## YOU

INSURE YOUR PROPERTY AGAINST FIRE

## WHY?

To protect yourself, I presume would be your answer. Then why not protect yourself and family for the same reasons, with this difference. You pay for Fire Insurance knowing if nothing happens in the way of Fire you expect no return which I contend is good business. While you protect yourself and family it costs only an effort to save a little each year which is the hope of every person to have more this year than last. This saving deposited in the Confederation Life Association guarantees the return of all your money and some additional in a set term of years from 10 to 30 as you choose and in addition to this the Company guarantee to pay in case you die \$1000 and up according to the amount invested. Is this not better business? We can quote many good reasons why one should have protection. Send a card or call and see us and you will be informed with the necessary information.
