied it would be, it might naturally be supposed that at the first opportunity the people would get rid of it. But this year out of the 128 possible places repealing By-laws will be submitted is only about 6.
With the thorough organization that the Temperance forces seem to have, and the aggressive spirit that is characterizing the movement, the probability is a considerable addition to the dry area of the Province of Ontario after May next.

WHERE TO BUY.

An exchange has the following pertinent remarks about buying out of town which is applicable to too many towns and villages:—"In the first place, buy everything you need in some other place. If you have a flour mill send out of town for your flour. It sounds better to have it come from a distance. If you want a barrel of sugar, a sack of coffee a chest of tea, a barrel of molasses, a wagon load of salt and other things, send off for them. And then you can boast to your neighbors that you buy your groceries in the city. It will cost something for freight and time, but you will have the satisfaction of knowing that your money will not be squandered in building up your own town. If you want dry goods send to the city. If you want a suit of clothes, don't buy it at home, it might help to build up the town, your merchants might hold off the money and the profits would go to enhancing the wealth of your town. Buy every thing from the other towns."

ROD AND GUN.

While big game hunting supplies the dominant note in the November number of Rod and Gun in Canada, published by W. J. Taylor, Limited, Woodstock, Ont., there is in the same issue, plenty of material for sportsmen who are not able, for various reasons, to go after moose, deer or bear. In the opening article, Mr. Bonnycastle Dale tells how Indian boys make clever hunters, trappers and fisherman and with what skill they decimate the inhabitants of the forest. Exploration in the Nepigon country, fishing and mountaineering topics, with many other papers and some fine verses, fill a number which should find its way into all hunting camps. Sportsmen wherever they may be found, can enjoy some pleasant half hours by dipping into its contents, assured that from beginning to end they will find much to attract and interest them. The completeness of the issue in covering the whole wide field of Canadian sport gives it distinction and goes far to account for the standing the Magazine has won and continues to deserve.

SHEEP IN WESTERN CANADA.

From an article by A. L. McCredie in October Farmer's Magazine, published by the MacLean Publishing Co., Toronto, we clip the following paragraphs with regard to the sheep industry in the west:
Now consider the occupied farms of the west. Of these there are about 500,000 according to the authorities, each of 160 acres. At say 25 sheep per farm, a low average, considering the large proportion of unbroken natural pasture not otherwise used, this would give 12,500,000 sheep on the occupied farms of the west.
On the present farms of Canada therefore, at the averages of 23 sheep on the eastern farm and 25 sheep on the western quarter-section, our sheep would reach the total of 21,731,000. This is ten times our actual total. It is a respectable number for us to undertake to possess, yet as easy and simple as anything can be, that is so well worth while. It simply needs that every farmer should start a flock. With a beginning, on the average farm, of five ewes, the fifth year's end would see 21,000,000 sheep in Canada.
