IS THE TELEGRAM WELL?

The Newmarket Express-Herald in an editorial paragraph last week, drew attention to the fact that The Evening Telegram had paid a well deserved tribute to Sir Lomer Gouin—a Liberal. The Express-Herald fears that the Toronto journal can't be well, and suggests that a physician be consulted.

The Newmarket paper should remember, however, that when The Telegram spoke those kind words regarding a Liberal, Sir Gouin was reported to be a very sick man. We must not be too hard on The Telegram. We can remember two or three other occasions on which that newspaper spoke well of Liberals—but of course they were dead ones.

SAFETY FOR ALL

"Safety for all" appears to be a most desirable slogan in this day and generation when too many chances are taken by the average individual. Increased safety is a demand that should be made by modern industry, as accidents reported to our Provincial Compensation Board have shown a very large increase in 1923 over the same period in 1922; in fact, each month in 1923 so far has averaged nearly 1,000 more accidents than in 1922. This must give considerable food for thought to management and men, for both employer and employee stand to lose time and money by the preventable accidents occurring in industry to-day. It has been truly said 'accidents do not happen, they are caused,' and in many cases it must be apparent that certain conditions or practices are bound to lead to accidents. For this reason those vitally interested in industry in Canada, and that means all of us in the country, should take a share in securing greater safety for all.

TACT VS BLUSTER

When Mr. Lloyd George made his tour through the United States, he said some very plain things to the Americans regarding their tardiness in getting into the late war, and their present attitude relative to the League of Nations. But the British statesman did it in such a way that no offence was taken.

The Telegram does not believe in soft words. In a front page cartoon Uncle Sam is represented as a man who wants to boss everything but pays for nothing.

"Nobody knows better than Lloyd George that the United States will contribute neither effort, money nor unselfish counsel to the establishment of prosperity in Europe, or the restoration of the European market for Old Country products."

Although late, the United States did much in bringing the war to a close. May we not hope that our neighbors will yet see their way clear to take their place beside other nations whose aim is to settle differences by peaceful solutions.

Farm Bargains

53 acres, good house, water inside. Fine bank barn, orchard and small fruits. 9 acres of excellent bush, only five thousand dollars, for quick sale.

100 acres, 7 roomed house, bank barn level clay loam, bush pasture and spring creek. \$7,500 easy terms, balance at 5%.

We have good houses in North Toronto, also choice country homes of all sizes and the prices are right. Deal with an old established agency.

J. GROUND & SON, 160 Woburn Ave., Toronto, Phone, Hudson 0144. 22-21

A Farmer Who Gave His Health for His Son

John is a big framed, heavy-handed farmer, with a gentle voice and grey eyes that beam out hopefully at you from behind steel-rimmed spectacles. John wanted his boy to be a doctor, so he worked hard, early and late, cultivating his rocky acres to save the money. He got run down, had two or three attacks of the 'Flu—until he got so weak he couldn't work and after some fainting spells and enforced medical attention he learned the dire news—tuberculosis. If Mrs. John had been living probably he would have had better care and better food.

He was received at the Muskoka Hospital for Consumptives and now with skilled medical and nursing attendance, and the wonderful air of Muskoka to bring health to the tired lungs, John is actually getting better, and he is an enthusiastic booster for the Hospital.

He believes he is well enough now, after ten months, to go back to the farm, but on the doctor's "advice" he is staying on to make sure there will be no relapse. There is a lot of lost time to be made up on that farm, but maybe he can still send his boy to college.

Contributions to aid Muskoka Hospital in its work may be sent to Hon. W. A. Charlton, 223 College Street, Toronto.

The Availability of Alberta Coal

Mr. Stutchbury, trade commissioner for Alberta, is now in Ontario with the purpose of making known to our people the facts of the coal supplies of his own province.

While in the west during the past summer, I tried to learn all that I could about western coal, realizing in part at least the importance of its wonderful deposits and their capacity to meet the need of our fuel consumers. Having had the opportunity of meeting Mr. Stutchbury and others in the west and of discussing with them these matters, has given me some conception of the practicability of the opportunity that is now presented to our people.

It appeals to me as one that offers relief from the burden of the exploitation and profiteering of United States coal operators and shippers, that has become intolerable, by their pitiless disregard of the rights of our people as common citizens of North America.

My conception of citizenship demands that natural products which are necessities of life e.g., coal, water etc., should be held by all governments as national storehouses, from which the people should receive practically at cost needed supplies for their requirements and especially so for protection from the cold of our northern climate.

Not only did the United States government fail in this basic service, but to that sin of omission it added tacit permission to their coal barons to withhold supplies, to demand outrageous prices and to supply very inferior products, that have antagonized the people of Ontario until we are ready to accept any relief that is offered us. What seemed to be impossible has proved to be a practical way of relief viz., that the distant coal fields of Alberta are open to supply the needs of Ontario. The public ownership of our national railway has brought the possibility to our people. We are indebted to the ability and readiness of the President and General Manager of our National line, for the tentative shipments that brought 15,000 tons of Alberta coal to Ontario consumers and has enabled them to test the quality and value of our western coal. The results so far as I can learn has been one of general acceptance and approval.

Although we have not been so fortunate as to have any brought to Richmond Hill it has gone to many other places. The Farmers' Co-Operative received twenty-five cars which were sent to as many different stations that I am told gave entire satisfaction. To the advantage of its free burning quality is added fuller combustible elements that entirely consume the coal, leaving but a very small percentage of ash and no slag or clinkers to be sifted or cause trouble.

In a trial made at Toronto from 2 tons of Alberta coal but 90 lbs of ashes were left and neither slag or clinkers, while anthracite gave over 40 per cent. of such waste.

Mr. Stutchbury came out to discuss the situation with me, as he will be at Toronto for some weeks, I hope that if the citizens of Richmond Hill and vicinity express a wish to hear him that he will come out to address us upon this new possible development of Canada's industrial activities.

HENRY MOYLE
P. S. The prices from the Farmers' Co-Operative to their purchasers was \$12.50 per ton on the car at National Railway stations, those living along the Canadian Pacific had to pay an extra charge to that company.
H. M.

The death occurred early Monday morning of Simon Shuk, aged 78 years, at his home, 508 Runnymede road. The deceased gentleman, who was born in Edgeley, Ontario, came to Toronto about seventeen years ago, and had been living here retired. He is survived by his wife, one son and one daughter. The funeral, was held Wednesday afternoon at 3 o'clock from his late residence to Park Lawn Cemetery.

Defies Rust!

There's one big point about "Toronto" Stable Equipment which makes me specially proud to sell it. It's the fact that the galvanizing thoroughly covers and completely coats both the inside and the outside of the steel tubing with pure zinc spelter. This "hot" process makes it absolutely rust-defying and proof against strong stable acids for the maximum period. This is a mighty valuable feature. Let me explain some of the many others. Or get some of the interesting Toronto Literature.

J. Lunau, Agent
