Executors' Sale OF Valuable Estate

The Executors of the Estate of The Late MARGARET BAKER will offer for sale by Public Auction, on the premises, Gormley P. O., on Saturday, the 6th day of September, 1919, at 3 o'clock in the afternoon, by John H. Prentice, auctioneer, the residence of The Late Margaret Baker, in the said Village of Gormley, being composed of part of the East-half of Lot No. 35, in the 3rd Concession in the Township of Markham, containing one and one-half acres, more or less. On the property is said to be erected a brick-clad dwelling, containing seven rooms with cellar, a brick-clad coach-house and frame stable, all in good state of repair. There are a number of fruit trees on the property; also hard and soft water. This is a very desirable home, situate in the Village of Gormley, convenient to churches, school and railway.

The property will be offered subject to a reserve bid, and to conditions of sale which may be seen at the office of the Vendors' Solicitors, or at time of sale.

Terms—Ten per cent. down at time of sale, sufficient to make up one-half of the purchase money within 30 days thereafter, the balance to be secured by a first mortgage, bearing six per cent. half-yearly, repayable five years or less from date of sale, or the whole may be paid in cash. The household furniture and effects will be offered for sale by Public Auction on the same day at one p. m.

Save Money by using our Battery Service

IT'S a sheer waste of money not to give your starting battery the systematic care it needs to have. Regular inspection will save that waste. Storage batteries are bound to wear out but they need not be wrecked. The

is called the "fighting battery" not only because Uncle Sam uses it for the Army and Navy, but because it wears out stubbornly and takes a long time about it. The plates are the reason. Let us tell you why.

McGill AUTOPOWER
PATENTED CANADA & UNITED STATES

You Don't Need a 20-H.P. Engine
McGill Autopower does this job better and cheaper

Have you a Ford Car? Then you have the most efficient, economical power-plant in the world for farm work—WHEN IT'S FITTED WITH THE MCGILL AUTOPOWER.

In three minutes you can change your Ford from a pleasure car to a 14 H.P. gas engine for farm work—sawing wood, cutting ensilage, threshing—and in another three minutes it's an auto again.

The McGill Autopower has proved itself. Hundreds of Canadian farmers have been using it for years. Their experience proves that it does not injure the Ford Engine in any way. It has a governor which automatically regulates the power to the load and maintains a steady speed, and an auxiliary fan which keeps the engine cool under all conditions.

Write for literature fully describing it, and actual letters from farmers (some in your neighborhood, perhaps) telling what the Autopower is doing on their farms. Write today for this information.
