

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Mosquitoes and Colors

The anopheles mosquito, it appears, is attracted by certain colors and repelled by others. Experiments have been conducted in a gauze tent, one end of which was formed by large windows. Into these the sunlight poured on bright days. Large stone basins were placed on the floor for the mosquitoes to breed in. It was immediately noticed that when a person entered the tent clad in dark grey clothes, the mosquitoes settled on the cloth. When the person entering was dressed in white flannel, they did not approach him. A number of boxes lined with cloth of various colors were placed in rows upon the floor, and it was noticed that great numbers of mosquitoes entered the box lined with dark blue. Fewer of the insects sought the boxes lined with other colors, the number diminishing in this order: Dark red, brown, scarlet, black, slate gray, olive green, violet, leaf green, blue, pearl gray, pale green, light blue, ochre, white and orange. No mosquitoes whatever were found in the box lined with yellow. The number of insects congregating in houses might therefore be easily lessened by the choice of suitable colors applied to the walls. A trap lined with something dark would attract so many insects that they could be slain in large numbers.

Fall and winter weather is detrimental to exposed machinery, but hot sun is worse. Let's run the old binder and wagon inside; we will be time and money ahead.

Ranching in Ontario

Ranching in Canada immediately suggests the Western plains and the huge herds, now rapidly passing, which used to graze at large upon the rich verdure of the prairies. But there is also ranching in the east, and at the present time big herds are to be found grazing under ranching methods in many parts of Ontario. There is an Ontario Ranchers' Association, and its Secretary, C. M. Laidlaw, points out the advantages the province offers to stockmen.

A very large area of Ontario is made up of rough-broken country interspersed with valleys and small tracts of good soil. This rough land, whilst generally uncultivable and offering few possibilities along other agricultural lines, offers an enormous range area for the grazing of live stock, and stockmen are increasingly realizing this and bringing in their herds to leases obtained from the Government. These leases comprise abandoned farms, and rough timbered sections of the country where ordinary agricultural operations are impracticable, and the rental is five cents per acre for the first five years, the franchise being renewable.

Different methods of ranching are followed in the province. Where

In the Orchard.

Prune back the heads and long canes of blackberries and raspberries after picking is over.

Propagate black raspberries by tip-layering.

If bearing trees have not had their crops thinned before this, do it early in July. Thinning pays well in improving the quality of the fruit.

The last cultivation of the orchard trees may be made late in July. Plant a cover crop at this time consisting of rye, winter vetch, and perhaps some crimson clover if the climate is not too severe for it.

Keep the runners well pruned from the strawberry plants unless you are practicing the matted-row system.

Fight insects and disease by spraying; send to your experiment station, or call on your county representative for free literature.

Ask for Minard's and take no other.

Laugh at your own troubles rather than at the troubles of the other fellow.

Velocity of Light

Physicists never tire of efforts to increase the accuracy of their knowledge of the fundamental facts of science. A redetermination of the velocity of light by the Fizeau toothed wheel method was made at Nice. These experiments were remarkable on account of the great distance over which the beam of light employed was transmitted. Previously such a beam had been caused to travel about fifteen miles, but on this occasion the reflecting mirror was so placed that the total distance traversed by the beam, going and returning, was fifty-seven miles. The mean of 1,109 observations gave the velocity of light 186,225 1/2 miles a second.

I fell from a building and received what the doctor called a very bad sprained ankle, and told me I must not walk on it for three weeks. I got MINARD'S LINIMENT and in six days I was out to work again. I think it the best Liniment made.

"Who Are You?"

I love the country—it's God's land.
I love the trees, the birds, the flowers.
I love the starry skies and the sunlit fields.
I love the rain and the glistening snow.
I love the pure air and the sparkling brook.
I love the spring, summer, autumn and winter.
I till the soil and plant the seed.
I cultivate the crop and gather the harvest.
I supply the food that none may starve.
I work from sunrise to sunset.
I work for the joy of work and for my loved ones.
I have no time to strike.
I believe all who eat should work.
I believe in co-operation.
I believe in the brotherhood of man.
I believe my children should have the best in education.
I believe my wife should have every home convenience.
I believe in work, sleep and play.
I believe my rights and privileges are those of every man.
I believe in my God, in my Country and in you.
I am a farmer.

His wife goes by at forty miles
In his new car—but mine just smiles;
Our house has pipes and everything—
His wife totes water from the spring.

BITS OF HUMOR

An Early Example.
Midas had just seen another ham sandwich turn to gold as his fingers touched it.

"This profiteering," he remarked sadly, "is something that can be carried entirely too far."

Era of Economy.

"Family discipline isn't what it used to be."

"No. When I was a child my parents used to take a slipper to me. No parent of the present would even put that much extra wear and tear on precious shoe leather."

The Modern Boy.

Teacher—"Now, Tom, hold your head up and your shoulders back—you'd like to have a fine carriage when you're a man, wouldn't you?"

Tom (doubtfully)—"Well, I'd rather have an aeroplane."

MONEY ORDERS.

Send a Dominion Express Money Order. Five Dollars costs three cents.
