

A committee of the Methodist body, presided over by Rev. John Locke, President of the Conference, has made a number of valuable recommendations. We believe the following recommendation is worthy of commendation:—"That the General Conference be memorialized to abolish the time limit for the pastoral term. We are strongly of the opinion that the time has come when a longer pastoral term than is now possible to any but men in mission churches is imperative if we would successfully minister to our generation." We believe the itinerant system was probably the best for Methodism in years gone by. But that day has gone as far as Canada is concerned.

The Liberal Mass Meeting to be held in the Arena, Toronto, next Monday evening will be the great political event of the season. The speakers will be Sir Wilfrid Laurier, Hon. George P. Graham, Hon. Chas. Murphy and Dr. Michael Clark. The doors will be open at 7 o'clock, and the meeting will begin promptly at 8. In the interval the 48th Highlanders Band will play a programme of standard and popular music. Special rates are given on steam railway, and there will be special late cars on the Metropolitan Railway.

THE TENT CATERPILLARS

The Division of Entomology of the Dominion Farms Branch of the Department of Agriculture, Ottawa, has recently issued a circular on the tent caterpillars by Mr. J. M. Swaine, Assistant Entomologist for Forest Insects, in the Division of Entomology.

This publication discusses the defoliating tent caterpillars which were so extremely numerous in parts of eastern Canada during the season of 1912. A description is given of the different stages of the insects, and their life histories and habits are discussed in considerable detail. The American Tent Caterpillar constructs the large silken tents in May and June, so well known by all owners of fruit trees, and from these retreats the caterpillars emerge to feed upon the nearby foliage. This species is found most commonly in orchards, although it also infests various shade trees. The Forest Tent Caterpillar spins no tent, but feeds in groups of several scores upon the foliage, and rests at intervals massed upon the trunk or lower branches. This species feeds chiefly upon deciduous forest trees, such as poplar and Birch. Both these species were very abundant last season particularly in Quebec Province, and their ring-like masses of eggs are to be seen in immense numbers upon the twigs of fruit trees and deciduous shade trees and forest in many districts. The circular referred to above gives a very complete account of the measures to be adopted in the controlling these important insect enemies. They are briefly: the removal and destruction of egg masses, spraying infested trees with lead arsenate or Paris green, and banding the trees to prevent reinfestation by wandering caterpillars. Formulae for the spray mixture are given and directions for their preparation.

Copies of this publication, Entomological Circular No. 1, Experimental Farms, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

VARICOSE VEINS CURED

NO NAMES USED WITHOUT WRITTEN CONSENT. Confined to His Home for Weeks.

"Heavy work, severe straining and evil habits in youth brought on Varicose Veins. When I worked hard the aching would become severe and I was often laid up for a week at a time. My family physician told me an operation was my only hope—but I dreaded it. I tried several specialists, but soon found out all they wanted was my money. I commenced to look upon all doctors as little better than rogues. One day my boss asked me why I was off work so much and I told him my condition. He advised me to consult Drs. Kennedy & Kennedy, as he had taken treatment from them himself and knew they were square and skillful. I wrote them and got THE NEW METHOD TREATMENT. My progress was somewhat slow and during the first month's treatment I was somewhat discouraged. However, I continued treatment for three months longer and was rewarded with a complete cure. I could only earn \$12 a week in a machine shop before treatment, now I am earning \$21 and never loose a day. I wish all sufferers knew of your valuable treatment."

HENRY C. LOCUST.

HAS YOUR BLOOD BEEN DISEASED?

BLOOD POISONS are the most prevalent and most serious diseases. They sap the very life blood of the victim and unless entirely eradicated from the system will cause serious complications. Beware of Mercury. It may suppress the symptoms—our NEW METHOD cures all blood diseases.

YOUNG OR MIDDLE AGED MEN—Impudent acts or later excesses have broken down your system. You feel the symptoms stealing over you. Mentally, physically and vitally you are not the man you used to be or should be. Will you heed the danger signals?

READER Are you a victim? Have you lost hope? Are you intending to marry? Has your blood been diseased? Have you any weakness? Our New Method Treatment will cure you. What it has done for others it will do for you. Consultation Free. No matter who has treated you, write for an honest opinion Free of Charge. Books Free—"Boyhood, Manhood, Fatherhood." (Illustrated) on Diseases of Men.

NO NAMES USED WITHOUT WRITTEN CONSENT. PRIVATE. No names on boxes or envelopes. Everything Confidential. Question List and Cost of Treatment FREE FOR HOME TREATMENT.
