MAKE CONCRETE TILE

Well Cured and Properly Made
Cement Tile Equal to Clay.

Strangles, an Infectious Disease of
Colts May Be Controlled—The
Cause, Symptoms and Treatment
of This Serious Disease.

(Contributed by Ontario Department of
Agriculture, Toronto.)

TO make concrete tile satisfactorily many things must be taken into consideration. In the first place it is very necessary that the manufacturer have experience in the making of concrete tile; besides, it is essential to have good strong machinery, a good quality of sand and gravel, or crushed rock, first-class cement, material and cement thoroughly mixed, and a kiln where the tile may be steam cured. Only strong, heavy and durable machinery should be used. With respect to material a good aggregate would be one part material, which would pass through a twenty-mesh sieve, and two parts, which would range from the previous size mentioned up to one-quarter inch stone. Only good sharp material should be used — one in which there is clay should be avoided. If this cannot be procured a sand washing machine will have to be added to the equipment of the plant.

Where a great many tile manufacturers make a mistake in the making of concrete tile is in the fact that they use too "lean" a mixture, that is not enough cement to the material. The proper mixture for first-class tile is one part cement to 2½ parts of crushed material, and in no case should the mix be more lean than one to three of a total aggregate, sufficient water being added to the mixture to make a gum consistency. When the tile are completed they should be placed in kilns where they may be steam cured and left there for a period of not less than 48 hours.

The kiln should be about six feet in height and of a width sufficient to allow the required number of trucks on which the tile have been placed to rest during the curing process. The tile should be placed in the kiln not more than 1½ hours after it has been manufactured and kept there for 48 hours during the steaming process. After it has been cured it might be removed from the kiln and piled in the yard, and should have at least two weeks hardening before being again disturbed. Before the product of any tile plant is offered for sale samples should be tested either at the plant or sent to the Drainage Department at the O. A. C., Guelph, to be tested to see if it is of the proper strength.—W. R. Scott, B.S.A., O. A. College, Guelph.

NEARLY 3,400 KILLED.

In Ontario last year, the lives of 3,380 persons were claimed by consumption. This is all the more terrible because most of them might have been saved had they been helped in time.

Here is a case in point. Several years ago a man came to the Muskoka Free Hospital for Consumptives. He had been on Active Service in Africa, where hardship and exposure had broken down his health. Suspicious of his symptoms he sought our aid. A short time ago he wrote:

"Through your Hospital a soldier of the South African War regained his health and a family a happy home."

This is not an isolated case, for many others have been restored to health and anxious families. It takes much money to carry on the work. Your gift, for whatever amount, will be gratefully received.

Contributions may be sent to Sir William Gage, 84 Spadina avenue, or George A. Reid, 223 College street, Toronto.

IT COSTS LESS

When you figure the loss of time and uncertain yield through dirty seed grain, the acreage loss by reason to your growing worse than useless weed crops, you will readily see that the purchase of a Bull Dog Wild Oat Separator will prove a good investment to you.

We are agents for every line of Farm Implements. With the Fall Season coming on, you will no doubt find you are in need of some new machinery. Let us serve you.

Your Furnace will want looking after before cold weather sets in, or it may be you are contemplating the installation of a new Furnace. We have several lines worthy of your consideration.

We can serve you in Farm Implements and Repairs, Pumps, Lightning Rods, Ladders, Furnaces and Repairs, Eave Troughing, Metal Building, Supplies and all kinds of Tinsmithing.
