

MUCH SUFFERING DUE TO THIN BLOOD

Rich, Red Blood Necessary to
Health and Strength.

If more people knew how many ills and pains are caused by thin, watery blood a great deal of suffering would be avoided. Men and women often suffer for long periods from stomach trouble, headache, palpitation of the heart, and nervous complaints such as neuralgia, without suspecting that anaemia or bloodlessness is the cause.

The blood goes to practically every part of the body, carrying oxygen and nourishment. The efficient action of every organ is directly dependent upon the quality of the nourishment it gets from the blood. If the blood is thin it becomes weak in nourishment and health fails. The best way to keep the blood rich and red and thus enjoy good health is through the use of Dr. Williams' Pink Pills. At the first sign of weakness these pills should be taken and good robust health will soon follow. The statement of Mrs. J. J. Murray, Corbetton, Ont., shows the value of Dr. Williams' Pink Pills in cases of this kind. She says:—"A few years ago my daughter, Lillie, was in a very badly run down condition. She was pale, thin, and scarcely able to go about. The least exertion made her heart palpitate so violently that we were actually afraid one of these spells might carry her off. She slept so badly that often she would lie awake until morning. Treatment did not seem to help her and we were almost in despair when a friend advised the use of Dr. Williams' Pink Pills. A few weeks' use of this medicine showed a decided improvement, and a further use of the pills fully restored her to health, and she has since been a strong, healthy girl. Some time later I was taken ill myself, being badly run-down from household care. A doctor was called in but his medicine did not seem to bring back my strength, and remembering what Dr. Williams' Pink Pills had done for my daughter, I decided to drop the doctor's medicine and try them. The results that followed were like those in my daughter's case, and through the use of the pills I was soon a well woman. I am glad to give my experience in the hope that some other sufferer may find the way to health."

You can procure Dr. Williams' Pink Pills through any dealer in medicine, or they will be sent you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams' Medicine Co., Brockville, Ont.

997 Tools Needed.

Nine hundred and ninety-seven cutting tools alone are required in manufacturing a modern rifle. The twist drill is one of the busiest of these. To supply 1,000,000 rifles, 94,000,000 holes must be drilled.

**GIRLS! A MASS
OF WAVY, GLEAMY
BEAUTIFUL HAIR**

Let "Danderine" save and
glorify your hair

In a few moments you can transform your plain, dull, flat hair. You can have it abundant, soft, glossy and full of life. Just get at any drug or toilet counter a small bottle of "Danderine" for a few cents. Then moisten a soft cloth with the Danderine and draw this through your hair taking one small strand at a time. Instantly, yes, immediately, you have doubled the beauty of your hair. It will be a mass, so soft, lustrous, fluffy and so easy to do up. All dust, dirt and excessive oil is removed.

Let Danderine put more life, color, vigor and brightness in your hair. This stimulating tonic will freshen your scalp, check dandruff and falling hair, and help your hair to grow long, thick, strong and beautiful.

Perfume Manufacture a Most Poetic Industry.

The history of perfumes is a part of the history of civilization itself. From the perfumed sails that wafted Cleopatra down the Nile to the scented bath of milk that was the daily enjoyment of the Empress Josephine, or the sweet smelling fountains in the royal palace of St. Petersburg, in the days of the Czars, the essence of flowers has been indispensable to the luxurious existence.

The perfume centre at the present time is the quaint old French town of Grasse, in the Maritime Alps, the poetic industry of which is the basis of its prosperity.

In ascending to the town of Grasse from the picturesque little station, the visitor finds his path lying through beautiful terraced plantations of jasmine and the lovely Provence rose, and past orchards of olive trees, beneath the shade of which are cultivated violets. The area devoted to flower culture covers 145,000 acres.

During the months of April, May, June and July the fields are literally alive with sunny-faced men, women and children gathering the fragrant harvests. They pick the blossoms by hand into baskets and then carry them to the factories, where they are divided and sorted.

As the women come in from the adjoining fields they empty their loaded baskets out on the floor until it is knee-deep in flowers, and to walk across it would mean the crushing of thousands of roses. In one season a single establishment uses 1,900 tons of orange blossoms, 930 tons of roses, 147 tons of violets and 127 tons of jasmine, to say nothing of great quantities of scented woods.

After the sorting, which is done at long benches by scores of white-capped girls, the flowers go to the distillery. Some yield their perfume after distillation with water or steam; others undergo what is called maceration. In this process the flowers are steeped in heated fat, where they are left until all their fragrance is extracted. Next they are drained off in wooden trays and fresh flowers are added to the fat. The fat that has absorbed the essence of the flowers is called pomade, and is sent in this form to performers all over the world, who by means of alcohol extract its sweetness.

The jasmine, tuberose and violet are so delicate that they scarcely give out any essence by distillation and must be subjected to enfleurage.

The most expensive perfume is of course that of roses, for it requires no less than forty-eight pounds of rose leaves to make one gram of oil.

Photographs Stomach.

A camera small enough to be swallowed and photograph the interior of a stomach is the invention of a Danish surgeon.

HEALTHY CHILDREN ARE HAPPY CHILDREN

The well child is always a happy child—it is a baby's nature to be happy and contented. Mothers, if your little ones are cross and peevish and cry a great deal they are not well—they are in need of medicine—something that will set their bowels and stomach in order, for nine-tenths of all childhood ailments arise from a disordered state of the bowels and stomach. Such a medicine is Baby's Own Tablets. They are a mild but thorough laxative which regulate the bowels, sweeten the stomach, and thus drive out constipation, colic, indigestion; break up colds and simple fevers and make the baby healthy and happy. Concerning them, Mrs. Albert Hamel, Pierreville, Que., writes:—"Baby's Own Tablets are the best medicine I know of for little ones. They relieved my little girl from constipation when nothing else would and I can strongly recommend them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

No Atmosphere on Moon.

The sun, Venus, Mars, Jupiter and Saturn, like the earth, have atmosphere surrounding the globes, but the moon is believed to have no atmosphere.

A company has been formed in Newfoundland to give Saint John's and other cities a modern and efficient telephone service.

Milking 25 Cows In 60 Minutes

PRETTY good milking you will admit! Yet it is by no means unusual for one man with a Macartney double unit to milk a herd of this size in less than an hour.

What this means in dollars and cents is easily illustrated. The average person milks about 8 cows in an hour, by hand. Figuring wages and board at 25 cents an hour, handmilking one cow costs about 3 cents or 75 cents for the entire herd. Twice a day for 365 days means a wage expense of \$547.50.

At 25 cents an hour the labor cost per cow with the Macartney Milker works out at 1 cent, or 25 cents per day. Twice a day the year round this would mean a milking cost of \$182.50, or a yearly saving of \$365.00 through the use of the Macartney Machine Milker.

Simple figures but very expressive. And remember that Macartney means profit in other ways. It means more milk per cow, longer lactation periods, less hired help and more time for other important work in the fields.

The Macartney Machine Milker is a real money making investment. You are losing money without it. You gain in every way when you adopt it.

Free Particulars
Further information concerning the Macartney Machine Milker will be mailed you on receipt of the attached coupon filled in as indicated. This information will not obligate you in any way. Even if you are not contemplating an immediate purchase our literature will prove helpful and interesting.

Much Oil in Mexico. Phosphate in Holland.

Of Mexico's oil lands, estimated to have a total area equal to that of France, only about 1-3 per cent. are under development.

Extensive phosphate rock deposits, in places extending to the surface of the ground, have been discovered in the eastern part of Holland.
