New Year.

Norman Batty

Electors of Markham Township

Your Vote and Influence are Respectfully
Solicited for

R. A. SMITH

— AS —
COUNCILOR

For the Township of Markham for 1923.

Election, Monday, January 1st, 1923.

R. L. STIVER

Solicits your Vote and Influence
to re-elect him

COUNCILOR FOR 1923

for Markham Township
and wishes you the compliments of the season

Election on New Year's Day, Monday, January 1

Electors of Markham Township

Your Vote and Influence are Respectfully
Solicited for

J. A. BILLERMAN

— AS —
COUNCILOR

For the Township of Markham for 1923
For the interest of all

Election, Monday, January 1st, 1923

To the Electors of Markham Township:

Mr. Padget has had 18 years experience in
Municipal work, and during that time the
taxes have increased to four times their former
amount.

He Plainly stated his position at nomina-
tion on Dec. 22, when he said if elected the
taxes will be still higher.

Therefore it is time for a change.

Harry Stuart Clarry

requests your Vote and Influence to
elect him Reeve.

And if elected will lower the present
high tax rate.

THE LORNE BLOCK FURNISHING STORE

With the most complete line of
furnishings and prices not heard of
in years.

Mens all wool V neck sweaters, "Special" from
\$2.50 to \$4.50.

All have ankle supports.

Also; house shoes, shirts, suspenders, socks etc.
Useful New Year Gifts.

-:- **Norman J. Glass.** -:-

As the women are the greatest
sufferers from the betting and gamb-
ling craze it is not surprising that they
are making an effort to put an end to
the foolish and baneful practice. Last
week a petition against betting on
horse races signed by more than 400
women in Essex County was sent to
the Attorney-General with a view of
bringing the matter before Parlia-
ment. Betting and gambling are de-
stroying many homes, and it is al-
most sickening to listen to many men
telling about the money they won
and the other fellow lost in "doing
the races."

ACETYLENE LIGHT PAYS

It Gives Safe and Efficient Ser-
vice at Reasonable Cost.

To Ensure Strong and Healthy Foals
Pregnant Mares Must Be Given
Exercise, Be Properly Fed and
Have Careful Stable Attendance

(Contributed by Ontario Department of
Agriculture, Toronto.)

ACETYLENE lighting is not by
any means a new thing in
this country as there are
homes here and there in vil-
lage and countryside in which this
system of lighting has been in use
for many years. Many improvements
have been made in the mechanism of
the plant, so that now this system
is considered to be absolutely safe
and reliable if it receives reasonable
care and attention. The cost, of course,
is rather more since the war, but
even at the present price it is an in-
vestment that will return high divi-
dends, probably not always directly
in dollars and cents, but in better
health, more comfort, less labor and
genuine satisfaction for those living
in the home, because acetylene gas in
burning produces less heat, consumes
less oxygen and forms less carbon
dioxide than kerosene, for example,
and makes a far more brilliant light
than even electricity, and it is easier
on the eyes. It may also be
used for cooking in the house and it
is also well adapted for street light-
ing of villages and small towns.

The acetylene lighting plant con-
sists of a gas generator, gas service
piping, and gas jets or chandeliers.
The generators vary in size accord-
ing to amount of gas required, one
for the home being, of course, much
smaller than that required for a large
institution or village. The chief
parts of the generator are: Water
chamber, carbide holder, gas holder,
gas filter, gas washer, gas intake
pipe, feed pipe, safety vent, sludge
agitator and automatic carbide feeder
device. The generator for a home
requires only a few square feet of
space, as it is very compactly con-
structed. It is usually placed in the
basement, and it is very important
that it be kept safe from frost.

The operation of the plant is as
follows: The chemical substance used
for making the gas is calcium car-
bide, the same material that is used
in bicycle lamps, for instance. Auto-
matically this chemical is fed into
the water chamber as fast as the gas
is used in lights. In contact with the
water it forms a gas known as acety-
lene gas, which collects in the gas
holder from which it passes through
small iron pipes to the lights. In the
most modern plants no gas can possi-
bly be generated except as it is re-
quired, hence there is no chance, as
was true of earlier types of plants,
for the gas to accumulate under pres-
sure in the plant and leak out, and
become ignited by a raw flame, re-
sulting in an explosion. The auto-
matic feed should be examined occa-
sionally and every care taken to keep
it in first-class working order. The
directions that come with the plant
should be followed accurately and
religiously. The writer knows of sev-
eral plants owned by farmers for
many years, and in all cases under
proper care the results have been
very satisfactory. What does it
cost? This question can be an-
swered very generally as costs
vary with size of plant, etc. In gen-
eral I would say the initial cost
would be about \$200, including gen-
erator, pipes, chandeliers and the
work of installation for the average-
sized farm home. The carbide for a
year will cost in the neighborhood
of \$12 to \$15. Detailed information
regarding installation, etc., will be
answered upon request by the writer.
—R. R. Graham, B.S.A., O. A. Col-
lege, Guelph.

KU KLUX KLAN

Some years ago that strange
Society known as the Ku Klux Klan
created quite a stir in parts of the
United States by their nocturnal
visits and depredations. Little was
heard of them for some years, but
quite recently they seem to be more
active again.

Evidently the people of Canada do
not intend to let the Klan get a foot-
hold in this Country. On a recent
Sunday evening in giving an ad-
dress at the Labor Temple, Toronto,
Hon. W. E. Raney Attorney-General
of Ontario, made it plain to his
hearers that we have no use for mob
law, and that it will not be tolerat d
in this country.

The Christian Guardian in re-
ferring to the revival of the Ku Klux
had this to say:

"There has been, recently, in the
United States a revival of the
notorious Ku Klux Klan, with its
secret courts, masked night riders,
and its punishment of individuals
who have fallen under its displeasure.
At present its activities seem to be
directed against Roman Catholics,
Jews, and negroes, and rumor has it
that it has secured foothold in a num-
ber of states, and even contemplates
invading Canada and establishing
branches here. Rev. Oscar Hayward
general evangelist for the Calvary
Baptist Church, New York, is the
official lecturer for the Klan and he
claims that in the South it has many
Presbyterian and Methodist preachers
in the ranks. This we do not credit,
but at any rate the Klan is making
such a stir that the Federal Govern-
ment has been urged to take action
to prevent its activities."

You Need a Good Engine

You can't realize the money-
saving value of a good farm engine
until you've seen how much more
quickly and efficiently you can clear

up the
numerous
odd jobs
about the
farm.
For
milk-
ing, sepa-
rat-
ing, churn-

ing, sawing, grinding, sharpening
tools, mixing cement, shelling corn,
filling the silo—there's nothing I
know of that will give better service
with so little attention as a Toronto
Engine. And they operate on
either kerosene or gasoline.

Let me explain in detail these
sturdy little workers next time you
pass my way. Don't forget to see
their able assistants—The Toronto
Saw and the Toronto Grain Grinder
—at the same time.

TORONTO J. Lunau, Agent, Richmond Hill
