

IN MEMORIAM

The Senate has Passed the Prohibition Bill enacted by the House of Commons. The measure makes it possible for the country to be bone dry, but the Province wishing to prevent the importation of liquor from any other Province or "wet" district must first show its desire by a majority vote of the electors. By the way things look at present an opportunity will be given to have cellars well stocked up with liquor before a vote can be taken

Far...ers Must Wake Up

During the early stages of the present Victory Loan campaign it seemed that one class of the community which was showing reluctance in subscribing for Victory Bonds was the farming community, but it is hoped that before the subscription sheets close, this reproach will have been removed. There were similar indications last year, but during the last few days of the drive, farmers' subscriptions came in very rapidly.

Anyone would be loath to believe that the farmers, who of all classes of the community are most directly interested in a heavy over-subscription to the present Loan, are apathetic. More than one third of the proceeds of the last Loan was spent directly in the purchase of Canadian wheat and other foodstuffs, and re sold to Great Britain and allied countries on credit. That is to say, \$207,750,000 of the money subscribed a year ago went into the pockets of the farmer; and without these heavy purchases the farmer would have been obliged to dispose of his surplus product at a probable loss. The amount that will be spent during the coming year in financing credits to overseas purchasers of Canada's agricultural products is wholly contingent on the extent of the over-subscription of this year's Loan. Therefore if any farmer is desirous of seeing the present overseas market for his products maintained he will help pile up the total of Bond subscriptions.

As vaccination is to be compulsory among the school children, a warning should accompany the operation as to the necessity of strict cleanliness being observed during the "taking" process. The abrasion should have a clean bandage, so that no foreign substance can reach the sore, whereby infection might result. Nearly all the evil effects of vaccination are due to outside contamination.
