**YOU'LL GET GOOD ENSILAGE**

With a **TORONTO** Silo

I HANDLE the Toronto Hip Roof Silo because I want to give my customers the biggest value.

You can't have good ensilage unless you have a good silo. And Toronto Silos are good silos. Made of wood—the best non-conductor of heat and cold. Sturdily built from double

tongued and grooved staves of selected spruce impregnated with creosote, they give adequate protection against air and frost. Their special Hip Roof provides more space for filling.

I can show you where a Toronto Silo will mean more productive cattle, bigger profits, a more valuable farm—dollars in your pocket. Let's talk it over.

J. LUNAU, Agent, Richmond Hill

**Richmond Hill Field Day Monday August 1st.**

**Mehring's Foot-Power Milker**

Consists of an air pump worked by foot power, two pieces of rubber hose and eight suction cups which surround the eight teats of the two cows which are milked at the same time. The operator sits between the two cows. He works the pump with his feet and places the teatcups, one by one, against the teats; on opening the spigot the suction rapidly draws the cups over the teats and the milk begins to flow from both cows toward its destination, the clean milk pail, which is hung out of the way of all dust, dirt, etc. on the spot of the pump.
