RICHMOND HILL HIGH SCHOOL

A Circular to Parents and Guardians

DEAR SIR OR MADAM,—

1—A little more than a year ago a Committee of teachers (men and women) representing the Education Department, the Colleges and the Secondary Schools, was appointed by the Minister of Education to investigate and report on the best means of improving the working of our High Schools.

2—Most of the recommendations of the Committee have been adopted by the Minister, and, as a result, there are more Amendments to the School Act and Regulations than for many years.

3—The Adolescent Act is now in force, requiring all boys and girls up to 16 years of age to attend school unless they hold permits, signed by the proper authorities, allowing them to be engaged in some necessary and useful employment.

4—Tuition Fees for pupils within the County are abolished.

5—The means by which High Schools are to be built and maintained are materially changed.

6—The outlines of work in many of the subjects have been re-drafted.

7—No pupil will be permitted to take more than eight subjects, or less than six, in any year; and what these subjects shall be, is to be decided by the Board of Trustees of each school on the recommendation of the Principal.

8—For Richmond Hill the subjects of the First Year are: English, Canadian History, Algebra, Grammar, Geography, Art, Botany and Latin.

9—There will be two Departmental Examinations each year, so that candidates who fail or who do not write in June will get another chance in September.

10—Formerly candidates had to pass in all the subjects of the Normal Entrance Examination, or at least eight of the Junior Matriculation at the same time, taking 40 per cent. on each paper and 60 per cent. of the total. Now they may write on as many as they choose at each examination, and in any order, and will get credit for passing in all on which they take at least 50 per cent.

11—Pupils who at the end of the First Year are able to pass the tests in History, Grammar, Geography, Art and Botany, will drop these subjects and take up others (viz: Arithmetic, Geometry, Zoology, Physics and French) in their places during the Second Year.

12—Those who do not intend to become teachers or enter professional life may also take these examinations, and on leaving they will be entitled to Certificates stating exactly what their standing has been in the school. These will be more useful to them in securing employment than formal statements or testimonials from the teacher.

13—Thus a pupil will have something definite to work for, and will have some examination every year if he chooses to take it, instead of having a heavy examination every second year—and no incentive to good work in the alternate years.

14—It is believed that with fewer subjects and fewer lessons in the day, the overcrowding of the curriculum that has been so bad a feature in the past, will be overcome; and that the more intensive study of certain subjects for a shorter time will, in the end, better serve the purposes of a true education.

15—Changes in organization so extensive as are demanded by these, and other new regulations, can be made fully effective at once, only with the beginners. Those who have been in the school for some time, working along the old lines, will be given one year to adapt themselves to the changes.

Tariff and Non Tariff Ratings and all Policies give the protection they are intended for and at the minimum rates. Get our rates before looking elsewhere. The Confederation Life Assn. issues a new policy without medical examination for \$1000, also a policy called the Family Policy, which is striking for its protection on man and his wife and many good features. Ask for the pamphlet, which explains all. This should appeal to all married men and women, because the company carries a small risk on the wife also, and costs nothing. No medical examination for the wife is required.
