If you'll talk over with me the advantages Toronto Stable Equipment will bring to your farm.

Toronto Stable Equipment is designed to save you labor, keep the stable cleaner, keep your cattle healthier, more contented, more profitable.

Let's talk this great improvement over Toronto Stable Equipment includes Stalls, Bull Pens, Water Bowls and Litter Carriers.

J. Lunau, Agent

Richmond Hill

### Was Not "Wet"

As much publicity was given a statement attributed to Lieut. Col. F. F. Clarke D. S. O. commanding the York Rangers, that this year's camp at Niagara was "Wet", Maj-Gen. Williams commanding Military District No. 2, in addition to issuing a statement that the camp was "Dry" and that every effort was made to observe the law, has taken this matter up with Col. Clarke direct. The Officer commanding the York Rangers has been awaiting this opportunity of explaining the statement he was reported to have made, and now states that he absolutely made no such reference to Niagara Camp. The "wet" conditions of which Col. Clarke complained were in the area where the camp was located. The week following Niagara Camp one of the largest illicit stills yet seized was found at the butts of the old ranges, he points out, and later the night shift employed on the Chippawa Canal was discharged because of the traffic by bootleggers in the dark with these employees of the Hydro Electric Commission.

Col. Clarke declares that so far as the Militia Camp itself was concerned no liquor was sold or taken into it so far as his knowledge goes. On several occasions he and other officers were approached by bootleggers who sought to get liquor into the lines. He states this condition of things made the work of the Commanding Officers difficult and he maintains that a great deal of credit is due to the Officers and men for the manner in which they obeyed the regulations.

Col. Clarke assured General Williams that his statement with reference to "Wet" conditions did not refer to the interior of the camp but to the attempts made by those outside to traffic illicitly in liquor. In this particular he maintains the Niagara District was "Wet".

### Horticultural Society

As a result of insistent effort the Ontario Horticultural Society has secured a space for floral display in the Government Building at the Toronto Industrial Exhibition. Because the executive of the O. H. S. had such difficulty in obtaining that which they believe will be a benefit to the Province in its aesthetic problem, the various Horticultural societies of the province have been asked to co-operate in making the display most attractive. The Thornhill and Richmond Hill societies are to supply ajeratum and calendula plants, blue and yellow also a background of long stemmed blue and yellow cut flowers, and cut flowers of any other colours whatever to help fill in. Richmond Hill has undertaken to meet this demand for the first week of exhibition. The society cannot do this without the help of other citizens of the village and vicinity.

Arrangements will be made for the conveyance of our contribution to the exhibition at the proper time. See further notice next week.

Will any who have plants or flowers, even though few kindly send word to the secretary or other director of the Horticultural society as soon as possible.

## Public Notice

We are now in a position to look after your needs in every line of metal work, and will be pleased to see you in regard to

# Do Your Bit to Prevent Bush Fires

YOUR co-operation—the co-operation of all the citizens of Ontario—is the biggest need in Ontario Forestry to-day.

History shows that impoverishment and national decline follows from the destruction of a country's forests.

Most of the area of this Province is non-agricultural, suited by Nature only for growing trees. This land remains yours but the Government sells the trees.

Every summer in Ontario an average area of 425,000 acres of forest land is burnt over, equal to a strip 130 miles long by 5 miles wide. This yearly desolation at the hands of her own people is gradually turning the northern part of the Province into a rocky desert. On thousands of acres, even the soil has been destroyed by fire!

## Save Ontario's Forests They're Yours

The average yearly number of forest fires in Ontario is about 1,275. The vigilance of the Fire Rangers keep two-thirds of Ontario's forest fires down to an average size of less than five acres. But the others are big enough to raise the total average to 350 acres.

Forest fires in Ontario are destroying provincial assets of timber and pulp wood upon which the Province relies to help pay her share of Canada's War Debt. Forest fires destroy fish and game, decrease the regularity of stream flow; cause spring floods, land erosion and the crippling of water powers; turn revenue-producing areas into rock deserts.

Out of every 100 fires in Ontario's forests only three are caused by lightning, while ninety or more are due to man's care-

lessness. One thousand men scattered over 100,000,000 acres, have little chance of preventing fires. All they can hope to do is to see the smoke in time to check them and put them out before they spread beyond control.

The problem of adequate protection of Ontario's Forests from fire is almost entirely a moral one involving the whole public of Ontario. The vast majority of forest fires are caused by human carelessness due to lack of civic responsibility. The tendency is to leave all the responsibility to the Government for protecting the forests from fire. The Government cannot protect the forests belonging to the people of Ontario unless the people of Ontario co-operate. Forestry needs your patriotism, your public spirit, your regard for the general welfare of Canada.
