

# PARALYSIS YIELDS TO DR. WILLIAMS' PINK PILLS

MANY FORMS OF THIS DREAD DISEASE ARE CURED BY THIS REMEDY.

Mrs. Ritchie, of Galt, Ont., Says She Believes It Saved Her Life—  
Doctors Said She Had Not Long To Live When She Began This  
Treatment—Read Her Grateful Statement.

Scarcely a day passes but fresh proof is offered of the wonderful power of Dr. Williams' Pink Pills over disease. In many of these cases relief and new health comes to the sufferer after the best efforts of medical men had been in vain. One such case is that of Mrs. D. M. Ritchie, of Galt, Ont., who writes:—"I feel it my duty to let other people know what Dr. Williams' Pink Pills have done for me. I was taken sick first in May, 1910, with rheumatism. Treatment at home having failed me I went to Grace Hospital, Detroit, where I remained for some weeks, but instead of improving I became absolutely helpless, as if from paralysis, and could not move hand or foot. I was under the heavy expense of a trained nurse, and the best of medical treatment, but seemed to be growing worse. Finally, about the middle of July my husband decided to bring me home to Galt, where I remained under medical treatment, and with a nurse constantly attending me until October, when I took a further turn for the worse. Then the doctor told my husband that it was only the matter of a few weeks, as I could not possibly get better. Up to this time over six hundred dollars had been spent for medical and hospital treatment. In this condition, with hope abandoned, my husband saw a testimonial in a local paper of a cure of paralysis through the use of Dr. Williams' Pink Pills, and I decided at once to try them. In a few weeks there was a little improvement, and from that time on each day showed some change for the better. I can now (March, 1911) walk all about the house, do up my room, wash the dishes and sew and mend, but am still a little shaky, but am looking for the fullest cure, as I feel myself growing stronger daily. I give the full credit to Dr. Williams' Pink Pills, for I feel they are an instrument under Provi-

dence given for the benefit of suffering humanity."

Writing again under the date of August 16th, 1911, Mrs. Ritchie says: "As to my general health I can say that I have not felt so well in years. My stomach is in the best of condition and I can eat things I have not eaten for years. I can walk quite well, but use my cane when I go out, as I have not quite confidence in myself yet. But if you had seen me when I started to take Dr. Williams' Pink Pills, you would realize what a miracle they have worked in my case. All that I have stated is absolutely true, and I may add that the pills have cured my husband of kidney trouble that other medicine seemed to have no effect upon, for which we are both thankful."

Again under the date of Jan. 16, 1912, Mrs. Ritchie says: "I am fully recovered and able to do all my housework. I shall always recommend Dr. Williams' Pink Pills and trust some sufferer will receive as much benefit by reading this as I did through a faithful use of the pills."

Dr. Williams' Pink Pills cure such apparently hopeless cases as Mrs. Ritchie's because they make new, rich, red blood, which feeds the starved, overworked nerves, and gives tone and strength to every organ in the body. No sufferer from paralysis, locomotor ataxia, St. Vitus dance, or any nervous disorder can afford to neglect Dr. Williams' Pink Pills, the great blood builder and nerve tonic, which have more remarkable cures to their credit than any other medicine in the world. But be sure you get the genuine pills with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

C. P. R., or even Bank of England shares, have no other method of ever getting their money back. In 1670 the Hudsons Bay Company (its real name is the Governor and Company of Adventurers of England Trading into the Hudsons Bay) was formed and its shares issued. These shares are actively traded in on the London market. In the 240 years since they were put out, there has been no time at which the shareholders could get their money back except by selling their shares to others. Offhand, I can think of no bond which would not have been redeemed at least four times (and a fifth time in 1920) during that period.

These are the chief points of difference between bonds and stocks. Stocks, however, have many good points, which will be taken up subsequently.

### INVENTOR'S TROUBLES.

Thirty-six years ago last Wednesday—on February 14th, 1876—Dr. Alexander Graham Bell, formerly of Brantford, Ont., invented the telephone.

Like other scientific discoverers, he had a hard time at first to get people to understand and believe in his invention. Dr. Bell says that it was his work among the deaf and dumb which led to the telephone idea, and he tells a deaf man's story to illustrate public distrust of anything new.

One Sunday a man appeared in a country church with an ear trumpet—something unfamiliar to the congregation. Just before the service began an official approached the stranger.

Dr. Alexander Graham Bell.

"Say," he said, excitedly, "you can't play that horn in here. If you try it, I'll put you right away."

Dr. Bell is a Scotchman by birth. His residence in Canada was brief. After going to the United States he became professor of vocal physiology at Boston University, and founded the American Association to Promote Teaching of Speech to the Deaf, to which organization he donated \$250,000. Dr. Bell is sixty-five years of age, and now lives in Washington.

A patient whom the famous Dr. Abernethy had advised to take a walk on an empty stomach calmly replied, "Whose?"

## From Our Ovens To Your Table Untouched by human hands— Post Toasties

—the aristocrat of Ready-to-Serve foods.

A table dainty, made of white Indian corn—presenting delicious flavor and wholesome nourishment in new and appetizing form.

The steadily increasing sale of this food speaks volumes in behalf of its excellence.

An order for a package of Post Toasties from your grocer will provide a treat for the whole family.

### FRENCH NAVAL OFFICERS.

Orders Conferred in Connection with Delhi Wreck.

A recent issue of The London Times says:—

We are officially informed that in recognition of the gallant aid rendered by the officers and crew of the French cruiser Friant on the occasion of the wreck of the Peninsular & Oriental Company's steamship Delhi off Cape Spartel on December 13 last, the King has been pleased to confer on the officer commanding the cruiser, Capitaine de fregate Andre Paul Marie Lequerre, an honorary commandship of the Royal Victorian Order, and to appoint Lieutenant Charles Jerome Alexandre Drujon to be an honorary member of the same Order (fourth class).

His Majesty has also conferred on the following officer and men who formed the crew of the cruiser's steam barge which went to the assistance of the steamship Delhi the gold medal for gallantry in saving life at sea:—Lieutenant C. J. A. Drujon, Louis Boussard, Jacques Thomas, Albert Marius Durien and Jean Louis Le Camelec.

The King has also presented to the families of Joseph Noel Remond, Florent Emile Carel and Georges Marie Lagadee, the members of the crew of the barge who lost their lives on the same occasion, the gold medal for gallantry in saving life at sea, which would have been conferred upon them had they survived.

The British Government, in token of their appreciation of the gallant conduct of the officers and crew of the Friant, have presented to the officers a piece of gold plate, and they have made a grant of £50 each to the families of the men who lost their lives.

GOES MAD SEEKING BEAUTY.

Treatment Sends Noblewoman to Insane Asylum.

A mad craving to become beautiful at all costs has landed a Berlin noblewoman, the wife of an officer, in an insane asylum, and a woman who induced her to pay \$15,000 for a "sure road to beauty" has been sentenced to two years' imprisonment for fraud.

A middle-aged Silesian woman recently opened a "beauty parlor" at Munich. Hearing of the Berlin noblewoman's passion to correct the deficiencies of which she was a victim at the hands of nature, the proprietor of the "beauty parlor" sent word that she had a friend, a masseuse, who could administer "cosmetic treatment" which was guaranteed to convert the homeliest features into a pretty face, and the most impossible figures into a form over which sculptors would rave.

The owner of the "beauty parlor" required \$15,000 in advance, as agreed upon, and the treatment began, but the fraud came to light in time for the police to secure pos-

session of the bulk of the money. The effect of the treatment was to mar the noblewoman's face with a distressing rash, while her figure retains its unattractive lines.

### THE FLAVOR OF TEA.

The flavor of tea is contained in an essential oil. With age the oil decays and the agreeable aroma and flavor of fine tea is destroyed.

Tea keeps better in sealed packets than it does in open chests or canisters, but it deteriorates more or less under any circumstances. Fresh tea is as necessary to a successful tea trade as fresh butter is to a successful butter trade. No wholesaler or retailer should keep a pound of tea in his stock for more than four months, yet, with some, the fashion is to keep it for years, during every day of which it is deteriorating.

In Ceylon—that land of eternal summer—every bush in a tea garden is picked over every week in the year, and you always get it fresh and fragrant in the "SALADA" packages. "SALADA" does not show the dealer as large a profit as other teas, but it gives him, through his customers, more satisfaction.

A NEW FOE TO DISEASE—

## "PARKYTE"

The privy-pit closet in the yard is objectionable winter or summer. In winter, it exposes to severe chills, often bringing on serious illnesses. In summer, it is a positive invitation to fever of all kinds. At no time does it afford privacy.

Now, a Parkyte Improved Chemical Closet

can be installed in any house at little cost. Absolutely sanitary and odorless, affords complete privacy. Endorsed by medical authorities and guaranteed by us. Quality of materials and right scientific principles make it the best on the market. Inferior closets are wrongly built of flimsy materials, therefore neither sanitary nor durable. Ask your dealer, or order direct. Send for booklet—"The Path to Health."

## MAKING SAFE INVESTMENTS

SHARES OF STOCK, UNLIKE BONDS, INVOLVE NO "PROMISE TO PAY."

A Company Not Obligated to Repay to Its Shareholders Par Value of their Shares—Bondholders in a Different Position.

The articles contributed by "Investor" are for the sole purpose of guiding prospective investors, and, if possible, of saving them from losing money through placing it in "wild-cat" enterprises. The impartial and reliable character of the information may be relied upon. The writer of these articles and the publisher of this paper have no interests to serve in connection with this matter other than those of the reader.

(By "Investor.")

So far, in this series of articles on the general principles of investment very brief reference has been made to stock investment. There are two reasons for this. First shares in joint stock com-

panies are not—as a class—ideal securities for investment, and secondly, because any investigation which may be found useful in determining the safety of a bond may be applied—with modifications, of course—in the case of shares. Shares of stock and bonds are essentially different. As was pointed out some time since, a bond is a promise to pay, a share is an equity only; if the company is liquidated the bonds are paid in full and if there is anything left the stockholders divide it—that is, in the case of a company being wound up. In the case of an actively operating company, the bondholders receive their regular interest, 4, 5, 6, or 7 per cent., whatever it may be. The shareholders may receive nothing, or, as in the case of Winnipeg Electric, they may receive 12 per cent. per annum or even more.

A farmer working his land in a small way, similar to the shareholders of a large company considered collectively. He may owe John Smith money secured by a mortgage. John Smith gets his interest every year and his principal when it is due, or he forecloses the mortgage, sells the farm, pays himself and gives the farmer the residue. If the farmer can pay his interest he has to deduct his operating expenses from what is left over, and the balance he uses to supply the necessities of life, or, if fortune has smiled, luxuries for his wife and family. His profit, after paying interest and operating costs—wages, feed for his stock, etc.—represents the dividends, sometimes large, often small and perhaps nothing, in which event he may have to look to his small savings, or the bank, to tide him over.

And so, it is with the shareholders of a company. In lean years they may get no dividends, in fat years they may get large ones. But it is the bondholder who doesn't have to worry. He has to have his interest or the shareholder stands to lose his property. In other words, shares (speaking generally, of course, for many shares are far safer investments than some bonds, and some shares are as safe as most bonds) shares are in nature speculative, while bonds are not.

The purchase of a share of stock in a company involves no reason to expect a return of the money so invested. If the company prospers your dividends are large and if you want to "get your money out" you can sell to some one who wants to buy, even the holders of
