#### QUEER BABY PROBLEMS.

Puzzling Questions of Nationality Which Sometimes Crop Up.

Four years ago there was considerable excitement on board a passengership from England as it approached the shores of Australia. It had become known that a baby was to be born on board, and betting was indulged in as to whether the event would be delayed long enough to take place in waters that would make the baby "Australian," or whether it would be born on the 'high seas" and become a "native" of Stepney, as is the rule in such cases. It was born a few seconds after the line had been crossed, payments. and was adjudged entitled to the fivepound bonus awarded for babies born in the Commonwealth.

In the same year, in England, a the Dominion. mother gave birth to a baby in February, and another in April. The question was discussed as to whether she was entitled to double maternity benefit, or whether the two births should be classed as twin births. She got the double benefit.

Here is another baby problem. Two days before Queen Victoria came to over, then under the sovereignty of William IV. of England. The child's gently until the vegetables are tender. It was brought to England when a The starch is inclosed within the They should then be taken at once few months old. If living now, would be a German alien?

WAR MEANS LESS POVERTY.

Strange to say, one of the few benefits conferred by the war has been a large reduction in poverty among indigent classes. Many men who were of very little use to their families owing to irregular habits, enlisted, and as a result their families have been steadily receiving monthly payments utes. Remove from the fire and pour far in excess of anything they could possibly have hoped for had the father remained at home.

connected with the Patriotic Fund, that are worth knowing. The visitors and inspectors, in making their usual official rounds, are able to observe wrong social conditions, and by calling attention to them, bring about immediate improvement. For instance, home, who, perhaps, has more worries they have been able to insist that there should be a certain standard of living as a result of the liberal payments, and also there have been many cases in which mothers have been warned that doubtful conduct on their part would lead to the stopping

ence on the people concerned, and has indirectly, been of great advantage to

#### THE PATHS OF PAIN.

The paths of pain are lonely, But the loneliest path of all Is trodden by the children, Pitiful, weak and small; The fatherless and motherless Who live unloved, and die, Sobbing their little souls away, Under a silent sky.

The paths of pain are holy, But the holiest path of all Is sacred to the children, Innocent, frail, and small; The friendless and forsaken, The lambs without a fold, Till He shall call them to Him Over the sands of gold. -Ernest H. A. Home.

Crowded strawberry plants mean a poor crop next June. Thin 'em out!

## THE BUSINESS WOMAN

To-day, more than ever before, is woman's opportunity. Many new occupations are now opened to her, which, before the war, she was deemed unfitted to fill. And truth to tell she has risen to the opportunity, and now shares many business responsibilities in former times confined to men. But, as women are subject to more frequent fluctuations of health than men, many will be handicapped early, if they regard their health requirements too lightly.

The nervous strain, long hours and prolonged mental or physical fatigue thin the blood and weaken the nerves. Such conditions as women are now called upon to undergo can only be endured by a full-blooded constitution. only weaker women suffer soonest. There are moral advantages, too, The woman worker, in any line, requires her blood replenished frequently. She needs new, rich blood to keep her health under the trying conditions of business life, and to fortify her system against the effects of overwork. This applies also to the woman in the and anxieties than usual. So let all girls and women take heed and renew their blood promptly at the first approach of pallor, lack of appetite, headache and backache. This can be best and most effectively accomplished by taking Dr. Williams' Pink Pills which make new, rich blood and thus help All this has had an uplifting influ- womankind so perfectly. No woman need fear failure of health if they take these pills occasionally to keep them well, or give them a fair trial if they find themselves rundown.

You can get Dr. Williams' Pink Pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Notwithstanding what the old textbooks say, it now appears that a volcano is hottest on its surface. This is the conclusion drawn by a scientist who has made extensive investigations in craters in Hawaii and has obtained samples of gases and lava before they reached the air. Laboratory studies of these samples make it appear probable that much of the heat required to keep an open lava basin in fluid condition is supplied by the chemical action of the gases. From these investigations the scientist concludes the temperature at the surface of a volcano undoubtedly is higher than that below the surface.

the eyesight more than 50 per cent in one week's time. I have also used it with surprising effect in cases of work strained eyes, pink eye, inflammed lids, catarrhal conjunctivites, smarting, painful, aching, itching eyes, eyes weakened from colds, smoke, sun, dust and wind, watery eyes, blurred vision, and in fact many other conditions too numerous to describe in this report. A new and startling case has just come under my observation, which yielded to Bon Opto, is that of a young girl, 12 years old. Two prominent eye specialists, after a thorough examination of the young girl, decided in order to save the sight of her right eye, the left eye must be removed. Before permitting her to be operated on, the young girl's father decided to use Bon Opto. In less than three days a marked improvement was noticed. At the end of a week the inflammation had almost disappeared, and at the end of six weeks the eye was saved. Just think what the saving of that eye means to this little girl. Another case is that of a lady ninety-three years old. She came to me with dull vision and extreme inflammation of the lids and the conjunctiva was almost raw. After two weeks' use of Bon Opto the lids were absolutely normal and her eyes are as bright as many a girl of Dr. Judkins, Massachusetts physician,

formerly Chief of Clinics in the Union General Hospital, Boston, Mass., and formerly House Surgeon at the New England Eye and medical author for many years, reports: "I have found oculists too prone to operate and opticians too willing to prescribe las which form the basis of that wonderful I make it a rule to test every new disorders. Its success in developing and

DR. JUDKINS

caused by overworked, tired eyes which induced fierce headaches. I have worn glasses for several years, both for distance and New York.—Dr. Beck, a New York state | House Surgeon at the New England Eye and close work and without them I could not read my own name on an envelope or the typewriting on the machine before me. I can do both now and have discarded my long distance glasses altogether. I can count the fluttering leaves on the trees across the street now, which for several years have looked like a dim green blur to me. I cannot express my joy at what it has done for me."

"It is believed that thousands who wear glasses can now discard them in a reasonable time and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by the use of this prescription at home. Here is the prescription: Go to any active drug store and get a bottle of Bon Opto tablets. Drop one Bon Opto tablet in a fourth of a glass of eyes bother you even a little, it is your duty to take steps to save them now before it is
