Any local that voted in the negative or failed to take a vote will lose its charter under the United Mine Workers' Union, according to an official statement issued on Saturday by Silby Barrett, the provisional President named by International headquarters to succeed the deposed Dan Livingstone.

The termination of the strike of steel workers at Sydney may be expected to follow quickly upon the coal miners' strike. Whether or not the steel plant will be able to find work for all the men who were on the payroll when the steel men's strike began is another question, for orders have been lost as a result of the tie-up. It, is still another matter whether the plant management will give employment again to men who were to the fore in the violent tactics employed in the early days of the trouble. It is unlikely.

The strike at the steel plant began on June 28th. Most of the miners who quit work were out on July 4th.

The Pictou district did not strike until several days later, and the men at Springhill refused to down tools. An authoritative estimate puts the daily loss in wages during the greater part of the strike at \$80,000. The loss to the coal mining subsidiaries of the British Empire Steel Corporation in coal tonnage is estimated at about 800,000 tons.

MEXICAN BANDIT SHOT BY BODYGUARD

Francisco Villa's Assassination Removes Danger of Another Revolution at Elections.

A despatch from Mexico City Bays: - Francisco (Pancho) Villa and his secretary, Col. Miguel Trillo, were assassinated on Friday morning by the former rebel chieftain's own bodyguard while he was crossing the Guanajuato bridge, near Parral. The men suddenly opened rifle fire from

ambush on each side of the roadway. Official despatches from Canutillo brought the news to the capital, where it was received with relieft. It was accepted as life answering for life. Villa personally executed Jesus Herrera, brother of Maclovio Herrera, who was a general under Carranza, and a number of Herrera's relatives had sworn to kill Villa. They made many attempts to consummate their revenge and Friday's ending of the bandit's career is attributed to them.

-Villa's death had been predicted for months past, as a number of his old followers had become disgusted and deserted service at the ranch

where he reigned like a feudal baron. Government officials refused to ing to public opinion, Villa's death removes the danger of another revolution when the elections are held and also removes the essential backing of the one candidate who could give General Calles real opposition.

366 Million Bushels Wheat Crop Estimate

A despatch from Ottawa says:-In a statement issued on Friday officials of the Agricultural Branch of the Dominion Bureau of Statistics deny that estimates made by them ever set the forthcoming Canadian wheat crop at 500,000,000 bushels.

A yield of 500,000,000 bushels figured upon the estimated acreage to be harvested would mean an average crop of 23 bushels to the acre-a record set in 1915 and never exceeded since. The decennial average is 15% bushels to the acre and the latest crop report of the Bureau issued on July 11 forecast a yield of 5 per cent. above the decennial average. That would mean a total production of 366,000,000 bushels.
