To the General Public:  
Will meet you all at the Masonic Hall on Monday and Tuesday evenings next without fail.  
AUNT SUSAN.

### THE SPORTS' SITUATION

The lacrosse meeting called for Monday evening turned out to be a fizzle, no one turning out. Yours truly doubts very much whether enough interest could be worked up to make lacrosse boom in a town the size of Richmond Hill; at least that's the way things look to him after Monday evening's fiasco. Then, again, baseball and hockey seem to have the call with the large majority of sport lovers, both of which need the undivided patronage and support of the public to keep them "fit" financially, and this present year more so than those which have passed, especially as regards hockey. We have some splendid hockey material in the town; yes, the equal of any town in the O.H.A. BUT—(there's that word again)—we must have a team this year which will be able and eligible to go through regular schedules and tournaments without protests being lodged against them, and the one and only way to have it so is to strictly follow the O.H.A. rule, viz.: "Every player must be a bona-fide resident of the town on which team he plays from the 1st day of August preceding the playing season." Now that we have an up-to-date hockey rink it behooves us to have a team of no mean calibre. One or two extra good hockey players must be found positions and become residents of Richmond Hill before August 1st next. Let us not forget this even at this early date; let us keep our eyes open—other towns are doing it even now. Because of the above facts it would be well for lacrosse promoters to study the move well before taking the jump this year. The writer wishes it distinctly understood that he will be solidly behind any promoted sport of the town, but nothing can be gained by overdoing.

## 100% RETURNS

You want to get the most out of the money and labor you are putting into fields of corn and beef and dairy cattle? Then you can't afford to be without a good silo—like my "Toronto" Silo. It supplies the equivalent of rich June pasturage all through the winter. It quickly pays for itself in more milk and healthier cattle.

"Toronto" Silos are made of double tongued and grooved staves of selected spruce, treated with creosote. Silage juices do not affect treated wood. You get 15% extra capacity, due to the special "Toronto" Hip Roof construction.

I'll be glad to talk about these splendid dividend-payers at any time.
